Permit Information

BUILDING ADDRESS: MONTROSE, COLORADO 81402

APPLICABLE BUILDING CODE: IBC 2003, IRC 2003

TYPE OF CONSTRUCTION:

10-PLEX: TYPE V-B NR SPRINKLERED
08-PLEX: TYPE V-B NR SPRINKLERED
05-PLEX: TYPE V-B NR SPRINKLERED
COMMUNITY BUILDING: TYPE V-B NR

OCCUPANCY:

R-2 (APARTMENTS)
R-3 (MANAGERS UNIT)
A-3 (COMMUNITY BUILDING)

ZONING (MONTROSE):

R-3A (N. SAN JUAN AVE. OVERLAY DISTRICT)

SITE AREA:

PHASE 1 - 3.7 ACRES

OFF STREET PARKING:

REQUIRED:
94 + (3 H.C. AND 1 H.C. VAN) = 98 SPACES

PROVIDED:
59 UNCOVERED SPACES
45 COVERED SPACES
104 TOTAL

GROSS BUIDING AREA:

5-PLEX: (4) @ 4,845 SF = 19,380 SF

8-PLEX: (1) @ 6,442 SF = 6,442 SF

10-PLEX: (2) @ 8,758 SF = 17,516 SF

COMMUNITY BLDG. & MANAGER'S UNIT:
(1) 1,671 SF (COMMUNITY BLDG.) + 983 (MANAGER'S UNIT) = 2,654 SF

LIVING UNITS:

ONE BEDROOM FLAT - GROSS SF 692
- (5) UNITS

ONE BEDROOM FLAT (ACCESSIBLE-USABLE) - GROSS SF 692
- (3) UNITS (UNIT C101 WILL ALSO BE ACCESSIBLE - AUDIO & VISUAL)

ONE BEDROOM FLAT (ACCESSIBLE-FULLY) - GROSS SF 692
- (2) UNITS (UNIT C102 & D102)

TWO BEDROOM FLAT - GROSS SF 925
- (14) UNITS

TWO BEDROOM FLAT (ACCESSIBLE-FULLY) - GROSS SF 925
- (1) UNIT (UNIT G102)

TWO BEDROOM FLAT (ACCESSIBLE-USABLE) - GROSS SF 925
- (14) UNITS

THREE BEDROOM TOWNHOUSE - GROSS SF 1145
- (10) UNITS

(49) TOTAL UNITS

SUNSHINE PEAK APARTMENT HOMES

LOT 2 OF ORMSBEE MINOR SUBDIVISION & CITY PARCEL
SEC. 21, T. 49 N., R. 9 W., N.M.P.M.,
MONTROSE COUNTY, COLORADO

NOTES AND SPECIFICATIONS

GENERAL

ALL WORK SHALL BE CONSTRUCTED IN ACCORDANCE WITH THE CITY OF MONTROSE STANDARDS AND SPECIFICATIONS (CHAPTER 9-1, AVAILABLE FROM PUBLIC WORKS DEPARTMENT, (970) 240-1400) EXCEPT AS OTHERWISE NOTED.

THE CONTRACTOR SHALL OBTAIN FROM THE COLORADO DEPARTMENT OF PUBLIC HEALTH AND ENVIRONMENT, WATER QUALITY CONTROL DIVISION, A GENERAL PERMIT FOR STORMWATER DISCHARGES ASSOCIATED WITH CONSTRUCTION ACTIVITIES

THE LOCATION OF EXISTING UTILITIES SHOWN ON THESE PLANS IS APPROXIMATE ONLY. PRIOR TO CONSTRUCTION, CONTRACTOR SHALL CONTACT UNCC (1-800-922-1987) AND UTILITY OWNERS TO DETERMINE EXACT LOCATIONS.

THE CONTRACTOR SHALL CONTACT UTILITY COMPANIES FOR CONNECTION AND SERVICE EXTENSION DETAILS. WORK GENERALLY INCLUDES:
- DMEA ELECTRICAL POWER TRENCHING & BEDDING, WITH CONDUIT PROVIDED BY UTILITY CO.
- QWEST AND BRESNAN TELEPHONE & CABLE TV TRENCHING & BEDDING WITH 2-3" PVC CONDUIT PROVIDED BY CONTRACTOR.
- KINDER MORGAN GAS TRENCHING & BEDDING WITH GAS PIPING PROVIDED BY UTILITY CO.

IN THE EVENT OF PHYSICAL CONFLICT, THE LOCATION OF SANITARY SEWER AND WATER SYSTEMS IN THESE PLANS SHALL TAKE PRECEDENCE OVER OTHER UTILITIES AND SHALL NOT BE RELOCATED WITHOUT APPROVAL OF THE ENGINEER.

THE CONTRACTOR SHALL HAVE FULL RESPONSIBILITY FOR JOBSITE SAFETY AND SHALL PERFORM ALL WORK IN FULL COMPLIANCE WITH FEDERAL, STATE AND LOCAL SAFETY REGULATIONS.

ENGINEER SHALL SET REFERENCE STAKES AT THE OWNER'S COST ONE TIME. ANY RE-STAKING WILL BE AT THE CONTRACTOR'S COST.

COMPACTION EQUIPMENT

COMPACTION EQUIPMENT SHALL CONSIST OF MACHINERY DESIGNED FOR THAT PURPOSE.

SUBGRADE PREPARATION

REMOVE ALL MANMADE AND ORGANIC MATERIAL FROM HARDSCAPE AREAS AND REPLACE AS A WELL COMPACTED STRUCTURAL FILL. THE RESULTING SUBGRADE BELOW STRUCTURAL FILL OR ANY SUBGRADE IN AREAS OF PLANNED GENERAL SITE FILL SHOULD BE SCARIFIED 10-INCHES, MOISTURE CONDITIONED TO WITHIN 2 PERCENT OF OPTIMUM MOISTURE CONTENT AND COMPACTED TO AT LEAST 95 PERCENT OF STANDARD PROCTOR (ASTM D698) MAXIMUM DRY DENSITY. STRUCTURAL FILL SHOULD BE PLACED IN 10-INCH MAXIMUM LOOSE LIFTS, MOISTURE CONDITIONED TO WITHIN 2 PERCENT OF OPTIMUM MOISTURE CONTENT AND COMPACTED TO AT LEAST 95 PERCENT OF STANDARD PROCTOR MAXIMUM DRY DENSITY. STRUCTURAL FILLS THICKER THAN EIGHT FEET SHOULD BE COMPACTED TO AT LEAST 100 PERCENT OF STANDARD PROCTOR MAXIMUM DRY DENSITY. ON SITE SOILS, DEVOID OF ORGANICS, CONSTRUCTION AND AUTOMOTIVE DEBRIS AND OTHER DELETERIOUS MATERIALS ARE SUITABLE FOR REUSE AS STRUCTURAL FILL. IF AN IMPORTED STRUCTURAL FILL IS REQUIRED, USE A MATERIAL DEVOID OF ORGANICS AND DELETERIOUS MATERIALS WITH A MAXIMUM PARTICLE SIZE OF 2-INCHES, A MAXIMUM OF 15 PERCENT PASSING THE NO. 200 SIEVE AND A MAXIMUM LIQUID LIMIT OF 30.

BASE COURSE

PLACE UNIFORMLY GRADED C.D.O.T. CL. 6 ROAD BASE. MOISTURE CONDITION TO WITHIN 2% OF OPTIMUM MOISTURE AND COMPACT TO 95% MODIFIED PROCTOR DENSITY.

SITE CONCRETE:

ALL CONCRETE SHALL MEET THE REQUIREMENTS OF THE CITY OF MONTROSE CURRENT SPECIFICATIONS FOR CURB, GUTTER & SIDEWALK EXCEPT AS SUPPLEMENTED OR SUPERSEDED BELOW.

CONTRACTOR SHALL BE REQUIRED TO SUBMIT A MIX DESIGN FOR APPROVAL.

CEMENT SHALL BE TYPE I/II, LOW ALKALI FOR SULFATE RESISTANCE.

THE MAXIMUM WATER TO CEMENT RATIO SHALL BE 0.50.

ALL CONCRETE SHALL BE 4000 PSI 28 DAY COMPRESSIVE STRENGTH WITH FIBERMESH.

THE RESULTING SUBGRADE SHALL BE CHECKED FOR UNIFORMITY AND ALL SOFT OR YIELDING MATERIALS SHOULD BE REPLACED PRIOR TO PAVING. CONCRETE SHOULD NOT BE PLACED ON SOFT, SPONGY, FROZEN, OR OTHERWISE UNSUITABLE SUBGRADE.

THE SUBGRADE SHALL BE KEPT MOIST PRIOR TO PAVING.

CONCRETE SHALL NOT BE PLACED ON FROZEN SUBGRADE.

CURING PROCEDURES SHALL PROTECT THE CONCRETE AGAINST MOISTURE LOSS, RAPID TEMPERATURE CHANGE, FREEZING, AND MECHANICAL INJURY FOR AT LEAST 3 DAYS AFTER PLACEMENT. TRAFFIC SHALL NOT BE ALLOWED ON THE PAVEMENT FOR AT LEAST ONE WEEK.

A WHITE, LIQUID MEMBRANE CURING COMPOUND, APPLIED AT THE RATE OF 1 GALLON PER 150 SQUARE FEET, SHALL BE USED.

CONSTRUCTION JOINTS, INCLUDING LONGITUDINAL JOINTS AND TRANSVERSE JOINTS, SHOULD BE FORMED DURING CONSTRUCTION OR SHOULD BE SAWED SHORTLY AFTER THE CONCRETE HAS BEGUN TO SET, BUT PRIOR TO UNCONTROLLED CRACKING. ALL JOINTS SHALL BE SEALED.

CONTRACTION JOINTS SHALL PROVIDE PANELS AS NEARLY SQUARE AS PRACTICAL. IN RECTANGULAR PANELS, THE LONG SIDE SHALL BE NO LONGER THAN 1.5 TIMES AS LONG AS THE SHORT SIDE.

CONTRACTION JOINTS SHALL BE PROVIDED AT "RE-ENTRANT" CORNERS. CONTRACTION JOINTS SHALL BE USED FOR FIXED OBJECTS ISOLATED WITHIN AN INDIVIDUAL SECTION. TWO JOINTS SHALL RADIATE FROM THE OBJECT AND SHALL BE PERPENDICULAR TO THE JOINTS OF THE INDIVIDUAL SECTION.

ALL CONTRACTION JOINTS SHALL BE TOOLED. THE GROOVE OF CONTRACTION JOINTS SHALL BE ONE-FOURTH OF THE SLAB THICKNESS. THE RADIUS AT THE TOP OF THE GROOVE SHALL BE AS SMALL AS POSSIBLE.

DRY UTILITIES:

DRY UTILITIES (ELECTRICITY, TELEPHONE, GAS, CABLE TV) SHOWN HEREON ARE APPROXIMATE. DESIGN SHALL BE BY THE SURVEYORS, AND INSTALLATION PAID FOR BY OWNER. CONTRACTOR SHALL PROVIDE REQUIRED TRENCHING & BEDDING, AND SHALL PROVIDE 3" PVC CONDUIT FOR THE TELEPHONE & 3" PVC CONDUIT FOR THE CABLE TV SERVICE. COORDINATE WITH OWNER AND UTILITY COMPANIES FOR THE SPECIFICATIONS, TIMING, AND INSTALLATION OF UTILITIES.

NOTES:

1. PROVIDE BIKE RACKS, POSTAL PADS, TRASH ENCLOSURES, WALKS, PAVING, AND FENCING AS PORTRAYED ON SITE PLAN.

2. PROVIDE COMPACTING AT ALL BACKFILL AREAS AS PER SOILS REPORT.

3. ANY EXCESS DIRT GENERATED ON SITE SHALL BE HAULED OFF SITE.

4. ALL STREET, SANITARY SEWER, STORM SEWER, AND WATER CONSTRUCTION SHALL CONFORM TO CITY OF MONTROSE STANDARDS AND SPECIFICATIONS CURRENT AT DATE OF EXECUTION OF THE DEVELOPMENT AGREEMENT PERTAINING TO THIS DEVELOPMENT.

5. PRIOR TO COMMENCEMENT OF ANY CONSTRUCTION, THE CONTRACTOR SHALL GIVE THE TOWN ENGINEERING DEPARTMENT TWENTY-FOUR (24) HOURS OF ADVANCE NOTICE.

6. PRIOR TO FINAL INSPECTION AND ACCEPTANCE BY THE CITY, CERTIFICATION OF THE DRAINAGE FACILITIES, BY A REGISTERED ENGINEER, MUST BE SUBMITTED TO AND APPROVED BY THE STORM WATER UTILITY.

7. IF DEWATERING IS USED TO INSTALL UTILITIES, A STATE CONSTRUCTION DEWATERING WASTEWATER DISCHARGE PERMIT IS REQUIRED IF DISCHARGE INTO A SEWER, CHANNEL, IRRIGATION DITCH, OR ANY WATERS OF THE UNITED STATES.

8. ALL CONSTRUCTION ACTIVITIES ON THIS SITE MUST COMPLY WITH THE STATE OF COLORADO PERMITTING PROCESS FOR "STORM WATER DISCHARGES ASSOCIATED WITH CONSTRUCTION ACTIVITY."

9. ALL SIDEWALKS AND CURB CUTS ALONG STREET WILL CONFORM TO CITY OF MONTROSE STANDARDS.

10. TRASH PICKUP WILL BE PROVIDED AT ENCLOSED DUMPSTER AREAS.

11. ALL EXTERIOR BUILDING WALLS WILL BE LOCATED WITHIN 150' OF AN ACCESS FOR FIRE AND EMERGENCY EQUIPMENT.

12. ALL SIGNS WILL CONFORM TO CITY OF MONTROSE STANDARDS.

Julee
Wolverton
970-249-9392

LANDSCAPE NOTES:

1. INSTALL A NEW, AUTOMATIC PRESSURIZED UNDERGROUND IRRIGATION SYSTEM FOR THE NEW LANDSCAPE. SEE THE IRRIGATION PLANS PER GJ PIPE AND SUPPLY.

2. WHEN INSTALLING PLANT MATERIAL, PLANT MIX SHALL BE COMPRISED OF 1 PART SOIL CONDITIONER (DECOMPOSED BARK MULCH OR BACK TO EARTH ACIDIFIER PRODUCT) TO 2 PARTS TOPSOIL. OVER EXCAVATE THE PLANTING HOLES TWO TIMES THE DIAMETER OF THE ROOTBALL. FILL WITH PLANT MIX. ROOTING HORMONE SUCH AS INDOL 3 BUTERIC ACID SHALL BE USED FOR ALL TREES & SHRUBS.

3. PLANT MATERIAL WAS CHOSEN FOR ITS SPECIFIC VARIETY, HEIGHT, AND COLOR. ANY PLANT MATERIAL SUBSTITUTIONS MUST BE APPROVED BY THE LANDSCAPE ARCHITECT PRIOR TO CONSTRUCTION. LANDSCAPE ARCHITECT SHALL APPROVE ALL PLANTS & THEIR LOCATIONS PRIOR TO PLANTING.

4. ALL LANDSCAPE SHRUB BEDS SHALL BE INSTALLED WITH WEED BARRIER FABRIC AND TOPDRESSED WITH A MINIMUM OF THREE INCHES OF SPECIFIED MULCH.

5. TURF GRASS AREAS SHALL BE SEEDED WITH A LOCALLY AVAILABLE SEED MIX (SEE PLANT LEGEND). SEED RATE PER THE SUPPLIER'S RECOMMENDATIONS. PRIOR TO PLACING SEED, ROTOTILL 3 CY/1,000 SF OF SOIL CONDITIONER INTO THE TOP SIX INCHES OF TOPSOIL AND FINE GRADE. THERE SHALL BE NO CLODS GREATER THAN 2".

6. SHREDDED CEDAR BARK MULCH SHALL BE PLACED AROUND THE DRIPLINE OF EACH PLANT TO MAINTAIN MOISTURE, 2 FT. DIAMETER AROUND TREES, AND 1 FT. DIAMETER AROUND SHRUBS AND ORNAMENTAL GRASSES.

7. LOCATE AND MARK LOCATIONS OF ALL UTILITIES PRIOR TO INSTALLING PLANT MATERIAL. DO NOT PLANT ANY TREES OR SHRUBS OVER BURIED UTILITY LINES, OR ANY TREES UNDER OVERHEAD UTILITY LINES.

8. SHRUB BEDS SHALL HAVE WEED BARRIER FABRIC INSTALLED UNDER MULCH UNLESS NOTED OTHERWISE – OVERLAP SEAMS MIN. 4" AND ATTACH FABRIC IN PLACE WITH 8" LONG STAPLES AT MAX. 4' O.C. DRIP EMITTER TUBING SHALL BE PLACED & ANCHORED ON TOP OF THE THE WEED BARRIER FABRIC.

9. WHEN PLANTING TREES, SHRUBS, OR PERENNIALS: THOROUGHLY SOAK PLANTING HOLE WHILE BACKFILLING. PRUNE DEAD OR DAMAGED BRANCHES IMMEDIATELY AFTER PLANTING. FERTILIZE WITH AGRIFORM 21 GRAM PLANT TABLETS, 20–10–5. 6 TABLETS PER TREE, AND 3 PER SHRUB & ORNAMENTAL GRASS.

10. ALL PLANT MATERIAL SHALL CONFORM TO THE AMERICAN STANDARDS FOR NURSERTY STOCK, CURRENT EDITION. PLANTING SHALL BE DONE IN CONFORMANCE WITH THE ASSOCIATED LANDSCAPE CONTRACTORS OF COLORADO (A.L.C.C.) SPECIFICATIONS.

11. ALL PLANT MATERIAL SHALL BE GUARANTEED TO ONE YEAR AFTER FINAL ACCEPTANCE OF LANDSCAPE CONSTRUCTION. THE CONTRACTOR IS RESPONSIBLE FOR REPLACING ANY DEAD OR DYING PLANT MATERIAL ONE TIME WITHIN YEAR WARRANTY PERIOD.

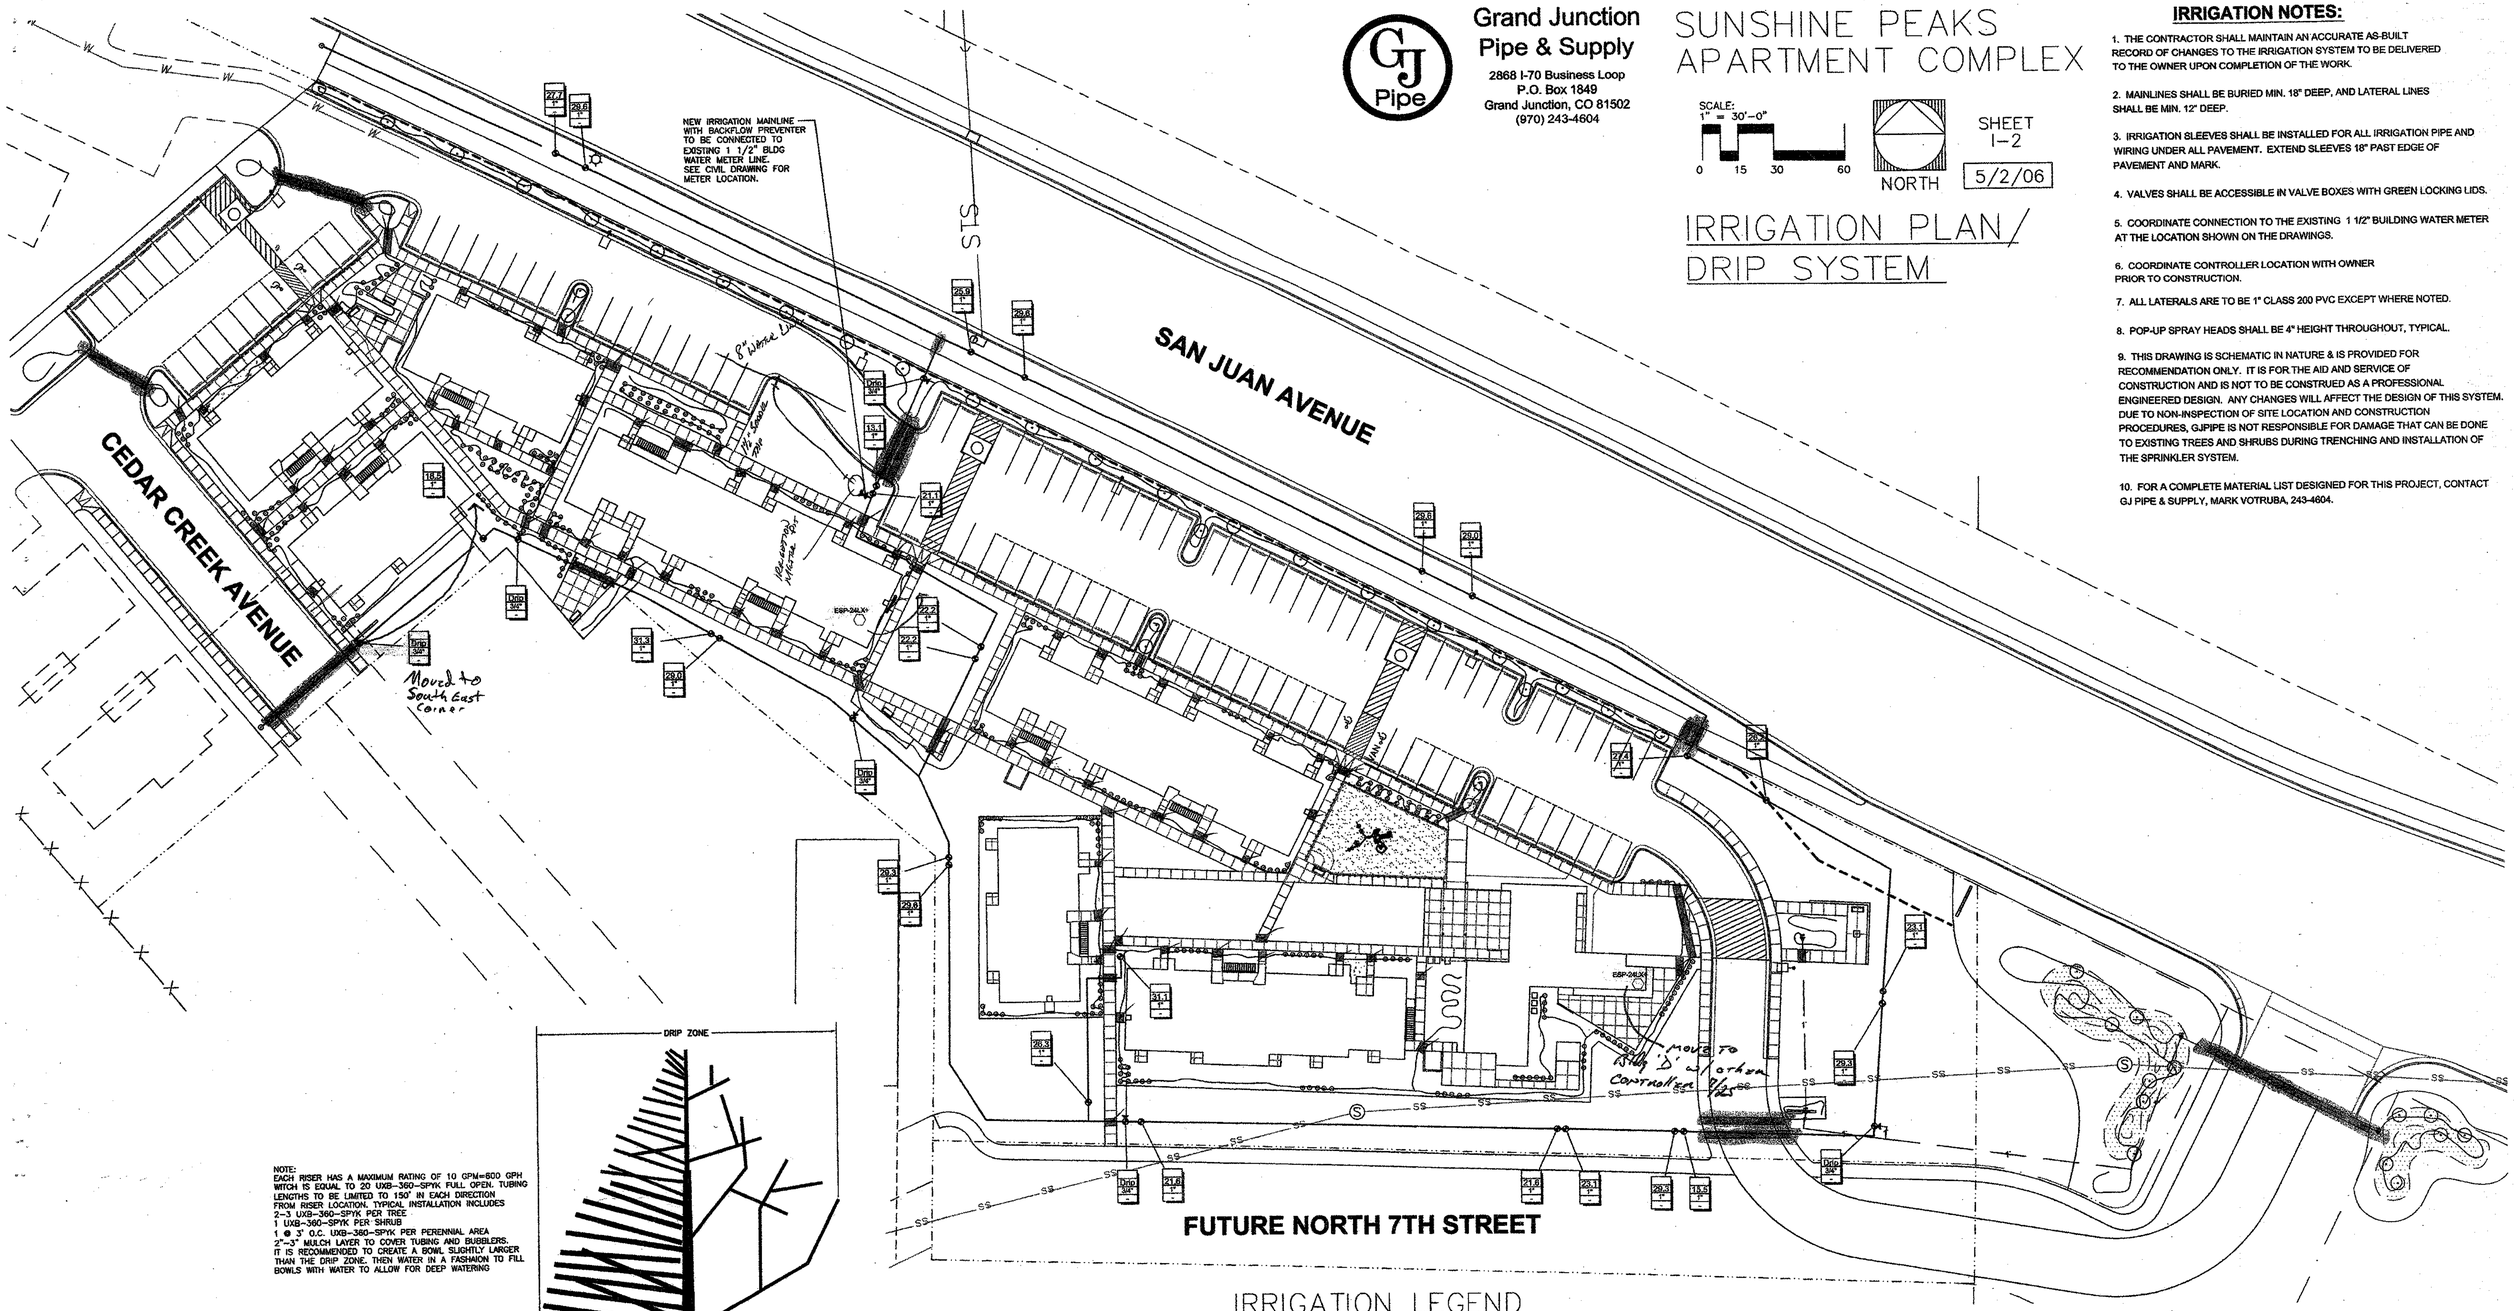
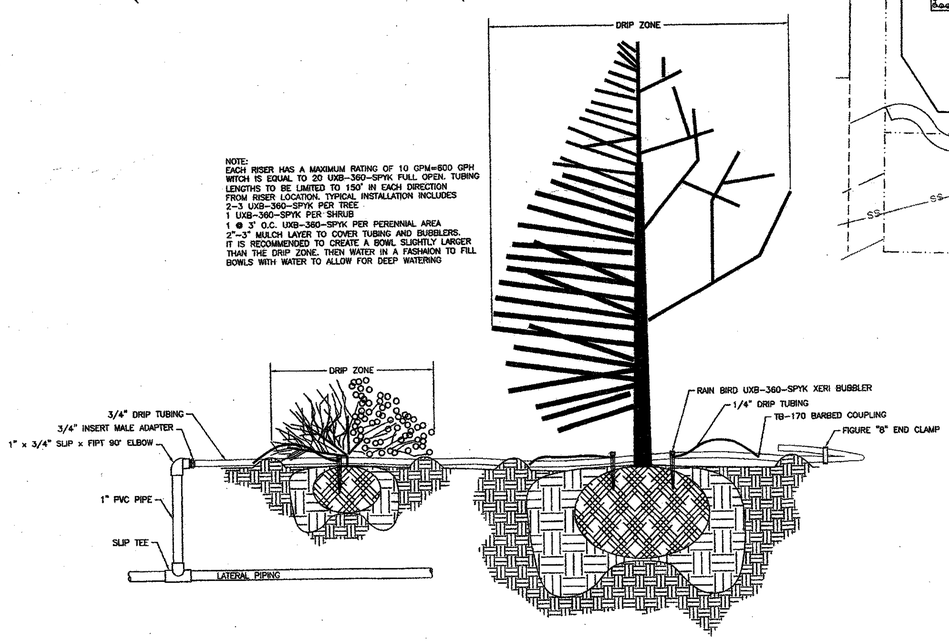
IRRIGATION PLAN/ DRIP SYSTEM

IRRIGATION NOTES:

1. THE CONTRACTOR SHALL MAINTAIN AN ACCURATE AS-BUILT RECORD OF CHANGES TO THE IRRIGATION SYSTEM TO BE DELIVERED TO THE OWNER UPON COMPLETION OF THE WORK.
2. MAINLINES SHALL BE BURIED MIN. 18" DEEP, AND LATERAL LINES SHALL BE MIN. 12" DEEP.
3. IRRIGATION SLEEVES SHALL BE INSTALLED FOR ALL IRRIGATION PIPE AND WIRING UNDER ALL PAVEMENT. EXTEND SLEEVES 18" PAST EDGE OF PAVEMENT AND MARK.
4. VALVES SHALL BE ACCESSIBLE IN VALVE BOXES WITH GREEN LOCKING LIDS.
5. COORDINATE CONNECTION TO THE EXISTING 1 1/2" BUILDING WATER METER AT THE LOCATION SHOWN ON THE DRAWINGS.
6. COORDINATE CONTROLLER LOCATION WITH OWNER PRIOR TO CONSTRUCTION.
7. ALL LATERALS ARE TO BE 1" CLASS 200 PVC EXCEPT WHERE NOTED.
8. POP-UP SPRAY HEADS SHALL BE 4" HEIGHT THROUGHOUT, TYPICAL.
9. THIS DRAWING IS SCHEMATIC IN NATURE & IS PROVIDED FOR RECOMMENDATION ONLY. IT IS FOR THE AID AND SERVICE OF CONSTRUCTION AND IS NOT TO BE CONSTRUED AS A PROFESSIONAL ENGINEERED DESIGN. ANY CHANGES WILL AFFECT THE DESIGN OF THIS SYSTEM. DUE TO NON-INSPECTION OF SITE LOCATION AND CONSTRUCTION PROCEDURES, GJPIPE IS NOT RESPONSIBLE FOR DAMAGE THAT CAN BE DONE TO EXISTING TREES AND SHRUBS DURING TRENCHING AND INSTALLATION OF THE SPRINKLER SYSTEM.
10. FOR A COMPLETE MATERIAL LIST DESIGNED FOR THIS PROJECT, CONTACT GJ PIPE & SUPPLY, MARK VOTRUBA, 243-4604.





NOTE:
EACH RISER HAS A MAXIMUM RATING OF 10 GPM=600 GPH WITCH IS EQUAL TO 20 UXB-360-SPYK FULL OPEN. TUBING LENGTHS TO BE LIMITED TO 150' IN EACH DIRECTION FROM RISER LOCATION. TYPICAL INSTALLATION INCLUDES
2-3 UXB-360-SPYK PER TREE
1 UXB-360-SPYK PER SHRUB
1 @ 3' O.C. UXB-360-SPYK PER PERENNIAL AREA
2"-3" MULCH LAYER TO COVER TUBING AND BUBBLERS.
IT IS RECOMMENDED TO CREATE A BOWL SLIGHTLY LARGER THAN THE DRIP ZONE. THEN WATER IN A FASHION TO FILL BOWLS WITH WATER TO ALLOW FOR DEEP WATERING

Re: Two bedroom accessible unit - mechanical

Dear Mike,

The following information is additional information and clarification to the drawings dated May 05, 2006.

Sheet A01 of 37 – 5 Plex (M1) – First Floor – Bldg. G: The two bedroom unit in the middle of building 'G' corresponds with the 'Fully Accessible 2 Bedroom Unit' shown on Sheet A17 of 37.

Sheet M1: A mechanical plan for the 'Fully Accessible 2 Bedroom Unit' shown on Sheet A17 of 37 is not shown. See attached Sheet 01 for a partial mechanical plan. Setting and additional mechanical for this unit will be similar to the '2 Bedroom Main Floor Unit Plan' shown on Sheet M1.

Sincerely,

Todd Townsend

Subject: Todd,

A, A1, and A2 under Construction Assemblies are calling for 2 layers of building paper. In the value engineering phase of this project we looked at using house wrap as opposed to 2 layers of building paper. We also feel that house wrap will provide a better vapor barrier than 2 layers of building paper. Is it acceptable to use house wrap in place of the 2 layers of building paper?

Subject: Ron,

This RFI is simply to confirm the conversation you and I had 3/6/2007 regarding the drywall texture. It states to install both a knock down finish and an orange peel finish in the specifications. Per our conversation we are to place a light orange peel for all drywall texture.

Please confirm these statements.

Thank you.

Re: RFI 37, 38, 39, & 40

Dear Mike,

The following information is additional information and clarification to the drawings dated May 05, 2006:

Regarding RFI #37 from Schauer Construction.

1 - The HVAC diffuser locations dated 03.29.07 are acceptable to us. The corresponding unit locations as described are acceptable to us. Please note the comments by Bailey Engineers regarding the type of diffuser used.

Regarding RFI #38 from Schauer Construction.

1 - The dropped ceiling in the manager's unit bathroom may be eliminated.

Regarding RFI #39 from Schauer Construction.

1 - Please provide ball round gutters and round downspouts at all locations.

Regarding RFI #40 from Schauer Construction.

1 - The connection as described is acceptable. Please see the attached email from Ron Faleide.

Sincerely,

Ron Faleide

Re: RFI 34 & 35

Dear Mike,

The following information is additional information and clarification to the drawings dated May 05, 2006:

Regarding RFI #34 from Schauer Construction.

1 - The EF-1 fans can be located as relocated in the field and approved by the state inspector.

Regarding RFI #35 from Schauer Construction.

1 - Specifications indicate a knock down finish on the walls, and an orange peel finish of the ceilings. The contractor may provide a light orange peel finish at the walls in lieu of the knock down finish.

ASI #54

Sincerely,

Ron Faleide

ASSEMBLY: 1 HR. RATED MEMBRANE

H2 — ROOF CEILING SYSTEM:
ROLLED ASPHALT ROOFING, ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER JOISTS WITH (2) LAYERS 5/8" EXTERIOR TYPE X GWB.
ASSEMBLY: 1 HR. RATED SOFFIT MEMBRANE

J — ROOF CEILING SYSTEM:
CORRUGATED GALVANIZED METAL ROOFING ON (2) LAYERS 15# FELT, ICE & WATER SHIELD (WERE SHOWN) ON SHEATHING (RE: STRUCT.) OVER ROOF JOISTS OR PRE-ENGINEERED TRUSSES W/ R-38 FOIL FACED BATT INSULATION, WITH 5/8" GWB ACROSS BOTTOM OF JOISTS FOR INTERIOR FINISH.
ASSEMBLY: NO RATING

K — NOT USED

L — CONCRETE PATIOS: RE: STRUCTURAL

M — RAILINGS:
METAL GUARDRAIL WITH METAL BALUSTERS AT 4" O.C. SECURE TO SIDE OF STRINGER AND/OR RIM JOIST. HANDRAIL TO BE PROVIDED AT EXTERIOR STAIRS.

N — INTERIOR STAIRS: CARPET (NO PAD) OVER PREFAB WOOD STRINGERS AND TREADS; PROVIDE (2) LAYERS 5/8" TYPE X GYP. BD. AT UNDERSIDE OF STAIR FOR 1 HR RATING.

GENERAL NOTES:

1. DO NOT SCALE THE DRAWINGS! ALL NOTES AND NOTED DIMENSIONS TAKE PRECEDENCE OVER VISUAL REPRESENTATIONS OR ASSUMED INFORMATION.

2. REFER TO STRUCTURAL FLOOR FRAMING PLANS FOR ALL SHEAR WALL LOCATIONS AND ASSEMBLIES.

3. REFER TO STRUCTURAL FLOOR FRAMING PLANS FOR ALL BEARING WALL LOCATIONS.

4. REFER TO STRUCTURAL DRAWINGS FOR STUD AND JOIST SIZE AND SPACING, SHEATHING SIZE AND THICKNESS, POST SIZES AND CONCRETE THICKNESS.

5. ENSURE THAT DRAINAGE IS AWAY FROM BUILDING AT A SLOPE OF 1/4" PER FOOT MINIMUM. TO ALLEVIATE ANY TRAPPED WATER BETWEEN BUILDING AND SIDEWALK USE 4" DIA. CORRUGATED PLASTIC PIPE TO ROUTE WATER UNDER SIDEWALKS TO AN OPEN, DRAINABLE AREA. TYPICAL AT ALL LOCATIONS.

6. ENSURE ATTIC VENTING THROUGH ROOF, WALL AND SOFFIT IS PER CODE.

7. CONSTRUCTION LOADS SHALL NOT BE GREATER THAN DESIGN LOADS OR OTHERWISE OVERLOAD THE STRUCTURE.

8. WALLS ARE DIMENSIONED FROM FRAMING TO FRAMING UNLESS NOTED OTHERWISE.

9. DOOR FRAMES NOT DIMENSIONED ARE TO BE PLACED 4" FROM ADJACENT WALLS OR CENTERED ALONG WALL LENGTH

10. **PROVIDE FURRING AND GYP. BD. SOFFITS AS REQ'D TO COVER DUCTWORK, PLUMBING OR ELECTRICAL SYSTEMS.**

11. BUILDER SHALL VERIFY ALL MATERIALS, DIMENSIONS AND CONDITIONS SHOWN ON DRAWINGS OR NOTED IN SPECS. ANY VARIANCES ENCOUNTERED ON THE SITE WILL BE REPORTED TO THE ARCHITECT BEFORE COMMENCEMENT OF AFFECTED WORK.

12. CAULK ALL JOINTS AROUND WALL PENETRATIONS TO PROVIDE A WATER AND AIR TIGHT SEAL. CAULK ALL JOINTS BETWEEN EXTERIOR SIDING & TRIM, BETWEEN WINDOWS & DOORS AND TRIM & FLASHING, BETWEEN EXT. TRIM & SOFFIT AND BETWEEN EXT. SIDING AND TRIM & FLASHING. PROVIDE WEEPS PER MANUFACTURER'S RECOMMENDATIONS.

13. WINDOWS JAMBS & HEAD SHALL BE WRAPPED IN GYP. BD.AND HAVE A 1x6 PAINT GRADE FIR SILL W/ 1X2 WD SKIRT, CAULK ALL JOINTS BETWEEN WINDOW, GYP. BD. & WD. TRIM.

14. PROVIDE CONCRETE SPLASH BLOCKS AT ALL DOWNSPOUT LOCATIONS

CONSTRUCTION ASSEMBLIES

A EXTERIOR WALLS:
CEMENTIOUS LAP SIDING, [redacted] ON SHEATHING (RE: STRUCTURAL), OVER WOOD STUDS W/ R14 BATT INSULATION, VAPOR BARRIER AND 1/2" GWB INTERIOR FINISH.
ASSEMBLY: NOT RATED

A1 EXTERIOR WALLS:
CORRUGATED GALVANIZED METAL SIDING OR ASPHALT SHINGLES (RE: ELEV.)ON TWO LAYERS BUILDING PAPER ON SHEATHING (RE: STRUCTURAL) OVER WOOD STUDS W/ R14 BATT INSULATION, VAPOR BARRIER AND 1/2" GWB INTERIOR FINISH.
ASSEMBLY: NO RATING

A2 EXTERIOR WALLS:
CEMENTIOUS-PANEL ON TWO LAYERS BUILDING PAPER ON SHEATHING (RE: STRUCTURAL) OVER WOOD STUDS W/ R14 BATT INSULATION, VAPOR BARRIER AND 1/2" GWB INTERIOR FINISH.
ASSEMBLY: NO RATING

B EXTERIOR WALLS:
CEMENTIOUS LAP SIDING OR PANEL (RE: ELEV.), ON TWO LAYERS BUILDING PAPER, ON 5/8" EXTERIOR TYPE X GWB, ON SHEATHING (RE: STRUCT), OVER WOOD STUDS W/ R14 BATT INSULATION, VAPOR BARRIER AND 5/8" TYPE X GWB INTERIOR FINISH.
ASSEMBLY: UL-U544 1 HR.

C PARTY WALLS:
TWO PARALLEL STUD WALLS W/COMMON TOP PLATE (RE: STRUCTURAL). EACH WALL TO HAVE 5/8" TYPE X GWB ON INSIDE FACE (AT AIR GAP), R-13 HIGH DENSITY INSULATION, 5/8" TYPE X GWB ROOM SIDE FINISH. PROVIDE 2" CLEAR AIR GAP BETWEEN WALLS. (@ TUB SURROUND PROVIDE CEMENT BACKER BOARD IN ADDITION TO GWB.)
ASSEMBLY: 1 HR RATED (BASED ON UL-U305)

D INTERIOR WALLS:
1/2" GWB EACH SIDE OF WOOD STUDS 16" O.C., AT WET AREAS PROVIDE 1/2" MOISTURE RESISTANT GWB. PROVIDE CEMENT BACKER BOARD AT TUB SURROUND WALLS
ASSEMBLY: NO RATING

E FLOORS AT GRADE:
POST TENSION CONCRETE SLAB, RE: STRUCTURAL
ASSEMBLY: NO RATING (NON COMBUSTIBLE)

F FLOOR/CEILING SYSTEM:
FLOOR FINISH, ON SUBFLOOR, ON FLOOR JOISTS, WITH 7/8" DEEP FURRING CHANNELS, WITH 1-1/4" BATT INSULATION BTWN FURRING CHANNELS AND BOTTOM OF JOISTS, WITH 5/8" TYPE X GWB CEILING FINISH.
ASSEMBLY: UL-L530 1 HR.

F1 FLOOR/CEILING SYSTEM:
FLOOR FINISH, ON SUBFLOOR, ON FLOOR JOISTS, WITH 5/8" GWB CEILING FINISH

G BALCONY/CEILING SYSTEM:
CONC. (RE: STRUCT.) ON A WATER PROOF MEMBRANE, ON SUBFLOOR, ON FLOOR JOISTS, WITH 7/8" DEEP FURRING CHANNELS, WITH 1-1/4" BATT INSULATION BTWN FURRING CHANNELS AND BOTTOM OF JOISTS, WITH 5/8" EXTERIOR TYPE X GWB CEILING FINISH.
ASSEMBLY: UL-L530 1 HR.

H ROOF CEILING SYSTEM:
ASPHALT SHINGLES ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER PRE-ENGINEERED ROOF TRUSSES W/ R-38 FOIL FACED BATT INSULATION, WITH 5/8" GWB ACROSS BOTTOM OF TRUSSES FOR INTERIOR FINISH.
ASSEMBLY: NO RATING

H1 ROOF CEILING SYSTEM:
ASPHALT SHINGLES ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER 2X2 OVER JOISTS (RE: STRUCT.) W/ R-38 FOIL FACED BATT INSULATION, VAPOR BARRIER WITH (2) LAYERS 5/8" TYPE X GWB ACROSS BOTTOM OF JOISTS FOR INTERIOR FINISH.
ASSEMBLY: 1 HR. RATED MEMBRANE

H2 ROOF CEILING SYSTEM:
ROLLED ASPHALT ROOFING, ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER JOISTS WITH (2) LAYERS 5/8" EXTERIOR TYPE X GWB.
ASSEMBLY: 1 HR. RATED SOFFIT MEMBRANE

J ROOF CEILING SYSTEM:
CORRUGATED GALVANIZED METAL ROOFING ON (2) LAYERS 15# FELT, (ICE & WATER SHIELD WHERE SHOWN) ON SHEATHING (RE: STRUCT.) OVER ROOF JOISTS OR PRE-ENGINEERED TRUSSES W/ R-38 FOIL FACED BATT INSULATION, WITH 5/8" GWB ACROSS BOTTOM OF JOISTS FOR INTERIOR FINISH.
ASSEMBLY: NO RATING

K NOT USED

L CONCRETE PATIOS: RE: STRUCTURAL

ASSEMBLY: NO RATING (NON COMBUSTIBLE)

F FLOOR/CEILING SYSTEM:
FLOOR FINISH, ON SUBFLOOR, ON FLOOR JOISTS, WITH 7/8" DEEP FURRING CHANNELS, WITH 1-1/4" BATT INSULATION BTWN FURRING CHANNELS AND BOTTOM OF JOISTS, WITH 5/8" TYPE X GWB CEILING FINISH.
ASSEMBLY: UL-L530 1 HR

F1 FLOOR/CEILING SYSTEM:
FLOOR FINISH, ON SUBFLOOR, ON FLOOR JOISTS, WITH 5/8" GWB CEILING FINISH

G BALCONY/CEILING SYSTEM:
CONC. (RE: STRUCT.) ON A WATER PROOF MEMBRANE, ON SUBFLOOR, ON FLOOR JOISTS, WITH 7/8" DEEP FURRING CHANNELS, WITH 1-1/4" BATT INSULATION BTWN FURRING CHANNELS AND BOTTOM OF JOISTS, WITH 5/8" EXTERIOR TYPE X GWB CEILING FINISH.
ASSEMBLY: UL-L530 1 HR

H ROOF CEILING SYSTEM: AJI #34
ASPHALT SHINGLES ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER PRE-ENGINEERED ROOF TRUSSES W/ R-38 FOIL FACED BATT INSULATION, WITH 5/8" GWB ACROSS BOTTOM OF TRUSSES FOR INTERIOR FINISH.
ASSEMBLY: NO RATING

H1 ROOF CEILING SYSTEM: AJI #34
ASPHALT SHINGLES ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER 2X2 OVER JOISTS (RE: STRUCT.) W/ R-38 FOIL FACED BATT INSULATION, VAPOR BARRIER WITH (2) LAYERS 5/8" TYPE X GWB ACROSS BOTTOM OF JOISTS FOR INTERIOR FINISH.
ASSEMBLY: 1 HR. RATED MEMBRANE

H2 ROOF CEILING SYSTEM: AJI #34
ROLLED ASPHALT ROOFING, ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER JOISTS WITH (2) LATERS 5/8" EXTERIOR TYPE X GWB.
ASSEMBLY: 1 HR. RATED SOFFIT MEMBRANE

J ROOF CEILING SYSTEM:
CORRUGATED GALVANIZED METAL ROOFING ON (2) LAYERS 15# FELT, (ICE & WATER SHIELD WHERE SHOWN) ON SHEATHING (RE: STRUCT.) OVER ROOF JOISTS OR PRE-ENGINEERED TRUSSES W/ R-38 FOIL FACED BATT INSULATION, WITH 5/8" GWB ACROSS BOTTOM OF JOISTS FOR INTERIOR FINISH.
ASSEMBLY: NO RATING

K NOT USED

L CONCRETE PATIOS: RE: STRUCTURAL

M RAILINGS:
METAL GUARDRAIL WITH METAL BALUSTERS AT 4" O.C., SECURE TO SIDE OF STRINGER AND/OR RIM JOIST. HANDRAIL TO BE PROVIDED AT EXTERIOR STAIRS.

N INTERIOR STAIRS: CARPET (NO PAD) OVER PREFAB WOOD STRINGERS AND TREADS; PROVIDE (2) LAYERS 5/8" TYPE X GYP. BD. AT UNDERSIDE OF STAIR FOR 1 HR RATING.

GENERAL NOTES:

1. DO NOT SCALE THE DRAWINGS! ALL NOTES AND NOTED DIMENSIONS TAKE PRECEDENCE OVER VISUAL REPRESENTATIONS OR ASSUMED INFORMATION.

2. REFER TO STRUCTURAL FLOOR FRAMING PLANS FOR ALL SHEAR WALL LOCATIONS AND ASSEMBLIES.

3. REFER TO STRUCTURAL FLOOR FRAMING PLANS FOR ALL BEARING WALL LOCATIONS.

4. REFER TO STRUCTURAL DRAWINGS FOR STUD AND JOIST SIZE AND SPACING, SHEATHING SIZE AND THICKNESS, POST SIZES AND CONCRETE THICKNESS.

5. ENSURE THAT DRAINAGE IS AWAY FROM BUILDING AT A SLOPE OF 1/4" PER FOOT MINIMUM. TO ALLEVIATE ANY TRAPPED WATER BETWEEN BUILDING AND SIDEWALK USE 4" DIA. CORRUGATED PLASTIC PIPE TO ROUTE WATER UNDER SIDEWALKS TO AN OPEN, DRAINABLE AREA. TYPICAL AT ALL LOCATIONS.

6. ENSURE ATTIC VENTING THROUGH ROOF, WALL AND SOFFIT IS PER CODE.

7. CONSTRUCTION LOADS SHALL NOT BE GREATER THAN DESIGN LOADS OR OTHERWISE OVERLOAD THE STRUCTURE.

8. WALLS ARE DIMENSIONED FROM FRAMING TO FRAMING UNLESS NOTED OTHERWISE.

9. DOOR FRAMES NOT DIMENSIONED ARE TO BE PLACED 4" FROM ADJACENT WALLS OR CENTERED ALONG WALL LENGTH

10. PROVIDE FURRING AND GYP. BD. SOFFITS AS REQ'D TO COVER DUCTWORK, PLUMBING OR ELECTRICAL SYSTEMS.

11. BUILDER SHALL VERIFY ALL MATERIALS, DIMENSIONS AND CONDITIONS SHOWN ON DRAWINGS OR NOTED IN SPECS. ANY VARIANCES ENCOUNTERED ON THE SITE WILL BE REPORTED TO THE ARCHITECT BEFORE COMMENCEMENT OF AFFECTED WORK.

12. CAULK ALL JOINTS AROUND WALL PENETRATIONS TO PROVIDE A WATER AND AIR TIGHT SEAL. CAULK ALL JOINTS BETWEEN EXTERIOR SIDING & TRIM, BETWEEN WINDOWS & DOORS AND TRIM & FLASHING, BETWEEN EXT. TRIM & SOFFIT AND BETWEEN EXT. SIDING AND TRIM & FLASHING. PROVIDE WEEPS PER MANUFACTURER'S RECOMMENDATIONS.

13. WINDOWS JAMBS & HEAD SHALL BE WRAPPED IN GYP. BD.AND HAVE A 1x6 PAINT GRADE FIR SILL W/ 1X2 WD SKIRT, CAULK ALL JOINTS BETWEEN WINDOW, GYP. BD. & WD. TRIM.

14. PROVIDE CONCRETE SPLASH BLOCKS AT ALL DOWNSPOUT LOCATIONS

		Reply Required:	9/20/2006
RFI Number:	4	**Area Involved:**	Stair Landings
Cost Impact:	no	**Urgent Yes/No:**	yes
Schedule Impact:	no	**Subcontractor RFI Date:**	9/18/2006
Subcontractor RFI Number:	1	**Drawing Number:**	S2
Specification Section:	05120		

Subject: Todd,

Leach Industrial Service sent me the following RFI this morning:

In lieu of the 0.6 x 24 gauge form deck at the stair landings, could we use a 1/4" thick plate with galva-primer on the underside of the plate as concrete will not adhere to a galvanized finish.

Please advise.

Thank you.

Description of RFI:	Proposed Post in Island for Electrical	Date Submitted:	12/27/2006
		Reply Required:	1/5/2007
RFI Number:	25	Area Involved:	2 Bedroom Unit Kitchens
Cost Impact:	no	Urgent Yes/No:	yes
Schedule Impact:	no	Subcontractor RFI Date:	
Subcontractor RFI Number:		Drawing Number:	All 2 Bedroom Units
Specification Section:	16000		

Subject: Todd and Ron.

When the slabs were poured there was no conduit placed in the slab to run electrical lines to the island in the kitchens of the 2 bedroom units. In attempting to cut the top portion of the slab to place the electrical line it was found that the top of the sleeve encasing the tendon of the post tension slab was approximately 1 inch below the top of the slab. Would it be permissible to place a column at the corner of the island, from the island to the ceiling, in order to supply the electricity to the island? The proposed post location is shown in the attached PDF.

Thank you.

Description of RFI:	Wall Panel Questions	Date Submitted:	8/15/2006
		Reply Required:	8/17/2006
RFI Number:	2	Area Involved:	Wall Panels
Cost Impact:	no	Urgent Yes/No:	yes
Schedule Impact:	no	Subcontractor RFI Date:	
Subcontractor RFI Number:		Drawing Number:	
Specification Section:	06100		

Subject: 5. At the 2-bedroom units, there are some walls shown around the pantry in the kitchen and around the linen cabinet in the bathrooms. These walls appear to be 2x2 walls. Please verify this. ASI #04

6. Some of the structural details show walls that run parallel to I-joists are to be ballooned to underside of floor sheathing. Yet, the headers of openings in these walls are shown flush with the top of I-joists which would make panelization difficult. I would recommend that we provide all standard height walls in order to be consistent throughout the entire project. Please verify if this will be ok. ASI #01

7. In the structural drawings, some walls are shown having 7/16" osb wall sheathing and others have 1/2" plywood wall sheathing. If the engineer will allow it, I would recommend using 7/16" osb on the entire project in order to keep jamb sizes consistent. Please verify if this will be ok. ASI #10

10. Please verify that the 1st level, center unit of building G1 is to be a handicap accessible unit. ASI #01

12. There is a wide plate at the top and bottom of the double party wall construction. The architectural drawings and structural drawings show this plate in different locations. Please verify if I should follow the architectural drawings or the structural drawings. (A18/City of Montrose, A19/3, and S8/A are each showing a different configuration)

18. At the 1st level of the town home, there is a window V on the interior wall of the dining room. Would you like this window to have a standard header height? ASI #04

19. At the 1st level of the town home, there is a window above the door leading into Bathroom #1. (See detail 1A on sheet A15.1.) I need the rough opening and header height of this window. Also, would you like this window to be centered on the door below it? (Please provide the size of the window, SCCI will coordinate the R.O. size with the window subcontractor) ASI #04

Subcontractor RFI Number:		Drawing Number:	A11, A17, C801
Specification Section:	08210		

Subject: Todd,

I understand from Chris that you want all pantries to have doors. 4 pantries are shown without doors in an M1, no doors are shown on the pantries in the fully accessible 2 bedroom unit, and no doors are shown at the pantry in the manager's unit in the community building. In addition we feel that the opening of these pantries may be too small to accommodate a door efficiently. Please advise.

Thank you.

RE: Sunshine Peak Apt. - Fire Riser Room in Building B

Hi Mike,

As we discussed on the phone today, the fire riser room in building B is in an alternate location. This location will have a 1470 door and will be designed like the other fire riser rooms except for the location. Please let us know if you have an additional window 'W' so that we can provide a drawing with an alternative location.

Per ASI 02 Sheet 02, we removed a window because of a conflict with the stair, we would like to provide an alternative location for this window if that is an option. Please let us know.

Sincerely,

Todd Townsend

Description of RFI:	Ceiling Height in 2nd Floor Townhouse Bathroom	Date Submitted:	12/14/2006
		Reply Required:	12/15/2006
RFI Number:	18	Area Involved:	2nd Floor Townhouse Bathrooms
Cost Impact:	no		
Schedule Impact:	no	Urgent Yes/No:	no
Subcontractor RFI Number:		Subcontractor RFI Date:	
Specification Section:	06100, 09254	Drawing Number:	A12

Subject: Ron and Todd,

This RFI is simply to confirm the conversation between Dave Rose and Ron Faleide at approximately 3:00 p.m. on 12/14/2006. In this conversation it was decided that in order to accommodate the fire sprinkler line running across the 2nd floor bathroom in the town house unit, the ceiling would be dropped from the entrance of the bathroom to the line where the bathtub begins. At this point, where the bath tub begins, the dropped ceiling will terminate and the ceiling height above the bath tub will be full height. The dropped portion of this ceiling will drop no more than 6 inches. Please confirm the above statements.

Thank you.

Re: Schauer Construction RFI 17

Dear Mike,

The following information is additional information and clarification to the drawings dated May 05, 2006 and response to your RFI 17:

1 – Sheet A11 of 37 – M1 Main Floor Plan: the kitchen plan in the two bedroom refers to Sheet A11.1 Elevation 5A.

2 – Sheet A11.1 of 37 – Interior Elevation 5A: Provide door to pantry as shown on elevation. Contractor's option to provide hollow core door or casework door.

3 – Sheet A17 of 37 – Fully Accessible 2 Bedroom Unit: the kitchen plan in the two bedroom accessible unit refers to Sheet A17.1 Elevation 5A.

4 – Sheet A17.1 of 37 – Interior Elevation 5A: Provide door to pantry as shown on elevation. Contractor's option to provide hollow core door or casework door.

5 – Sheet C801 of 37 – Manager's Unit Plan: the kitchen plan in the manager's unit refers to Sheet A11.1 Elevation 5A. The manager's unit kitchen elevation is similar to the one shown on Sheet A11.1 elevation 5A.

Sincerely,

Todd Townsend

Subcontractor RFI Number:		Drawing Number:	
Specification Section:	15300		

Subject: Ron,

Automatic Fire feels that the following request will be mechanically adequate, but wishes this RFI to be issued more for aesthetic reasons.

This is a request to change from a sidewall style sprinkler at the roof level in the town home units to a pendant style. There will be a freezing potential because the piping will be ran in the attic space if the sidewalls are used. Piping for pendants will be ran in the 2 x 12's as low as possible with insulation above the piping.

Thank you.

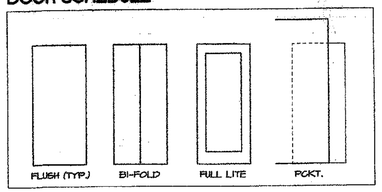
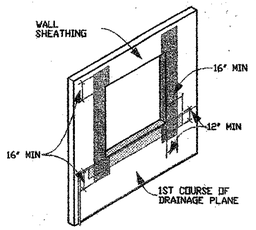
DOOR SCHEDULE

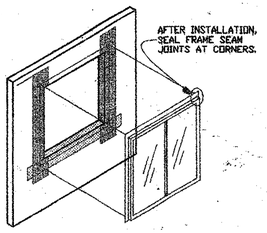


STEP #1



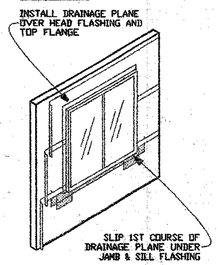
INSTALL DRAINAGE PLANE UP TO BOTTOM OF OPENING. APPLY SILL FLASHING HORIZONTALLY OVER BOTTOM OF OPENING AND VERTICALLY UP OPENING SIDES. FASTEN THE TOP EDGE OF THE SILL FLASHING TO THE WALL SHEATHING & THE REMAINDER TO THE DRAINAGE COURSE.
LAP JAMB FLASHING OVER TOP OF SILL FLASHING LEAVING BOTTOM EDGE UNATTACHED. FOLD JAMB FLASHING AROUND SIDE OF ROUGH OPENING AND OVER UPTURNED SILL FLASHING

STEP #2



TO SEAL WINDOW FRAME TO OPENING, APPLY A CONTINUOUS BEAD OF SEALANT TO THE BACK OF THE FLANGE NEAR THE OUTER EDGE.
ADJUST WINDOW PLUMB AND LEVEL. USE CORROSION RESISTANT 6d FASTNERS 3" TO 10" FROM CORNERS AND 16" O.C. AROUND PERIMETER.

STEP #3



SUPPLY SIMILAR METAL HEAD FLASHING FOR FULL WIDTH OF WINDOW FRAME. DRAINAGE PLANE TO HAVE MIN. 4" HORIZ. LAPS AND 6" MIN. VERTICAL LAPS.

NOTE: WINDOWS / DOORS WITHOUT FLANGES SEALED TO JAMB AND SILL FLASHING AROUND OPENING WITH SEALANT OVER BACKER ROD.

Re: Schauer Construction RFI 17

Dear Mike,

The following information is additional information and clarification to the drawings dated May 05, 2006 and response to your RFI 17:

1 – Sheet A11 of 37 – M1 Main Floor Plan: The kitchen plan in the two bedroom refers to Sheet A11.1 Elevation 5A.

2 – Sheet A11.1 of 37 – Interior Elevation 5A: Provide door to pantry as shown on elevation. Contractor's option to provide hollow core door or casework door.

3 – Sheet A17 of 37 – Fully Accessible 2 Bedroom Unit: The kitchen plan in the two bedroom accessible unit refers to Sheet A17.1 Elevation 3A.

4 – Sheet A17.1 of 37 – Interior Elevation 3A: Provide door to pantry as shown on elevation. Contractor's option to provide hollow core door or casework door.

5 – Sheet CB01 of 37 – Managers Unit Plan: The kitchen plan in the manager's unit refers to Sheet A11.1 Elevation 5A. The manager's unit kitchen elevation is similar to the one shown on Sheet A11.1 elevation 5A.

Sincerely,

Todd Townsend

7	SHOWER SPRAY UNIT W/ 60" HOSE MIN.
8	WATER SUPPLY & DRAIN PIPES UNDER LAV & SINK SHALL BE INSULATED TO PROTECT AGAINST CONTACT. THERE SHALL BE NO SHARP OR ABRASIVE SURFACES UNDER LAV. & SINK.
9	36" GRAB BARL; PROVIDE BLOCKING
10	42" GRAB BAR; PROVIDE BLOCKING
11	24" GRAB BAR; PROVIDE BLOCKING
12	12" GRAB BAR; PROVIDE BLOCKING
13	CONTROLS SHALL BE LOCATED BETWEEN CENTER LINE OF THE TUB & THE OPEN SIDE OF TUB
14	REMOVABLE IN-TUB SEAT
15	3 PIECE SHOWER SURROUND
16	SOFFIT
17	BASE CABINET FACE, BASE, SIDES, AND SHELF TO BE REMOVABLE FOR WHEEL CHAIR ACCESS TO SINK; COUNTER TOP SUPPORTED BY METAL SUPPORT ARMS EACH SIDE OF VANITY; SUPPORT ARMS ARE NOT TO IMPEDE KNEE & TOE CLEARANCE; SUPPORT ARMS ARE TO BE SECURED TO WALL; PAINTED FINISH SEE ARCHITECT FOR COLOR; F.F. TO EXTEND TO WALL UNDERNEATH COUNTER TOP
18	RECESS MOUNTED 16" X 22" MEDICINE CABINET W/ MIRROR FRONT
19	LIGHT FIXTURE EACH SIDE OF MIRROR; SEE ELECTRICAL DWG.
20	BLOCKING FOR FUTURE GRAB BAR INSTALLATION
21	SEMI RECESSED TOILET PAPER DISPENSER
22	REFRIGERATOR; SIDE BY SIDE AT ALL FULLY ACCESSIBLE UNITS & COMMUNITY BUILDING
23	RECIRCULATING VENT HOOD
24	ELECTRIC RANGE; CONTROLS TO BE LOCATED AT FRONT IN ALL USABLE AND FULLY ACCESSIBLE UNITS AS WELL AS COM. BLDG.; FULLY ACCESSIBLE UNITS AND COM. BLDG. TO HAVE DROP IN RANGE FLUSH W/ 34" COUNTERTOP
25	DISHWASHER; FULLY ACCESSIBLE AND COM. BLDG. TO HAVE DISH WASHER TO FIT UNDER 34" COUNTERTOP
26	3'-0" X 3'-0" FRAMELESS MIRROR
27	VALANCE TO MATCH CASEWORK
28	WINDOW; SEE PLAN
29	CASEWORK FILLER STRIP
30	SOAP DISPENSER (ADA)
31	SANITARY NAPKIN RECEPTACLE
32	SEMI RECESSED PAPER TOWEL DISPENSER/ TRASH RECEPTACLE IN 2X6 WALL
33	PLAM SKIRT AROUND COUNTER TOP
34	SS TOWEL HOOK
35	RECESS MOUNTED 17" X 31" MEDICINE CABINET W/ MIRROR FRONT; BRADLEY MODEL 175 OR SIMILAR
36	1X2 SOLID WOOD TRIM TO MATCH BASE CABINETS; PROVIDE AS FILLER STRIPS ON TOP & SIDE AT BATHTUB; PROVIDE BLOCKING
37	PLAM CAP ON TOP OF PONY WALL 40" A.F.F.
38	SIT UP BAR 42" A.F.F.; SEE DETAIL
39	REMOVABLE BASE CABINET TO PROVIDE 30" CLEAR MINIMUM AT SINK AND WORK SPACE; F.F. FLOOR TO EXTEND TO WALL UNDERNEATH BASE CABINET.
40	PROVIDE CASEWORK FINISH ON TOPS OF UPPER CABINETS (TYP. AT TOWNHOUSE)
41	PROVIDE 24" DEEP UPPER CABINET ABOVE REFRIGERATOR
42	SUPPORT BRACKET TO MATCH CASEWORK

The following is a response to your RFI 08:

1 - No blind cabinets.

2 - The top of wall cabinets must be finished of the townhouse. A natural maple finish will be adequate.

3 - Where interior elevations show an offset sink basin, provide drawers. Where interior elevations show a centered sink basin, omit drawers and provide a cabinet door.

ASI #28

FULLY ACCESSIBLE BATHROOM:

LAVATORY TO MEET ANSI ACCESSIBLE REQUIREMENTS W/ MIN. 27" KNEE CLEARANCE AND 9" TOE CLEARANCE. T.O. SINK TO BE SET AT MAX 34" A.F.F. FAUCET TO BE PER ANSI REQUIREMENTS. BOTTOM OF MIRROR TO BE SET AT MAX 40" A.F.F. MEDICINE CABINETS TO BE SET AT MAX 42" A.F.F.

BATHTUB TO HAVE REMOVABLE SEAT AND HAND HELD SHOWER SPRAY PER ANSI STANDARDS. CONTROLS TO BE ANSI COMPLIANT AND SET BENEATH GRAB BAR TOWARDS FRONT OF TUB.

BATHROOM GRAB BARS PER ANSI. CENTER LINE OF ALL GRAB BARS TO BE SET AT 36" A.F.F. W/ SECOND BATH TUB REAR GRAB BAR TO BE 9" ABOVE TUB.

W.C. GRAB BARS: REAR GRAB BAR TO BE MIN. 24" WIDE CENTERED ON TOILET, SIDE GRAB BAR MIN 42" SIDE SET 12" FROM REAR WALL.

BATHTUB GRAB BARS: REAR BARS TO BE 24" WIDE MIN. SET 12" FROM CONTROLS WALL, SIDE GRAB BARS TO BE 24" WIDE SET TOWARDS FRONT OF TUB.

NOTE: WATER SUPPLY AND DRAIN PIPES UNDER LAVATORIES AND SINKS SHALL BE INSULATED OR OTHERWISE CONFIGURED TO PROTECT AGAINST CONTACT. THERE SHALL BE NO SHARP OR ABRASIVE SURFACES UNDER LAVATORIES AND SINKS.

FULLY ACCESSIBLE KITCHEN:

SINK TO MEET ANSI ACCESSIBLE REQUIREMENTS W/ MIN. 30" WIDE OPEN SPACE UNDER SINK W/ MIN. 27" KNEE CLEARANCE AND 9" TOE CLEARANCE. PROVIDE ANSI COMPLIANT FAUCET AND WRAP PIPES PER ANSI REQUIREMENTS.

PROVIDE ANSI COMPLIANT RANGE AND ACCESSIBLE CONTROLS FOR ALL OTHER PROVIDED APPLIANCES.

PROVIDE ACCESSIBLE KITCHEN BASE CABINETS W/ MAX 34" COUNTER TOPS A.F.F.

PROVIDE MIN. 30" WIDE WORK SURFACE W/OPEN SPACE UNDERNEATH AS REQUIRED BY ANSI.

WATER SUPPLY AND DRAIN PIPES UNDER LAVATORIES AND SINKS SHALL BE INSULATED OR OTHERWISE CONFIGURED TO PROTECT AGAINST CONTACT. THERE SHALL BE NO SHARP OR ABRASIVE SURFACES UNDER LAVATORIES AND SINKS.

STORAGE FACILITIES ARE DESIGNED TO ANSI SECTION 1002.14 STORAGE FACILITIES.

Description of RFI:	Ceiling Height in 2nd Floor Townhouse Bathroom	**Date Submitted:**	12/14/2006
		Reply Required:	12/15/2006
RFI Number:	18	**Area Involved:**	2nd Floor Townhouse Bathrooms
Cost Impact:	no		
Schedule Impact:	no	**Urgent Yes/No:**	no
Subcontractor RFI Number:		**Subcontractor RFI Date:**	
Specification Section:	09100, 09254	**Drawing Number:**	A12

Subject: Ron and Todd,

This RFI is simply to confirm the conversation between Dave Rose and Ron Faleide at approximately 3:00 p.m. on 12/14/2006. In this conversation it was decided that in order to accommodate the fire sprinkler line running across the 2nd floor bathroom in the town house unit, the ceiling would be dropped from the entrance of the bathroom to the line where the bathtub begins. At this point, where the bath tub begins, the dropped ceiling will terminate and the ceiling height above the bath tub will be full height. The dropped portion of this ceiling will drop no more than 6 inches. Please confirm the above statements.

Thank you.

Dave Rose

RE: Sunshine Peak Apt. - 1 bedroom fully accessible units

Chris,

The 1 bedroom fully accessible unit 'bar height' is to be 34 inches for wheel chair accessibility. See attached sheet for plan and section. Call if you have question.

Thanks,

Todd

The following is a response to your RFI 08:

1 - No blind cabinets.

A.S.I #24

2 - The top of wall cabinets must be finished at the townhouse. A natural maple finish will be adequate.

3 - Where interior elevations show an offset sink basin, provide drawers. Where interior elevations show a centered sink basin, omit drawers and provide a cabinet door.

FULLY ACCESSIBLE BATHROOM:

LAVATORY TO MEET ANSI ACCESSIBLE REQUIREMENTS W/ MIN. 27" KNEE CLEARANCE AND 9" TOE CLEARANCE. T.O. SINK TO BE SET AT MAX 34" A.F.F. FAUCET TO BE PER ANSI REQUIREMENTS. BOTTOM OF MIRROR TO BE SET AT MAX 40" A.F.F. MEDICINE CABINETS TO BE SET AT MAX 42" A.F.F.

BATHTUB TO HAVE REMOVABLE SEAT AND HAND HELD SHOWER SPRAY PER ANSI STANDARDS. CONTROLS TO BE ANSI COMPLIANT AND SET BENEATH GRAB BAR TOWARDS FRONT OF TUB.

BATHROOM GRAB BARS PER ANSI. CENTER LINE OF ALL GRAB BARS TO BE SET AT 36" A.F.F. W/ SECOND BATH TUB REAR GRAB BAR TO BE 9" ABOVE TUB.

W.C. GRAB BARS: REAR GRAB BAR TO BE MIN. 24" WIDE CENTERED ON TOILET, SIDE GRAB BAR MIN 42" SIDE SET 12" FROM REAR WALL.

BATHTUB GRAB BARS: REAR BARS TO BE 24" WIDE MIN. SET 12" FROM CONTROLS WALL, SIDE GRAB BARS TO BE 24" WIDE SET TOWARDS FRONT OF TUB.

NOTE: WATER SUPPLY AND DRAIN PIPES UNDER LAVATORIES AND SINKS SHALL BE INSULATED OR OTHERWISE CONFIGURED TO PROTECT AGAINST CONTACT. THERE SHALL BE NO SHARP OR ABRASIVE SURFACES UNDER LAVATORIES AND SINKS.

FULLY ACCESSIBLE KITCHEN:

SINK TO MEET ANSI ACCESSIBLE REQUIREMENTS W/ MIN. 30" WIDE OPEN SPACE UNDER SINK W/ MIN. 27" KNEE CLEARANCE AND 9" TOE CLEARANCE. PROVIDE ANSI COMPLIANT FAUCET AND WRAP PIPES PER ANSI REQUIREMENTS.

PROVIDE ANSI COMPLIANT RANGE AND ACCESSIBLE CONTROLS FOR ALL OTHER PROVIDED APPLIANCES.

PROVIDE ACCESSIBLE KITCHEN BASE CABINETS W/ MAX 34" COUNTER TOPS A.F.F.

PROVIDE MIN. 30" WIDE WORK SURFACE W/OPEN SPACE UNDERNEATH AS REQUIRED BY ANSI.

WATER SUPPLY AND DRAIN PIPES UNDER LAVATORIES AND SINKS SHALL BE INSULATED OR OTHERWISE CONFIGURED TO PROTECT AGAINST CONTACT. THERE SHALL BE NO SHARP OR ABRASIVE SURFACES UNDER LAVATORIES AND SINKS.

STORAGE FACILITIES ARE DESIGNED TO ANSI SECTION 1002.14 STORAGE FACILITIES.

Description of RFI:	Ceiling Height in 2nd Floor Townhouse Bathroom	Date Submitted:	12/14/2006
		Reply Required:	12/15/2006
RFI Number:	18	Area Involved:	2nd Floor Townhouse Bathrooms
Cost Impact:	no		
Schedule Impact:	no	Urgent Yes/No:	no
Subcontractor RFI Number:		Subcontractor RFI Date:	
Specification Section:	06100, 09254	Drawing Number:	A12

Subject: Ron and Todd,

This RFI is simply to confirm the conversation between Dave Rose and Ron Faisklo at approximately 3:00 p.m. on 12/14/2006. In this conversation it was decided that in order to accommodate the fire sprinkler line running across the 2nd floor bathroom in the town house unit, the ceiling would be dropped from the entrance of the bathroom to the line where the bathtub begins. At this point, where the bath tub begins, the dropped ceiling will terminate and the ceiling height above the bath tub will be full height. The dropped portion of this ceiling will drop no more than 8 inches. Please confirm the above statements.

Thank you.

Dave Rose

Cost Impact:	YES	**Urgent Yes/No:**	no
Schedule Impact:	NO	**Subcontractor RFI Date:**	10/19/2006
Subcontractor RFI Number:		**Drawing Number:**	multiple
Specification Section:	12300		

Subject: Todd,

I just received this from Armstrong Cabinets regarding the comments on the cabinet submittal. Please Advise.

Dave,
I received the marked up submittals for Sunshine Peak and am responding to some of the architects notes.

1) he has indicated that he wants blind cabinets in several of the units. There were no blinds indicated on the original drawings. We can provide them for extra cost but I do not recommend them unless you have at least a 48" wide, particularly in the base because access into anything smaller is prohibitive. (the opening on a 36" is 7 1/2"). We don't have enough room without major changes.
2) There is a note on the SBR Th that the top of the wall cabinets need to be finished. The top and bottom of all wall cabinets are finished in a natural maple color. I don't know of any way to finish the tops w/o putting a piece of plywood on top and then trimming the edge of the plywood w/ a piece of moulding which would work but I would question the appearance. Again this would be extra.
3) ther are notes on several of the vanities that he would like three drawers on one side or the other at the top of the vanity. This can be done at no extra charge but the bowls will have to be offset for the top drawer to function.

Please advise on how you want to proceed.

Dave Rose

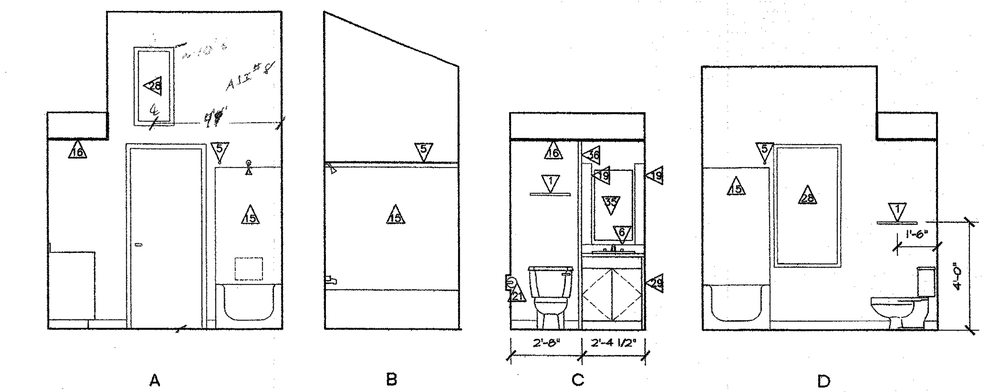
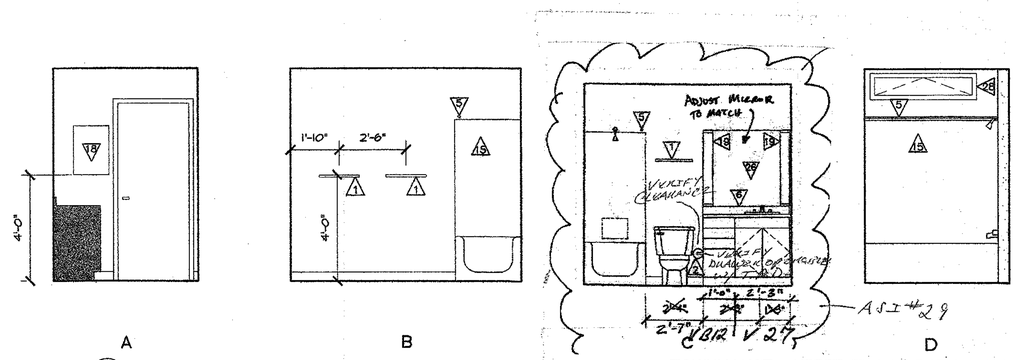
10	42" GRAB BAR; PROVIDE BLOCKING
11	24" GRAB BAR; PROVIDE BLOCKING
12	12" GRAB BAR; PROVIDE BLOCKING
13	CONTROLS SHALL BE LOCATED BETWEEN CENTER LINE OF THE TUB & THE OPEN SIDE OF TUB
14	REMOVABLE IN-TUB SEAT
15	3 PIECE SHOWER SURROUND
16	SOFFIT
17	BASE CABINET FACE, BASE, SIDES, AND SHELF TO BE REMOVABLE FOR WHEEL CHAIR ACCESS TO SINK; COUNTER TOP SUPPORTED BY METAL SUPPORT ARMS EACH SIDE OF VANITY; SUPPORT ARMS ARE NOT TO IMPEDE KNEE & TOE CLEARANCE; SUPPORT ARMS ARE TO BE SECURED TO WALL; PAINTED FINISH SEE ARCHITECT FOR COLOR; F.F. TO EXTEND TO WALL UNDERNEATH COUNTER TOP
18	RECESS MOUNTED 16" X 22" MEDICINE CABINET W/ MIRROR FRONT
19	LIGHT FIXTURE EACH SIDE OF MIRROR; SEE ELECTRICAL DWG.
20	BLOCKING FOR FUTURE GRAB BAR INSTALLATION
21	SEMI RECESSED TOILET PAPER DISPENSER
22	REFRIGERATOR; SIDE BY SIDE AT ALL FULLY ACCESSIBLE UNITS & COMMUNITY BUILDING
23	RECIRCULATING VENT HOOD
24	ELECTRIC RANGE; CONTROLS TO BE LOCATED AT FRONT IN ALL USABLE AND FULLY ACCESSIBLE UNITS AS WELL AS COM. BLDG.; FULLY ACCESSIBLE UNITS AND COM. BLDG. TO HAVE DROP IN RANGE FLUSH W/ 34" COUNTERTOP
25	DISHWASHER; FULLY ACCESSIBLE AND COM. BLDG. TO HAVE DISH WASHER TO FIT UNDER 34" COUNTERTOP
26	3'-0" X 3'-0" FRAMELESS MIRROR
27	VALANCE TO MATCH CASEWORK
28	WINDOW; SEE PLAN
29	CASEWORK FILLER STRIP
30	SOAP DISPENSER (ADA)
31	SANITARY NAPKIN RECEPTACLE
32	SEMI RECESSED PAPER TOWEL DISPENSER/ TRASH RECEPTACLE IN 2X6 WALL
33	PLAM SKIRT AROUND COUNTER TOP
34	SS TOWEL HOOK
35	RECESS MOUNTED 17" X 31" MEDICINE CABINET W/ MIRROR FRONT; BRADLEY MODEL 175 OR SIMILAR
36	1X2 SOLID WOOD TRIM TO MATCH BASE CABINETS; PROVIDE AS FILLER STRIPS ON TOP & SIDE AT BATHTUB; PROVIDE BLOCKING
37	PLAM CAP ON TOP OF PONY WALL 40" A.F.F.
38	SIT UP BAR 42" A.F.F.; SEE DETAIL
39	REMOVABLE BASE CABINET TO PROVIDE 30" CLEAR MINIMUM AT SINK AND WORK SPACE; F.F. FLOOR TO EXTEND TO WALL UNDERNEATH BASE CABINET.
40	PROVIDE CASEWORK FINISH ON TOPS OF UPPER CABINETS (TYP. AT TOWNHOUSE)
41	PROVIDE 24" DEEP UPPER CABINET ABOVE REFRIGERATOR
42	SUPPORT BRACKET TO MATCH CASEWORK



1 TOWNHOUSE - MAIN FLOOR BATHROOM
SCALE: 3/8" = 1'-0"



2 TOWNHOUSE - UPPER FLOOR BATHROOM
SCALE: 3/8" = 1'-0"

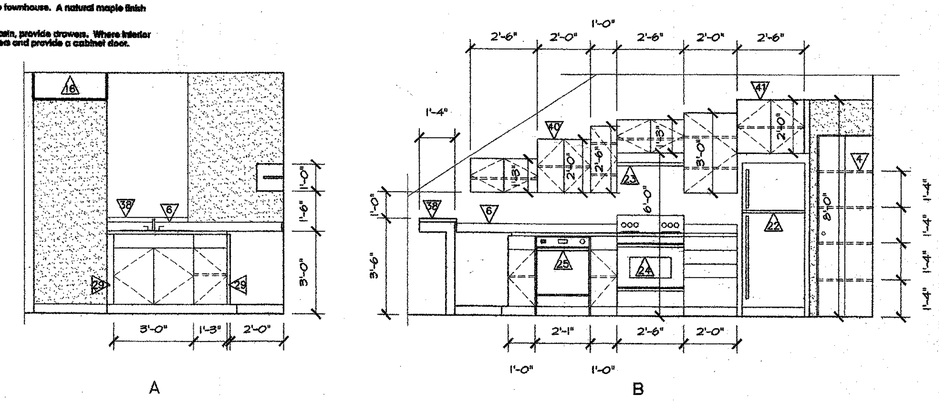
The following is a response to your RFI 08:

1 - No blind cabinets.

2 - The top of wall cabinets must be finished at the townhouse. A natural maple finish will be adequate.

3 - Where interior elevations show an offset sink basin, provide drawers. Where interior elevations show a centered sink basin, omit drawers and provide a cabinet door.

ASI #28



3 TOWNHOUSE - KITCHEN
SCALE: 3/8" = 1'-0"

FULLY ACCESSIBLE BATHROOM:

LAVATORY TO MEET ANSI ACCESSIBLE REQUIREMENTS W/ MIN. 27" KNEE CLEARANCE AND 9" TOE CLEARANCE. T.O. SINK TO BE SET AT MAX 34" A.F.F. FAUCET TO BE PER ANSI REQUIREMENTS. BOTTOM OF MIRROR TO BE SET AT MAX 40" A.F.F. MEDICINE CABINETS TO BE SET AT MAX 42" A.F.F.

BATHTUB TO HAVE REMOVABLE SEAT AND HAND HELD SHOWER SPRAY PER ANSI STANDARDS. CONTROLS TO BE ANSI COMPLIANT AND SET BENEATH GRAB BAR TOWARDS FRONT OF TUB.

BATHROOM GRAB BARS PER ANSI. CENTER LINE OF ALL GRAB BARS TO BE SET AT 36" A.F.F. W/ SECOND BATH TUB REAR GRAB BAR TO BE 9" ABOVE TUB.

W.C. GRAB BARS: REAR GRAB BAR TO BE MIN. 24" WIDE CENTERED ON TOILET, SIDE GRAB BAR MIN 42" SIDE SET 12" FROM REAR WALL.

BATHTUB GRAB BARS: REAR BARS TO BE 24" WIDE MIN. SET 12" FROM CONTROLS WALL, SIDE GRAB BARS TO BE 24" WIDE SET TOWARDS FRONT OF TUB.

NOTE: WATER SUPPLY AND DRAIN PIPES UNDER LAVATORIES AND SINKS SHALL BE INSULATED OR OTHERWISE CONFIGURED TO PROTECT AGAINST CONTACT. THERE SHALL BE NO SHARP OR ABRASIVE SURFACES UNDER LAVATORIES AND SINKS.

FULLY ACCESSIBLE KITCHEN:

SINK TO MEET ANSI ACCESSIBLE REQUIREMENTS W/ MIN. 30" WIDE OPEN SPACE UNDER SINK W/ MIN. 27" KNEE CLEARANCE AND 9" TOE CLEARANCE. PROVIDE ANSI COMPLIANT FAUCET AND WRAP PIPES PER ANSI REQUIREMENTS.

PROVIDE ANSI COMPLIANT RANGE AND ACCESSIBLE CONTROLS FOR ALL OTHER PROVIDED APPLIANCES.

PROVIDE ACCESSIBLE KITCHEN BASE CABINETS W/ MAX 34" COUNTER TOPS A.F.F.

PROVIDE MIN. 30" WIDE WORK SURFACE W/OPEN SPACE UNDERNEATH AS REQUIRED BY ANSI.

WATER SUPPLY AND DRAIN PIPES UNDER LAVATORIES AND SINKS SHALL BE INSULATED OR OTHERWISE CONFIGURED TO PROTECT AGAINST CONTACT. THERE SHALL BE NO SHARP OR ABRASIVE SURFACES UNDER LAVATORIES AND SINKS.

STORAGE FACILITIES ARE DESIGNED TO ANSI SECTION 1002.14 STORAGE FACILITIES.

Re: Schauer Construction RFI 17

Dear Mike,

The following information is additional information and clarification to the drawings dated May 05, 2006 and response to your RFI 17:

1 – Sheet A11 of 37 – M1 Main Floor Plan: The kitchen plan in the two bedroom refers to Sheet A11.1 Elevation 5A.

2 – Sheet A11.1 of 37 – Interior Elevation 5A: Provide door to pantry as shown on elevation. Contractor's option to provide hollow core door or casework door.

3 – Sheet A17 of 37 – Fully Accessible 2 Bedroom Unit: The kitchen plan in the two bedroom accessible unit refers to Sheet A17.1 Elevation 5A.

4 – Sheet A17.1 of 37 – Interior Elevation 5A: Provide door to pantry as shown on elevation. Contractor's option to provide hollow core door or casework door.

5 – Sheet C801 of 37 – Managers Unit Plan: The kitchen plan in the manager's unit refers to Sheet A11.1 Elevation 5A. The manager's unit kitchen elevation is similar to the one shown on Sheet A11.1 elevation 5A.

Sincerely,

Todd Townsend

Re: Interior stair handrail at the townhouse.

Dear Mike,

The following information is clarification to the drawings dated May 05, 2006 per a phone call with Dave Ilase.

The interior handrail at the townhome stair shall be made of wood and be painted. Only one handrail is necessary and it shall be located on the guardrail side only. The handrail must extend from the top riser to the bottom riser.

Sincerely,

Todd Townsend

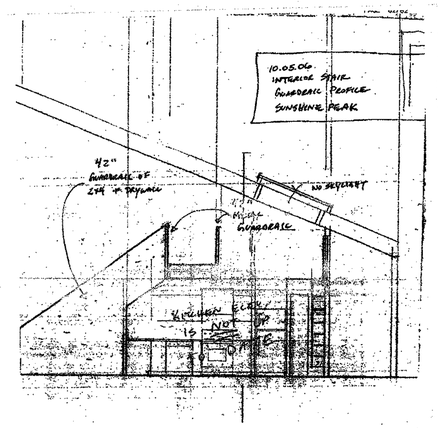
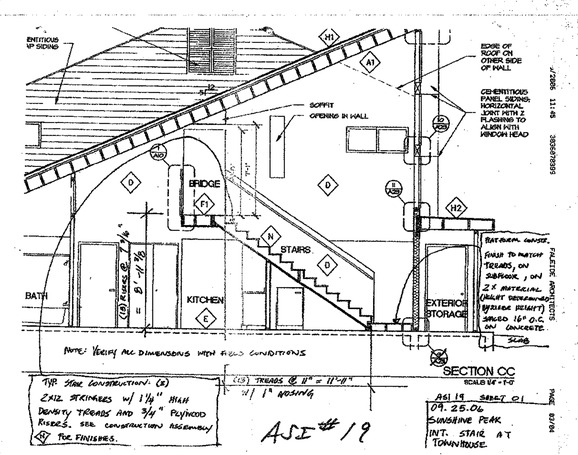
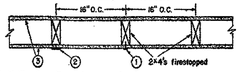
1701 Wynkoop Suite 255 Denver, Colorado 80202 — voice: 303.573.0576 fax: 303.457.0399 e-mail: ddeide@aol.com [redacted]



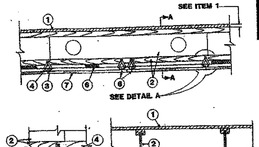


Design No. U305
Bearing Wall Rating — 1 HR.
Finish Rating — See Items 3 and 6.
STC Rating - 56 (See Item 9)



1. Nailheads — Exposed or covered with joint compound.
2. Joints — Exposed or covered with fiber tape and joint compound, except where required for specific edge configuration. For tapered, rounded-edge wallboard, joints covered with joint compound or fiber tape and joint compound. As an alternate, nom 3/32 in. thick gypsum veneer plaster may be applied to the entire surface of Classified veneer baseboard. Joints reinforced.
3. Gypsum Board* — 5/8 in. thick wallboard paper or vinyl surfaced, with beveled, square, or tapered edges, applied either horizontally or vertically. Wallboard nailed 7 in. OC with 6d cement coated nails 1-7/8 in. long, 0.0915 in. shank diam and 1/4 in. diam heads. When used in widths of other than 48 in., wallboard is to be installed horizontally. For an alternate method of attachment of gypsum boards, refer to Item 6, Wall and Partition Facings and Accessories*, or Item 7, Steel Framing Members*.

Design No. L530
Unrestrained Assembly Rating — 1 Hr
Finish Rating — 29 Min



1. Floor Systems — The finish flooring may consist of any one of the following systems:

System No. 1
Finish Flooring 4 ft by 8 ft by 3/4 in. thick wood structural panels, sub grade "Underlayment" or "Single-Floor". Panels installed perpendicular to joists with and joints staggered 4 ft. Plywood secured to joists with construction adhesive and No. 6d cement coated shakers. Adhesive applied as 3/8 in. diam bead to top flange of joists and grooved edges of plywood. Nails spaced 12 in. OC along each joists. As an option, lightweight insulating concrete with Perlite* or Vermiculite Aggregate* or gypsum concrete may be placed on the flooring. The max thickness shall be determined by job site conditions. A thin plastic or paper vapor retarder may be placed on plywood prior to pouring the concrete.
See Perlite Aggregate (CRPX) and Vermiculite Aggregate (QZZZ) categories for nominal of manufacturers.
2. Structural Wood Members* — Min 9-1/2 in. deep "I" shaped wood joists spaced a max 24 in. OC. Min joist bearing on bearing plates 2 in. Joists secured to bearing plates with two No. 8d nails at each end. Cellulose holes may be cut in the web of the joists in accordance with the manufacturer's published installation instructions.
TRUS JOIST
WEYERHAEUSER BUSINESS — Types TJI/Pro 350, TJI/Pro 500; TJI/Pro 550, TJI/1560, TJI/1560, TJI/1560, TJI/1560, TJI/Pro 560, TJI/Pro 560; TJI/1560, TJI/1560, TJI/1560, TJI/1560, TJI/1560
3. Furring Channels — 7/8 in deep, formed of min 0.019 in. thick (26 gauge) galv steel installed perpendicular to joists. Furring channels spaced 1-1/2 in. from and on each side of wallboard end joints and 16 in. OC away from end joints. Channels secured to joists with support clips (Item 4) at each joist location. At channel splices, adjacent joists overlapped 6 in. and tied with double strand of No. 18 SWG galv steel wire at each end of overlap.
Support Clip — Steel Framing Members* — One support clip to be used to support furring channels at the intersection with each joist. Support clips nailed to side of joist bottom flange with one 1-1/2 in. long No. 11 gauge (0.125 in. diam shank) nail.
SIMPSON STRONG-TIE CO INC—Type CSC
Stabilizer Strap — (Not shown) — 3/4 by 6 by min 0.023 in. thick (24 gauge) galv steel strap used to prevent rotation of the support clips (Item 4) at wallboard end joints and along walls. At wallboard end joints (2 in. OC spacing of furring channels), stabilizer straps span between the channels and are screw-attached to the furring channels adjacent to each support clip location using No. 8 self-tapping steel screws. On furring channels nearest to and parallel with wall, one end of the stabilizer strap is screw-attached to the furring channel, adjacent to each support clip location, using No. 8 self-tapping steel screws. The free end of the stabilizer strap is twisted 90 degree, bent upward, and screw- or nail-attached to the side of the structural wood member bottom flange on the side of the support clip nearest the wall.
4. Batts and Blankets* — 1-1/4 in. thick, 48 in. long with width of batt equal to on center spacing of structural wood members (nom 24 in.). Batts inserted between furring channels and bottom flange of joist with long dimension perpendicular to furring channels and with butted end joints centered over furring channels.
THERMAFIBER I. L C.—Type FR
5. Gypsum Board* — 1/2 or 5/8 in. thick, 4 ft wide. Sheets of wallboard installed with long dimension perpendicular to furring channels and fastened to channels with 1 in. long wallboard screws located 3/4 in. and 6 in. from wallboard side joints and 12 in. OC in the field. At lateral end joints, two furring channels are used which extend a min of 4 in. beyond each end of joint.

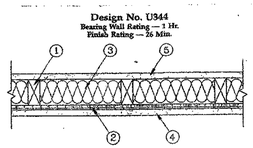
5A. Fiber, Sprayed* — As an alternate to Batts and Blankets (Item 5) — Spray applied cellulose insulation material. The fiber is applied with water to completely fill the enclosed cavity in accordance with the application instructions supplied with the product. Nominal dry density of 3.0 lb/ft³.
U S GREENFIBER I. L C—Cocoon stabilized cellulose insulation.
6. Wall and Partition Facings and Accessories* — (Optional, Not Shown) For use as an alternate to 6d nails described in Item 3) — Wallboard fastened with 2 in. long 16 gauge staples spaced max 3 in. OC along vertical joints and 6 in. OC in the field. When staples are used, wallboard joints covered with paper tape and joint compound. Staples covered with joint compound. Finish rating is 18 min.
PASLODE
ILLINOIS TOOL WORKS CO
7. Steel Framing Members (Optional, Not Shown)* — Furring channels and Steel Framing Members as described below:
a. Furring Channels — Formed of No. 25 MSG galv steel. 2-3/8 in. wide by 7/8 in. deep, spaced 24 in. OC perpendicular to studs. Channels secured to studs as described in Item 8. Wallboard attached to furring channels as described in Item 3.
b. Steel Framing Members* — used to attach furring channels (Item 7a) to studs. Clips spaced 48 in. OC, and secured to studs with No. 8 x 2-1/2 in. coarse drywall screw through the center grommet. Furring channels are friction fitted into clips.
PAC INTERNATIONAL — Type RSIC-1.
8. Caulking and Sealants— (not shown, optional) A bead of acoustical sealant applied around the partition perimeter for sound control.
9. STC Rating — The STC Rating of the wall assembly is 56 when it is constructed as described by Items 1 through 7, except:
A. Item 1, above - Nailheads Shall be covered with joint compound.
B. Item 2, above - Joints As described, shall be covered with fiber tape and joint compound.
C. Item 5, above - Batts and Blankets* The cavities formed by the studs shall be friction fit with 3-19 unfaced fiberglass insulation batts measuring 6-1/4 in. thick and 15-1/4 in. wide.
D. Item 7, above - Steel Framing Members* Shall be used to attach wallboard to studs on either side of the acoustical source or resilving side of the wall assembly.
E. Item 8, above - Caulking and Sealants (not shown) A bead of acoustical sealant shall be applied around the partition perimeter for sound control.
F. Steel Corner Fasteners (Item 4). FiberSpeyard (Item 5A). Wall and Partition Facings and Accessories (Item 6) Not evaluated as alternatives for obtaining STC rating.
*Bearing the UL Classification Mark

6 UL LISTING - U305

Design No. U344
Bearing Wall Rating — 1 Hr.
Finish Rating — 26 Min.



1. Wood Studs — Nom 2 by 4 in. spaced 24 in. OC, laterally braced, and effectively fire stopped at top and bottom.
2. Wood Structural Panel Sheathing — Nom 15/32 in. thick, 4 ft wide APA Rated Sheathing 32/16, Exposure 1, plywood or oriented strand board (OSB) per PS1, PS2 or APA Standard PRP-108. Installed with long dimension of sheet (strength axis) or face grain of plywood, parallel with studs. Vertical joints centered on studs, and staggered one stud space from wallboard joints. Horizontal joints backed with nom 2 by 4 in. wood backing. Attached to studs on exterior side of wall with 6d cement coated steel box nails spaced 12 in. OC along interior studs and 6 in. OC at perimeter of panels.
3. Batts and Blankets* — 5-1/2 in. thick foil-faced glass fiber batts. Supplied in rolls 23 in. wide. Density to be nom 0.70 pcf. Placed in stud cavity and secured to studs with 5/8 in. long steel staples spaced nom 12 in. OC.
See Batts and Blankets* (BZJZ) category for names of Classified Companies.
3A. Fiber, Sprayed* — As an alternate to Batts and Blankets (Item 3) — Spray applied cellulose insulation material. The fiber is applied with water to completely fill the enclosed cavity in accordance with the application instructions supplied with the product. Nominal dry density of 3.0 lb/ft³.
U S GREENFIBER I. L C—Cocoon stabilized cellulose insulation.
4. Gypsum Board* — 5/8 in. thick, 4 ft wide, applied horizontally or vertically. Attached to studs through plywood sheathing with 8d cement coated nails 2-3/8 in. long, 0.113 in. shank diam, 9/32 in. diam head nails spaced 7 in. OC along studs and at perimeter of panels. When used in widths other than 48 in., wallboard is to be installed horizontally. Joints exposed or covered with tape and compound.

5 UL LISTING - U344

One-Hour Ceiling
(Based on GA File Nos. FC 5406 and RC 2601)

The ceiling membrane consists of two layers of 5/8" (15.9 mm) type X gypsum board directly applied to framing or furring. The base layer of gypsum board is applied at right angles to ceiling framing 24" (610 mm) o.c. and attached with 1" (25 mm) Type S or S-12 drywall screws (for steel framing) or 1-1/4" (32 mm) Type W or S drywall screws (for wood framing) spaced 24" (610 mm) o.c. The face layer of gypsum board is applied at right angles to the framing and attached with 1-5/8" (41 mm) Type S or S-12 drywall screws (for steel framing) or 1-7/8" (48 mm) Type W or S drywall screws (for wood framing) 12" (305 mm) o.c. at end joints and intermediate joists and 1-1/2" (38 mm) Type G drywall screws 12" (305 mm) o.c. placed 2" (50 mm) back on either side of end joints. Joints of the face layer are offset 24" (610 mm) from the joints in the base layer. Face layer joints and fasteners are finished to Level 1 as specified in GA-214, *Levels of Gypsum Board Finish*.

- **C** — PARTY WALLS: TWO PARALLEL STUD WALLS W/COMMON TOP PLATE (RE: STRUCTURAL). EACH WALL TO HAVE 5/8" TYPE X GWB ON INSIDE FACE (AT AIR GAP), R-13 HIGH DENSITY INSULATION, 5/8" TYPE X GWB ROOM SIDE FINISH. PROVIDE 2" CLEAR AIR GAP BETWEEN WALLS. (@ TUB SURROUND PROVIDE CEMENT BACKER BOARD IN ADDITION TO GWB) ASSEMBLY: 1 HR RATED (BASED ON UL-U305)
- **D** — INTERIOR WALLS: 1/2" GWB EACH SIDE OF WOOD STUDS 16" O.C., AT WET AREAS PROVIDE 1/2" MOISTURE RESISTANT GWB. PROVIDE CEMENT BACKER BOARD AT TUB SURROUND WALLS ASSEMBLY: NO RATING
- **E** — FLOORS AT GRADE: POST TENSION CONCRETE SLAB, RE: STRUCTURAL ASSEMBLY: NO RATING (NON COMBUSTIBLE)
- **F** — FLOOR/CEILING SYSTEM: FLOOR FINISH, ON SUBFLOOR, ON FLOOR JOISTS, WITH 7/8" DEEP FURRING CHANNELS, WITH 1-1/4" BATT INSULATION BTWN FURRING CHANNELS AND BOTTOM OF JOISTS, WITH 5/8" TYPE X GWB CEILING FINISH. ASSEMBLY: UL-L530 1 HR.
- **F1** — FLOOR/CEILING SYSTEM: FLOOR FINISH, ON SUBFLOOR, ON FLOOR JOISTS, WITH 5/8" GWB CEILING FINISH
- **G** — BALCONY/CEILING SYSTEM: CONC. (RE: STRUCT.) ON A WATER PROOF MEMBRANE, ON SUBFLOOR, ON FLOOR JOISTS, WITH 7/8" DEEP FURRING CHANNELS, WITH 1-1/4" BATT INSULATION BTWN FURRING CHANNELS AND BOTTOM OF JOISTS, WITH 5/8" EXTERIOR TYPE X GWB CEILING FINISH. ASSEMBLY: UL-L530 1 HR
- **H** — ROOF CEILING SYSTEM: ASPHALT SHINGLES ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER PRE-ENGINEERED ROOF TRUSSES W/ R-38 FOIL FACED BATT INSULATION, WITH 5/8" GWB ACROSS BOTTOM OF TRUSSES FOR INTERIOR FINISH. ASSEMBLY: NO RATING
- **H1** — ROOF CEILING SYSTEM: ASPHALT SHINGLES ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER 2X2 OVER JOISTS (RE: STRUCT.) W/ R-38 FOIL FACED BATT INSULATION, VAPOR BARRIER WITH (2) LAYERS 5/8" TYPE X GWB ACROSS BOTTOM OF JOISTS FOR INTERIOR FINISH. ASSEMBLY: 1 HR. RATED MEMBRANE
- **H2** — ROOF CEILING SYSTEM: ROLLED ASPHALT ROOFING, ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER JOISTS WITH (2) LAYERS 5/8" EXTERIOR TYPE X GWB. ASSEMBLY: 1 HR. RATED SOFFIT MEMBRANE
- **J** — ROOF CEILING SYSTEM: CORRUGATED GALVANIZED METAL ROOFING ON (2) LAYERS 15# FELT, (ICE & WATER SHIELD WHERE SHOWN) ON SHEATHING (RE: STRUCT.) OVER ROOF JOISTS OR PRE-ENGINEERED TRUSSES W/ R-38 FOIL FACED BATT INSULATION, WITH 5/8" GWB ACROSS BOTTOM OF JOISTS FOR INTERIOR FINISH. ASSEMBLY: NO RATING
- **K** — NOT USED
- **L** — CONCRETE PATIOS: RE: STRUCTURAL
- **M** — RAILINGS: METAL GUARDRAIL WITH METAL BALUSTERS AT 4" O.C.. SECURE TO SIDE OF STRINGER AND/OR RIM JOIST. HANDRAIL TO BE PROVIDED AT EXTERIOR STAIRS.
- **N** — INTERIOR STAIRS: CARPET (NO PAD) OVER PREFAB WOOD STRINGERS AND TREADS; PROVIDE (2) LAYERS 5/8" TYPE X GYP. BD. AT UNDERSIDE OF STAIR FOR 1 HR. RATING.

GENERAL NOTES:

1. DO NOT SCALE THE DRAWINGS! ALL NOTES AND NOTED DIMENSIONS TAKE PRECEDENCE OVER VISUAL REPRESENTATIONS OR ASSUMED INFORMATION.
2. REFER TO STRUCTURAL FLOOR FRAMING PLANS FOR ALL SHEAR WALL LOCATIONS AND ASSEMBLIES.
3. REFER TO STRUCTURAL FLOOR FRAMING PLANS FOR ALL BEARING WALL LOCATIONS.
4. REFER TO STRUCTURAL DRAWINGS FOR STUD AND JOIST SIZE AND SPACING, SHEATHING SIZE AND THICKNESS, POST SIZES AND CONCRETE THICKNESS.
5. ENSURE THAT DRAINAGE IS AWAY FROM BUILDING AT A SLOPE OF 1/4" PER FOOT MINIMUM. TO ALLEVIATE ANY TRAPPED WATER BETWEEN BUILDING AND SIDEWALK USE 4" DIA. CORRUGATED PLASTIC PIPE TO ROUTE WATER UNDER SIDEWALKS TO AN OPEN, DRAINABLE AREA. TYPICAL AT ALL LOCATIONS.
6. ENSURE ATTIC VENTING THROUGH ROOF, HALL AND SOFFIT IS PER CODE.
7. CONSTRUCTION LOADS SHALL NOT BE GREATER THAN DESIGN LOADS OR OTHERWISE OVERLOAD THE STRUCTURE.
8. WALLS ARE DIMENSIONED FROM FRAMING TO FRAMING UNLESS NOTED OTHERWISE.
9. DOOR FRAMES NOT DIMENSIONED ARE TO BE PLACED 4" FROM ADJACENT WALLS OR CENTERED ALONG WALL LENGTH
10. **PROVIDE FURRING AND GYP. BD. SOFFITS AS REQ'D TO COVER DUCTWORK, PLUMBING OR ELECTRICAL SYSTEMS.**
11. BUILDER SHALL VERIFY ALL MATERIALS, DIMENSIONS AND CONDITIONS SHOWN ON DRAWINGS OR NOTED IN SPECS. ANY VARIANCES ENCOUNTERED ON THE SITE WILL BE REPORTED TO THE ARCHITECT BEFORE COMMENCEMENT OF AFFECTED WORK.
12. CAULK ALL JOINTS AROUND WALL PENETRATIONS TO PROVIDE A WATER AND AIR TIGHT SEAL. CAULK ALL JOINTS BETWEEN EXTERIOR SIDING & TRIM, BETWEEN WINDOWS & DOORS AND TRIM & FLASHING, BETWEEN EXT. TRIM & SOFFIT AND BETWEEN EXT. SIDING AND TRIM & FLASHING. PROVIDE WEEPS PER MANUFACTURER'S RECOMMENDATIONS.
13. WINDOWS JAMBS & HEAD SHALL BE WRAPPED IN GYP. BD.AND HAVE A 1x6 PAINT GRADE FIR SILL W/ 1X2 ND SKIRT, CAULK ALL JOINTS BETWEEN WINDOW, GYP. BD. & ND. TRIM.
14. PROVIDE CONCRETE SPLASH BLOCKS AT ALL DOWNSPOUT LOCATIONS

A — EXTERIOR WALLS:
CEMENTIOUS LAP SIDING, ON TWO LAYERS BUILDING PAPER, ON SHEATHING (RE: STRUCTURAL), OVER WOOD STUDS W/ R14 BATT INSULATION, VAPOR BARRIER AND 1/2" GWB INTERIOR FINISH.
ASSEMBLY: NOT RATED

A1 — EXTERIOR WALLS:
CORRUGATED GALVANIZED METAL SIDING OR ASPHALT SHINGLES (RE: ELEV.)ON TWO LAYERS BUILDING PAPER ON SHEATHING (RE: STRUCTURAL) OVER WOOD STUDS W/ R14 BATT INSULATION, VAPOR BARRIER AND 1/2" GWB INTERIOR FINISH.
ASSEMBLY: NO RATING

A2 — EXTERIOR WALLS:
CEMENTIOUS-PANEL ON TWO LAYERS BUILDING PAPER ON SHEATHING (RE: STRUCTURAL) OVER WOOD STUDS W/ R14 BATT INSULATION, VAPOR BARRIER AND 1/2" GWB INTERIOR FINISH.
ASSEMBLY: NO RATING

B — EXTERIOR WALLS:
CEMENTIOUS LAP SIDING OR PANEL (RE: ELEV.), ON TWO LAYERS BUILDING PAPER, ON 5/8" EXTERIOR TYPE X GWB, ON SHEATHING (RE: STRUCT), OVER WOOD STUDS W/ R14 BATT INSULATION, VAPOR BARRIER AND 5/8" TYPE X GWB INTERIOR FINISH.
ASSEMBLY: UL-U344 1 HR.

C — PARTY WALLS:
TWO PARALLEL STUD WALLS W/COMMON TOP PLATE (RE: STRUCTURAL). EACH WALL TO HAVE 5/8" TYPE X GWB ON INSIDE FACE (AT AIR GAP), R-13 HIGH DENSITY INSULATION, 5/8" TYPE X GWB ROOM SIDE FINISH. PROVIDE 2" CLEAR AIR GAP BETWEEN WALLS. (@ TUB SURROUND PROVIDE CEMENT BACKER BOARD IN ADDITION TO GWB.)
ASSEMBLY: 1 HR RATED (BASED ON UL-U305)

D — INTERIOR WALLS:
1/2" GWB EACH SIDE OF WOOD STUDS 16" O.C., AT WET AREAS PROVIDE 1/2" MOISTURE RESISTANT GWB. PROVIDE CEMENT BACKER BOARD AT TUB SURROUND WALLS
ASSEMBLY: NO RATING

E — FLOORS AT GRADE:
POST TENSION CONCRETE SLAB, RE: STRUCTURAL
ASSEMBLY: NO RATING (NON COMBUSTIBLE)

F — FLOOR/CEILING SYSTEM:
FLOOR FINISH, ON SUBFLOOR, ON FLOOR JOISTS, WITH 7/8" DEEP FURRING CHANNELS, WITH 1-1/4" BATT INSULATION BTWN FURRING CHANNELS AND BOTTOM OF JOISTS, WITH 5/8" TYPE X GWB CEILING FINISH.
ASSEMBLY: UL-L530 1 HR

F1 — FLOOR/CEILING SYSTEM:
FLOOR FINISH, ON SUBFLOOR, ON FLOOR JOISTS, WITH 5/8" GWB CEILING FINISH

G — BALCONY/CEILING SYSTEM:
CONC. (RE: STRUCT.) ON A WATER PROOF MEMBRANE, ON SUBFLOOR, ON FLOOR JOISTS, WITH 7/8" DEEP FURRING CHANNELS, WITH 1-1/4" BATT INSULATION BTWN FURRING CHANNELS AND BOTTOM OF JOISTS, WITH 5/8" EXTERIOR TYPE X GWB CEILING FINISH.
ASSEMBLY: UL-L530 1 HR

H — ROOF CEILING SYSTEM:
ASPHALT SHINGLES ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER PRE-ENGINEERED ROOF TRUSSES W/ R-38 FOIL FACED BATT INSULATION, WITH 5/8" GWB ACROSS BOTTOM OF TRUSSES FOR INTERIOR FINISH.
ASSEMBLY: NO RATING

H1 — ROOF CEILING SYSTEM:
ASPHALT SHINGLES ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER 2X2 OVER JOISTS (RE: STRUCT.) W/ R-38 FOIL FACED BATT INSULATION, VAPOR BARRIER WITH (2) LAYERS 5/8" TYPE X GWB ACROSS BOTTOM OF JOISTS FOR INTERIOR FINISH.
ASSEMBLY: 1 HR. RATED MEMBRANE

H2 — ROOF CEILING SYSTEM:
ROLLED ASPHALT ROOFING, ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER JOISTS WITH (2) LAYERS 5/8" EXTERIOR TYPE X GWB.
ASSEMBLY: 1 HR. RATED SOFFIT MEMBRANE

J — ROOF CEILING SYSTEM:
CORRUGATED GALVANIZED METAL ROOFING ON (2) LAYERS 15# FELT, (ICE & WATER SHIELD WHERE SHOWN) ON SHEATHING (RE: STRUCT.) OVER ROOF JOISTS OR PRE-ENGINEERED TRUSSES W/ R-38 FOIL FACED BATT INSULATION, WITH 5/8" GWB ACROSS BOTTOM OF JOISTS FOR INTERIOR FINISH.
ASSEMBLY: NO RATING

K — NOT USED

L — CONCRETE PATIOS: RE: STRUCTURAL

M — RAILINGS:
METAL GUARDRAIL WITH METAL BALUSTERS AT 4" O.C.. SECURE TO SIDE OF STRINGER AND/OR RIM JOIST. HANDRAIL TO BE PROVIDED AT EXTERIOR STAIRS.

N — INTERIOR STAIRS: CARPET (NO PAD) OVER PREFAB WOOD STRINGERS AND TREADS; PROVIDE (2) LAYERS 5/8" TYPE X GYP. BD. AT UNDERSIDE OF STAIR FOR 1 HR. RATING.

CONSTRUCTION ASSEMBLIES

A — EXTERIOR WALLS:
CEMENTIOUS LAP SIDING, ON TWO LAYERS BUILDING PAPER, ON SHEATHING (RE: STRUCTURAL), OVER WOOD STUDS W/ R14 BATT INSULATION, VAPOR BARRIER AND 1/2" GWB INTERIOR FINISH.
ASSEMBLY: NOT RATED

A1 — EXTERIOR WALLS:
CORRUGATED GALVANIZED METAL SIDING OR ASPHALT SHINGLES (RE: ELEV.)ON TWO LAYERS BUILDING PAPER ON SHEATHING (RE: STRUCTURAL) OVER WOOD STUDS W/ R14 BATT INSULATION, VAPOR BARRIER AND 1/2" GWB INTERIOR FINISH.
ASSEMBLY: NO RATING

A2 — EXTERIOR WALLS:
CEMENTIOUS-PANEL ON TWO LAYERS BUILDING PAPER ON SHEATHING (RE: STRUCTURAL) OVER WOOD STUDS W/ R14 BATT INSULATION, VAPOR BARRIER AND 1/2" GWB INTERIOR FINISH.
ASSEMBLY: NO RATING

B — EXTERIOR WALLS:
CEMENTIOUS LAP SIDING OR PANEL (RE: ELEV.), ON TWO LAYERS BUILDING PAPER, ON 5/8" EXTERIOR TYPE X GWB, ON SHEATHING (RE: STRUCT), OVER WOOD STUDS W/ R14 BATT INSULATION, VAPOR BARRIER AND 5/8" TYPE X GWB INTERIOR FINISH.
ASSEMBLY: UL-U344 1 HR.

C — PARTY WALLS:
TWO PARALLEL STUD WALLS W/COMMON TOP PLATE (RE: STRUCTURAL). EACH WALL TO HAVE 5/8" TYPE X GWB ON INSIDE FACE (AT AIR GAP), R-13 HIGH DENSITY INSULATION, 5/8" TYPE X GWB ROOM SIDE FINISH. PROVIDE 2" CLEAR AIR GAP BETWEEN WALLS. (@ TUB SURROUND PROVIDE CEMENT BACKER BOARD IN ADDITION TO GWB.)
ASSEMBLY: 1 HR RATED (BASED ON UL-U305)

D — INTERIOR WALLS:
1/2" GWB EACH SIDE OF WOOD STUDS 16" O.C., AT WET AREAS PROVIDE 1/2" MOISTURE RESISTANT GWB. PROVIDE CEMENT BACKER BOARD AT TUB SURROUND WALLS
ASSEMBLY: NO RATING

E — FLOORS AT GRADE:
POST TENSION CONCRETE SLAB, RE: STRUCTURAL
ASSEMBLY: NO RATING (NON COMBUSTIBLE)

F — FLOOR/CEILING SYSTEM:
FLOOR FINISH, ON SUBFLOOR, ON FLOOR JOISTS, WITH 7/8" DEEP FURRING CHANNELS, WITH 1-1/4" BATT INSULATION BTWN FURRING CHANNELS AND BOTTOM OF JOISTS, WITH 5/8" TYPE X GWB CEILING FINISH.
ASSEMBLY: UL-L530 1 HR

F1 — FLOOR/CEILING SYSTEM:
FLOOR FINISH, ON SUBFLOOR, ON FLOOR JOISTS, WITH 5/8" GWB CEILING FINISH

G — BALCONY/CEILING SYSTEM:
CONC. (RE: STRUCT.) ON A WATER PROOF MEMBRANE, ON SUBFLOOR, ON FLOOR JOISTS, WITH 7/8" DEEP FURRING CHANNELS, WITH 1-1/4" BATT INSULATION BTWN FURRING CHANNELS AND BOTTOM OF JOISTS, WITH 5/8" EXTERIOR TYPE X GWB CEILING FINISH.
ASSEMBLY: UL-L530 1 HR

H — ROOF CEILING SYSTEM:
ASPHALT SHINGLES ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER PRE-ENGINEERED ROOF TRUSSES W/ R-38 FOIL FACED BATT INSULATION, WITH 5/8" GWB ACROSS BOTTOM OF TRUSSES FOR INTERIOR FINISH.
ASSEMBLY: NO RATING

H1 — ROOF CEILING SYSTEM:
ASPHALT SHINGLES ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER 2X2 OVER JOISTS (RE: STRUCT.) W/ R-38 FOIL FACED BATT INSULATION, VAPOR BARRIER WITH (2) LAYERS 5/8" TYPE X GWB ACROSS BOTTOM OF JOISTS FOR INTERIOR FINISH.
ASSEMBLY: 1 HR. RATED MEMBRANE

H2 — ROOF CEILING SYSTEM:
ROLLED ASPHALT ROOFING, ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER JOISTS WITH (2) LAYERS 5/8" EXTERIOR TYPE X GWB.
ASSEMBLY: 1 HR. RATED SOFFIT MEMBRANE

J — ROOF CEILING SYSTEM:
CORRUGATED GALVANIZED METAL ROOFING ON (2) LAYERS 15# FELT, (ICE & WATER SHIELD WHERE SHOWN) ON SHEATHING (RE: STRUCT.) OVER ROOF JOISTS OR PRE-ENGINEERED TRUSSES W/ R-38 FOIL FACED BATT INSULATION, WITH 5/8" GWB ACROSS BOTTOM OF JOISTS FOR INTERIOR FINISH.
ASSEMBLY: NO RATING

K — NOT USED

L — CONCRETE PATIOS: RE: STRUCTURAL

M — RAILINGS:
METAL GUARDRAIL WITH METAL BALUSTERS AT 4" O.C.. SECURE TO SIDE OF STRINGER AND/OR RIM JOIST. HANDRAIL TO BE PROVIDED AT EXTERIOR STAIRS.

N — INTERIOR STAIRS: CARPET (NO PAD) OVER PREFAB WOOD STRINGERS AND TREADS; PROVIDE (2) LAYERS 5/8" TYPE X GYP. BD. AT UNDERSIDE OF STAIR FOR 1 HR RATING.

GENERAL NOTES:

Re: proposed alternate detail for sidewalk or stoop connections to FF slab

Dear Mike,

The following is a response to your RFI 06:

The detail proposed in RFI 06 is not approved.

Sheet A23 of 37 – Detail 4: Use the detail shown on attached Sheet 01 in lieu of detail 4.

Sheet A23 of 37 – Detail 5: Use the detail shown on attached Sheet 02 in lieu of detail 5.

Sincerely,

Todd Townsend

Re: ~~[illegible]~~

Dear Mike,

The following is additional information and clarification to the drawings dated May 05, 2006 in response to the email and phone conversation with Tye Gardner, Structural Component Systems, Inc.:

Sheet C801of 37 – Plan 1 – Windows C, D and E: In lieu of the dimensions shown on the window schedule, use the updated dimensions shown on attached Sheet 01, Sheet 02, Sheet 03, and Sheet 04.

Sheet C801 of 37 – Plan 1 – Laundry Pony Wall: See attached Sheet 05 for height of wall and wall cap detail.

Sheet C802 of 37 – Plan 1: The roof pitch of the Community Room is to match Section CC's pitch of 2.6/12 in lieu of the roof pitch shown.

Sheet C803 of 37 – Elevations 1, 2, 3, and 4: See attached Sheet 06, Sheet 07, Sheet 08, and Sheet 09 for additional window header elevations.

Sheet C804 of 37 – Section AA: See attached Sheet 10 for additional window header elevations.

Sheet C805 of 37 – Section CC: See attached Sheet 01 for window header elevations and reference to structural detail.

Sheet S4 of 7 – Detail D 4/4: A roof pitch of 2.6/12 is to be used in lieu of the roof pitch shown.

Sincerely,

Todd Townsend

Re: Community Building Mechanical Room and Mop Sink

Dear Mike,

The following information is additional information and clarification to the drawings dated May 05, 2006.

Sheet C805 of 37 – Community Building – Utility Room: Place the mop sink tight to the SE corner of the room. See attached Sheet S1. Plumbing for the mop sink is to come through the wall in the SE corner and not from the north. Install a hose bibb adjacent to the mop sink. Install a floor mounted faucet (GR8) on the wall of the east and south exterior at the mop sink. The GR8 is to extend horizontally so the end of faucet from finish floor will extend horizontally to the edge of the mop sink. Coordinate plumbing locations with FI stub.

Sheet C801 of 37 – Community Building – Mechanical Room: See attached Sheet 02 for section through mechanical room and mechanical return air platform.

Sheet F6 of 37 – Water Heater Detail: The water heater detail shown on Sheet F6 of 37 applies to ground floor water heaters only. As shown on Sheet 02 of upper floor Community Building all upper floor water heaters will have drip pans and drains. See attached Sheet 03 for water heater drip pan and pan drain detail at upper floor and community building.

Sincerely,

Todd Townsend

Re: concrete stain

Dear Mike,

The following information is additional information and clarification to the drawings dated May 05, 2006:

In response to your RFI 26, Ecrete is a brand of concrete floor stain that we have had good success with in the past. Color will need to be coordinated with the architect and approved by the client.

Sincerely,

Todd Townsend

A-CI # 46 Call Todd through (303) 607 0399

Re: RR 37, 38, 39, & 40

Dear Mike,

The following information is additional information and clarification to the drawings dated May 05, 2006:

Regarding RR #37 from Schauer Construction.

1 – The HVAC diffuser locations dated 03.29.07 are acceptable to us. The condensing unit locations as described are acceptable to us. Please note the comments by Bailey Engineers regarding the type of diffuser used.

Regarding RR #38 from Schauer Construction.

1 – The dropped ceiling in the manager's unit bathroom may be eliminated.

Regarding RR #39 from Schauer Construction.

1 – Please provide half round gutters and round downspouts at all locations.

Regarding RR #40 from Schauer Construction.

1 – The connection as described is acceptable. Please see the attached email from Ron Faleide.

Sincerely,

Ron Faleide

Specification Section:	15400		

Subject: Ron,

In order to keep the plumbing lines out of the unheated exterior wall and attic space, We would like to run a small soffit from the Laundry Room to the Kitchen in the Community Building, against the exterior wall and ceiling, to accomodate the plumbing lines. Is this acceptable to Faleide Architects ?

CONSTRUCTION ASSEMBLIES

A EXTERIOR WALLS:
CEMENTIOUS LAP SIDING, ON TWO LAYERS BUILDING PAPER, ON SHEATHING (RE: STRUCTURAL) OVER WOOD STUDS W/ R19 BATT INSULATION, VAPOR BARRIER AND 1/2" GWB INTERIOR FINISH.
ASSEMBLY: NOT RATED

A1 EXTERIOR WALLS:
CORRUGATED GALVANIZED METAL SIDING OR ASPHALT SHINGLES (RE: ELEV.)ON TWO LAYERS BUILDING PAPER ON SHEATHING (RE: STRUCTURAL) OVER WOOD STUDS W/ R19 BATT INSULATION, VAPOR BARRIER AND 1/2" GWB INTERIOR FINISH.
ASSEMBLY: NO RATING

A2 EXTERIOR WALLS:
CEMENTIOUS-PANEL ON TWO LAYERS BUILDING PAPER ON SHEATHING (RE: STRUCTURAL) OVER WOOD STUDS W/ R19 BATT INSULATION, VAPOR BARRIER AND 1/2" GWB INTERIOR FINISH.
ASSEMBLY: NO RATING

B EXTERIOR WALLS:
CEMENTIOUS LAP SIDING OR PANEL (RE: ELEV.), ON TWO LAYERS BUILDING PAPER, ON 5/8" EXTERIOR TYPE X GWB, ON SHEATHING (RE: STRUCT), OVER WOOD STUDS W/ R19 BATT INSULATION, VAPOR BARRIER AND 5/8" TYPE X GWB INTERIOR FINISH.
ASSEMBLY: UL-U344 1 HR.

C PARTY WALLS:
TWO PARALLEL STUD WALLS W/COMMON TOP PLATE (RE: STRUCTURAL). EACH WALL TO HAVE 5/8" TYPE X GWB ON INSIDE FACE (AT AIR GAP), R-15 HIGH DENSITY INSULATION, 5/8" TYPE X GWB ROOM SIDE FINISH. PROVIDE 2" CLEAR AIR GAP BETWEEN WALLS. (@ TUB SURROUND PROVIDE CEMENT BACKER BOARD IN ADDITION TO GWB.)
ASSEMBLY: 1 HR. RATED (BASED ON UL-U305)

D INTERIOR WALLS:
1/2" GWB EACH SIDE OF WOOD STUDS 16" O.C., AT WET AREAS PROVIDE 1/2" MOISTURE RESISTANT GWB. PROVIDE CEMENT BACKER BOARD AT TUB SURROUND WALLS.
ASSEMBLY: NO RATING

E FLOORS AT GRADE:
POST TENSION CONCRETE SLAB, RE: STRUCTURAL
ASSEMBLY: NO RATING (NON COMBUSTIBLE)

F FLOOR/CEILING SYSTEM:
FLOOR FINISH, ON SUBFLOOR, ON FLOOR JOISTS, WITH 7/8" DEEP FURRING CHANNELS, WITH 1-1/4" BATT INSULATION BTWN FURRING CHANNELS AND BOTTOM OF JOISTS, WITH 5/8" TYPE X GWB CEILING FINISH.
ASSEMBLY: UL-L530 1 HR

F1 FLOOR/CEILING SYSTEM:
FLOOR FINISH, ON SUBFLOOR, ON FLOOR JOISTS, WITH 5/8" GWB CEILING FINISH

G BALCONY/CEILING SYSTEM:
CONC. (RE: STRUCT.) ON A WATER PROOF MEMBRANE, ON SUBFLOOR, ON FLOOR JOISTS, WITH 7/8" DEEP FURRING CHANNELS, WITH 1-1/4" BATT INSULATION BTWN FURRING CHANNELS AND BOTTOM OF JOISTS, WITH 5/8" EXTERIOR TYPE X GWB CEILING FINISH.
ASSEMBLY: UL-L530 1 HR

H ROOF CEILING SYSTEM:
ASPHALT SHINGLES ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER PRE-ENGINEERED ROOF TRUSSES W/ R-38 FOIL FACED BATT INSULATION, WITH 5/8" GWB ACROSS BOTTOM OF TRUSSES FOR INTERIOR FINISH.
ASSEMBLY: NO RATING

H1 ROOF CEILING SYSTEM:
ASPHALT SHINGLES ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER 2X2 OVER JOISTS (RE: STRUCT.) W/ R-38 FOIL FACED BATT INSULATION, VAPOR BARRIER WITH (2) LAYERS 5/8" TYPE X GWB ACROSS BOTTOM OF JOISTS FOR INTERIOR FINISH.
ASSEMBLY: 1 HR. RATED MEMBRANE

H2 ROOF CEILING SYSTEM:
ROLLED ASPHALT ROOFING, ON (2) LAYERS 15# FELT, ON SHEATHING (RE: STRUCTURAL) OVER JOISTS WITH (2) LAYERS 5/8" EXTERIOR TYPE X GWB.
ASSEMBLY: 1 HR. RATED SOFFIT MEMBRANE

J ROOF CEILING SYSTEM:
CORRUGATED GALVANIZED METAL ROOFING ON (2) LAYERS 15# FELT, (ICE & WATER SHIELD WHERE SHOWN) ON SHEATHING (RE: STRUCT.) OVER ROOF JOISTS OR PRE-ENGINEERED TRUSSES W/ R-38 FOIL FACED BATT INSULATION, WITH 5/8" GWB ACROSS BOTTOM OF JOISTS FOR INTERIOR FINISH.
ASSEMBLY: NO RATING

K NOT USED

L CONCRETE PATIOS: RE: STRUCTURAL

M RAILINGS:
METAL GUARDRAIL WITH METAL BALUSTERS AT 4" O.C. SECURE TO SIDE OF STRINGER AND/OR RIM JOIST. HANDRAIL TO BE PROVIDED AT EXTERIOR STAIRS.

N INTERIOR STAIRS: CARPET (NO PAD) OVER PREFAB WOOD STRINGERS AND TREADS, PROVIDE (2) LAYERS 5/8" TYPE X GYP. BD. AT UNDERSIDE OF STAIR FOR 1 HR. RATING.

GENERAL NOTES:

1. DO NOT SCALE THE DRAWINGS! ALL NOTES AND NOTED DIMENSIONS TAKE PRECEDENCE OVER VISUAL REPRESENTATIONS OR ASSUMED INFORMATION.

2. REFER TO STRUCTURAL FLOOR FRAMING PLANS FOR ALL SHEAR WALL LOCATIONS AND ASSEMBLIES.

3. REFER TO STRUCTURAL FLOOR FRAMING PLANS FOR ALL BEARING WALL LOCATIONS.

4. REFER TO STRUCTURAL DRAWINGS FOR STUD AND JOIST SIZE AND SPACING, SHEATHING SIZE AND THICKNESS, POST SIZES AND CONCRETE THICKNESS.

5. ENSURE THAT DRAINAGE IS AWAY FROM BUILDING AT A SLOPE OF 1/4" PER FOOT MINIMUM. TO ALLEVIATE ANY TRAPPED WATER BETWEEN BUILDING AND SIDEWALK USE 4" DIA. CORRUGATED PLASTIC PIPE TO ROUTE WATER UNDER SIDEWALKS TO AN OPEN, DRAINABLE AREA, TYPICAL AT ALL LOCATIONS.

6. ENSURE ATTIC VENTING THROUGH ROOF, WALL AND SOFFIT IS PER CODE.

7. CONSTRUCTION LOADS SHALL NOT BE GREATER THAN DESIGN LOADS OR OTHERWISE OVERLOAD THE STRUCTURE.

8. WALLS ARE DIMENSIONED FROM FRAMING TO FRAMING UNLESS NOTED OTHERWISE.

9. DOOR FRAMES NOT DIMENSIONED ARE TO BE PLACED 4" FROM ADJACENT WALLS OR CENTERED ALONG WALL LENGTH

10. **PROVIDE FURRING AND GYP. BD. SOFFITS AS REQ'D TO COVER DUCTWORK, PLUMBING OR ELECTRICAL SYSTEMS.**

11. BUILDER SHALL VERIFY ALL MATERIALS, DIMENSIONS AND CONDITIONS SHOWN ON DRAWINGS OR NOTED IN SPECS. ANY VARIANCES ENCOUNTERED ON THE SITE WILL BE REPORTED TO THE ARCHITECT BEFORE COMMENCEMENT OF AFFECTED WORK.

12. CAULK ALL JOINTS AROUND WALL PENETRATIONS TO PROVIDE A WATER AND AIR TIGHT SEAL. CAULK ALL JOINTS BETWEEN EXTERIOR SIDING & TRIM, BETWEEN WINDOWS & DOORS AND TRIM & FLASHING, BETWEEN EXT. TRIM & SOFFIT AND BETWEEN EXT. SIDING AND TRIM & FLASHING. PROVIDE WEEPS PER MANUFACTURER'S RECOMMENDATIONS.

13. WINDOWS JAMBS & HEAD SHALL BE WRAPPED IN GYP. BD.AND HAVE A 1x6 PAINT GRADE FIR SILL W/ 1X2 WD SKIRT, CAULK ALL JOINTS BETWEEN WINDOW, GYP. BD. & WD. TRIM.

14. PROVIDE CONCRETE SPLASH BLOCKS AT ALL DOWNSPOUT LOCATIONS

Description of RFI:	Wall Panel Questions	**Date Submitted:**	8/15/2006
		Reply Required:	9/17/2006
RFI Number:	2	**Area Involved:**	Wall Panels
Cost Impact:	no	**Urgent Yes/No:**	yes
Schedule Impact:	no	**Subcontractor RFI Date:**	
Subcontractor RFI Number:		**Drawing Number:**	
Specification Section:	06100		

Subject: 5. At the 2-bedroom units, there are some walls shown around the pantry in the kitchen and around the linen cabinet in the bathrooms. These walls appear to be 2x2 walls. Please verify this. ASI #04

6. Some of the structural details show walls that run parallel to I-joists are to be ballooned to underside of floor sheathing. Yet, the headers of openings in these walls are shown flush with the top of I-joists which would make panelization difficult. I would recommend that we provide all standard height walls in order to be consistent throughout the entire project. Please verify if this will be ok. ASI #.04

7. In the structural drawings, some walls are shown having 7/16" osb wall sheathing and others have 1/2" plywood wall sheathing. If the engineer will allow it, I would recommend using 7/16" osb on the entire project in order to keep jamb sizes consistent. Please verify if this will be ok. ASI #10

10. Please verify that the 1st level, center unit of building G1 is to be a handicap accessible unit. ASI #.04

12. There is a wide plate at the top and bottom of the double party wall construction. The architectural drawings and structural drawings show this plate in different locations. Please verify if I should follow the architectural drawings or the structural drawings. (A16/City of Montrose, A19/3, and S8/A are each showing a different configuration)

18. At the 1st level of the town home, there is a window V on the interior wall of the dining room. Would you like this window to have a standard header height? ASI #.04

19. At the 1st level of the town home, there is a window above the door leading into Bathroom #1. (See detail 1A on sheet A15.1.) I need the rough opening and header height of this window. Also, would you like the window to be centered on the door below it? (Please provide the size of the window, SOCI will coordinate the R.O. size with the window subcontractor) ASI #.04

Re: RFI 02

Dear Mike,

The following is additional information in a partial response to RFI 02 dated August. 18 2006. Numbers below correspond to numbers on RFI 02.

7. Walls with ½" plywood wall sheathing must remain ½" plywood. It is not acceptable to replace the ½" plywood with 7/16" OSB.

Sincerely,

Todd Townsend

ASI # 10.1

Re: Review Comments
Sunshine Peak Apartments
Job No. 3658.0

In response to Item #7 of RFI 2, the ½" plywood sheathing is required between first and second floors at building end walls only. It has a higher shearwall value than 7/16" O.S.B.

The issue regarding jamb size does not seem to apply since the ½" plywood thickness will match the ½" gypsum board thickness above. There will be a different thickness between the 7/16" O.S.B. and the ½" gypsum board sheathing which occurs at all front and rear walls.

We are waiting to hear back from the City Building Official re: item #12.

Subject: Re: RFI 21 Sunshine Peaks Apts

ATT00001.html

Mike:
After considerable research, I have been able to establish some shear and tension values to the powder driven pins you have proposed for use at the party walls. The required load capacities for the pins are 100 pll shear and 143 pll for tension. According to ICBO report ER-4546, in conjunction with ANSI/NFoPA NDS-1991, the following values are determined:
1. Each pin has a value in 4000 psi concrete, with 1 1/4" min. penetration, of 266 lb. shear and 370 lb tension.
2. Each pin has a value in the wood sill plates of 96 lb shear and 178 lb tension, subject to a reduction factor of 0.81 for woods with a specific gravity between 0.42 and 0.49 which is our condition. Net allowable values are then 77 lb shear and 144 lb tension.

The above criteria would set a maximum spacing of 9", however report ER-4546 sets some additional requirements:
1. PDP-300 pins shall have 4 pins placed at each end of sill plates with a length greater than 30 inches. The pins shall be placed 3.6 and 12 inches, respectively from the interior face of the end stud. The spacing may be adjusted to avoid interference with intervening studs. The 9" spacing noted above would apply between these end sets.
2. All pins must be installed with a minimum 3/4 inch dia., No. 16 gage (0.0598 inch) steel washer.

The above criteria apply to the party shear walls only. The shear loads on the exterior walls would require 6 pins per lineal foot, which would not meet the minimum spacing requirement for the pins to develop their strength in the concrete. Therefore, the specified anchor bolt size and spacing should be used at all exterior walls.

Ron,
See attached RFI 21. Talking with Chris the City Inspector wants to see anchor bolts at the party wall locations and exterior walls.

Thank You

PRESTRESSED POST-TENSIONED CONCRETE FOUNDATION NOTES.

A. PRESTRESSED POST-TENSIONED FOUNDATION SYSTEM SHALL BE DESIGNED, DETAILED, AND STAMPED BY THE CONTRACTOR'S DESIGN/BUILD SUBCONTRACTOR IN ACCORDANCE WITH SOILS RECOMMENDATIONS CONTAINED IN REPORT NO. 2103, DATED NOVEMBER 3, 2005, AND ADDENDUM 1 BY GEOTECHNICIAL ENGINEERING GROUP, INC. DATED MARCH 6, 2006.
B. POST-TENSIONED FOUNDATION SYSTEM DRAWINGS SHALL BE STAMPED BY A CURRENTLY REGISTERED COLORADO PROFESSIONAL ENGINEER AND SHALL BE SUBMITTED FOR A SEPARATE FOUNDATION PERMIT.
C. ALL PRESTRESSED POST-TENSIONED WORK SHALL BE IN ACCORDANCE WITH THE 'BUILDING CODE REQUIREMENTS FOR REINFORCED CONCRETE' ACI 318.
D. SUPERIMPOSED DESIGN LOADING FOR SLABS AND BEAMS SHALL BE AS SHOWN ON THE PLANS.
E. THE CONTRACTOR SHALL SUBMIT SHOP DRAWINGS, DESIGN CALCULATIONS, AND PROPOSED STRESSING SEQUENCE TO THE ARCHITECT/ENGINEER PRIOR TO COMMENCING THIS PHASE OF CONSTRUCTION, FOR REVIEW OF CONDITIONS RELATED TO OTHER WORK ON THE PROJECT.
F. DESIGN/BUILD FOUNDATION ENGINEER SHALL SPECIFY CONCRETE MIX DESIGNS, STRENGTHS, SLUMPS, AIR ENTRAINMENT, WATER/CEMENT RATIO, AND TYPE V CEMENT PER SOILS REPORT RECOMMENDATIONS.
G. THE TENDON SUPPLIER AND CONTRACTOR ARE JOINTLY RESPONSIBLE TO PROVIDE THE FINAL EFFECTIVE FORCES REQUIRED.
H. PROVIDE BLOCK-OUT SLEEVES PRIOR TO CONCRETE POUR FOR ALL OPENINGS AND PENETRATIONS REQUIRED BY MECHANICAL AND ELECTRICAL CONTRACTORS IN PRESTRESSED SLABS.
I. SPECIFY POWDER ACTUATED FASTENERS MAXIMUM PENETRATING DEPTH INTO THE CONCRETE FOR ATTACHMENT BY OTHER TRADES
J. PROVIDE EMBEDDED ANCHORS, PLATES, ANCHOR RODS, AND OTHER ATTACHMENTS FOR COLUMNS, WALL SILL PLATES, ETC. AS NEEDED FOR ANY STRUCTURAL, ARCHITECTURAL, ELECTRICAL AND MECHANICAL ITEMS REQUIRING ANCHORAGE TO THE PRESTRESSED CONCRETE. ANY CONNECTIONS NOT PROVIDED FOR BY CAST-IN-ANCHORS AND WHICH MUST BE DRILLED LATER SHALL BE LOCATED TO MISS TENDONS AND SHALL BE SUBMITTED TO THE POST-TENSIONED FOUNDATION DESIGN/BUILD ENGINEER FOR APPROVAL PRIOR TO DRILLING.
K. STRUCTURAL REINFORCEMENT REQUIRED FOR THE PERFORMANCE OF THE ANCHORAGE SHALL BE DETAILED AND SUPPLIED BY THE TENDON SUPPLIER.

NOTE: FOUNDATION PLANS SHOWN ON THIS SHEET ARE FOR GENERAL INFORMATION ONLY AND ARE NOT TO BE CONSIDERED A PART OF THE ENGINEERED FOUNDATION WHICH WILL BE PREPARED BY OTHERS. LOADS INDICATED ON THESE PLANS ARE TO BE USED BY THE FOUNDATION ENGINEER AND ARE UNFACTORED. FOUNDATION PERMIT IS TO BE ISSUED ON THE BASIS OF ENGINEERED FOUNDATION PLANS BY OTHERS. RNF CONSULTANTS ASSUMES NO RESPONSIBILITY FOR THE DESIGN OR PERFORMANCE OF SAID FOUNDATION.

Description of RFI:	LVL at Bridge Location in Townhome	Date Submitted:	12/14/2006
		Reply Required:	12/15/2006
RFI Number:	19	Area Involved:	LVL at Bridge Location in
Cost Impact:	no	Urgent Yes/No:	no
Schedule Impact:	no	Subcontractor RFI Date:	
Subcontractor RFI Number:		Drawing Number:	
Specification Section:	06100		

Subject: This RFI is to confirm the conversation between Chris Wilson and Ron Frickel at approximately 4:00 p.m. on 12/14/2006. The LVL at the bridge location shown in the attached picture is not required. In this instance, shown in the attached picture, the BCIs are being supported by hangers attached to this LVL. In this instance the LVL will be cut so that another LVL may be sistered up next to the BCIs, these LVLs will be attached to the BCIs, these LVLs will bear on the party wall, and the hangers will be removed. In future construction the LVL on top of the party wall at the bridge location in the townhouse will not be installed and the BCIs will bear directly on the party wall. Please confirm and/or modify the above statements and provide any specific information not included above.

Thank you.

~~1. Floor Topping (optional, not shown): Gypsum concrete, lightweight or normal common topping.~~
2. Floor Sheathing: Minimum 23/32 inch thick tongue-and-groove wood sheathing (Exposure 1). Installed per code requirements with minimum 8d common nails.
3. Insulation (optional, not shown): Insulation fitted between I-joists supported by the resilient channels.[b] OPEN AT CUSHIONED VINYL LOCATIONS ONLY
4. Structural Members: Wood I-joists spaced a maximum of 24 inches on center.
   Minimum I-joist flange depth: 1-5/16 inches — Minimum I-joist flange area: 1.95 inches[2]
   Minimum I-joist web thickness: 3/8 inch — Minimum I-joist depth: 9-1/2 inches
5. Resilient Channels[b]: Minimum 0.019 inch thick galvanized steel resilient channel attached perpendicular to the bottom flange of the I-joists with one 1-1/4 inch drywall screw. Channels spaced a maximum of 16 inches on center [24 inches on center when I-joists are spaced a minimum of 16 inches on center].
6. Gypsum Wallboard: Two layers of minimum 1/2 inch Type X gypsum wallboard attached with the long dimension perpendicular to the resilient channels as follows:
   a. Wallboard: [redacted] layer of wallboard attached to resilient channels with [redacted]
   [redacted] wallboard attached to resilient channels through base layer [redacted] on center. Edge joints of wallboard face layer offset 24 inches from those of base layer. [redacted] wallboard face layer attached to base layer with 1-1/2 inch Type G drywall screws.
7. Finish System (not shown): Face layer joints covered with tape and coated with joint compound. Screw heads covered with joint compound.

Fire Test conducted at National Research Council of Canada — Report No: A-9440.1 — June 24, 1997

STC and IIC Sound Ratings for Listed Assembly								
	Without Gypsum Concrete				With Gypsum Concrete			
	Cushioned Vinyl		Carpet & Pad		Cushioned Vinyl		Carpet & Pad	
	STC	IIC	STC	IIC	STC	IIC	STC	IIC
With Insulation	59	59	60	64	52	52	61	66
Without Insulation	-	-	54	68	52	51	61	66

[a] This assembly may also be used in a directed soundproofing application, but only when constructed exactly as described.
[b] Direct attachment of gypsum wallboard in lieu of attachment to resilient channels is typically deemed acceptable. When gypsum wallboard is directly attached to the I-joists, the wallboard should be installed with long dimension perpendicular to the I-joists and insulation should not be supported by the wallboard.

Re: Schauer Construction RFI 20

Dear Mike,

The following information is additional information and clarification to the drawings dated May 05, 2004

The following is RNF Consultants response to RFI 20:

1 3/4" dia. hole can be placed thru the referenced beam if placed at mid-span and at mid-depth of the member.

Ron Frickel, P.E.

Description of RFI:	LVL at Bridge Location in Townhome	Date Submitted:	12/14/2006
		Reply Required:	12/15/2006
RFI Number:	19	Area Involved:	LVL at Bridge Location in
Cost Impact:	no	Urgent Yes/No:	no
Schedule Impact:	no	Subcontractor RFI Date:	
Subcontractor RFI Number:		Drawing Number:	
Specification Section:	06100		

Subject: This RFI is to confirm the conversation between Chris Wilson and Ron Frickel at approximately 4:00 p.m. on 12/14/2006. The LVL at the bridge location shown in the attached picture is not required. In this instance, shown in the attached picture, the BCIs are being supported by hangers attached to this LVL. In this instance the LVL will be cut so that another LVL may be sistered up next to the BCIs, these LVLs will be attached to the BCIs, these LVLs will bear on the party wall, and the hangers will be removed. In future construction the LVL on top of the party wall at the bridge location in the townhouse will not be installed and the BCIs will bear directly on the party wall. Please confirm and/or modify the above statements and provide any specific information not included above.

Thank you.

The above statements are confirmed
Ron Frickel

Specification Section:	05100		

Subject: Todd,
RNF and myself spoke on the telephone in regards to this RFI on Friday while I was at the jobsite. The assembly was not constructed as shown on detail C on 4 of 7. The framers could not figure out how to use Simpson HU210-2 hangers for this application. The hanger was suppose to be a HUC210. They simply cut back the LVL and nailed the 2x12 to the LVLs. After speaking with Ron he gave us 2 options. The option we decided to go with is applying (2) HGA10 to the inside corners using the special screws that come with the hanger (see Attached Dwg). This RFI is to document our telephone conversation and as built the drawings.

ABBREVIATIONS: E.C.–ELECTRICAL CONTRACTOR, F.A.C.–FIRE ALARM CONTRACTOR, G.C.–GENERAL CONTRACTOR, H.C.–HVAC CONTRACTOR, M/E–MECHANICAL/ELECTRICAL, P.C.–PLUMBING CONTRACTOR

SECTION 15010 – GENERAL HVAC PROVISIONS

1. WORK INCLUDED.

   PROVIDE COMPLETE AND OPERATING HVAC SYSTEMS. THE WORK ALSO INCLUDES THE COMPLETION OF DETAILS NOT MENTIONED OR SHOWN WHICH ARE NECESSARY FOR THE SUCCESSFUL OPERATION OF ALL SYSTEMS; THIS INCLUDES THE FURNISHING OF ALL MATERIALS FOR FILLING THE SYSTEM TO MAKE IT OPERABLE, INCLUDING WATER, REFRIGERANT, OIL, GREASE, ANTIFREEZE AND BRINE. SEE "HVAC, PLUMBING, ELECTRICAL AND GENERAL CONTRACTOR COORDINATION SCHEDULE" AND EQUIPMENT SCHEDULES FOR T'STATS AND OTHER CONTROLS TO BE PROVIDED.

2. HVAC DRAWINGS.

   HVAC DRAWINGS ARE DIAGRAMMATIC AND ARE NOT TO BE SCALED FOR DIMENSIONS. TAKE ALL DIMENSIONS FROM ARCHITECTURAL DRAWINGS, CERTIFIED EQUIPMENT DRAWINGS AND FROM THE STRUCTURE ITSELF BEFORE FABRICATING ANY WORK. VERIFY SPACE REQUIREMENTS, COORDINATING WITH OTHER TRADES, AND INSTALL THE SYSTEMS IN THE SPACE PROVIDED WITHOUT VIOLATION OF APPLICABLE CODES, STANDARDS, SPECIFICATION REQUIREMENTS, OR EXTRA CHARGES TO THE OWNER.

3. VERIFICATION OF FIELD CONDITIONS.

   BEFORE UNDERTAKING EACH PART OF THE WORK, CAREFULLY STUDY AND COMPARE THE CONTRACT DOCUMENTS WITH FIELD MEASUREMENTS. PROMPTLY REPORT IN WRITING TO THE MECHANICAL ENGINEER ANY CONFLICT, ERROR OR DISCREPANCY.

4. EQUIPMENT FURNISHED BY OTHERS.

   COORDINATE EXACT REQUIREMENTS OF EQUIPMENT FURNISHED BY OTHERS BEFORE PERFORMING ANY WORK.

5. PERMITS.

   APPLY FOR AND PAY FOR ALL PERMITS, FEES, LICENSES AND INSPECTIONS FOR THIS DIVISION OF WORK.

6. CODES.

   COMPLY WITH ALL APPLICABLE CODES AND UTILITY COMPANY REGULATIONS. IN CASE OF CONFLICT WITH THE CONTRACT DOCUMENTS THE MOST STRINGENT SHALL GOVERN.

7. ACCESS DOORS.

   FURNISH ACCESS DOORS TO PROVIDE ACCESS TO ALL FIRE DAMPERS, VALVES, BALANCING DAMPERS, AND OTHER EQUIPMENT REQUIRING ACCESS. ACCESS DOORS FOR INSTALLATION IN FIRE RATED CONSTRUCTION SHALL HAVE APPROPRIATE FIRE RATING.

8. SPECIFIED MANUFACTURERS AND ALTERNATES.

   AN ACCEPTABLE MANUFACTURER'S NAME AND MODEL NUMBER OF A PRODUCT MAY BE GIVEN FOR AN EXAMPLE. THIS IS THE EQUIPMENT CONTEMPLATED DURING THE DESIGN PROCESS AND FORMS THE BASIS OF A STANDARD OF QUALITY. VERIFY THE MODEL NUMBER IS STILL ACCURATE AND MEETS ALL THE REQUIREMENTS AS SHOWN ON THE DRAWINGS. IF THERE IS A DISCREPANCY BETWEEN THE REQUIREMENTS OF THE DRAWINGS AND THE MODEL NUMBER, THE REQUIREMENTS OF THE DRAWINGS SHALL GOVERN. APPROVED EQUALS SHALL BE ALLOWED UNLESS OTHERWISE NOTED.

9. SUBMITTALS.

   A. REQUIRED SUBMITTALS.

      SUBMIT 5 COPIES OF THE FOLLOWING INFORMATION FOR APPROVAL. ORDER NO MATERIALS OR BEGIN NO WORK UNTIL ALL SUBMITTALS ARE RETURNED APPROVED.

      1.) ALL SCHEDULED EQUIPMENT.
      2.) CONTROLS AND CONTROL DIAGRAMS.
      3.) SHOP DRAWINGS REQUIRED TO BE SUBMITTED FOR APPROVAL.
      4.) OTHER INFORMATION SPECIFICALLY REQUIRED TO BE SUBMITTED FOR APPROVAL.

   B. REVIEW TIME.

      ALLOW 5 WORKING DAYS FOR REVIEW OF SUBMITTALS.

   C. RESUBMISSION.

      MAKE ALL REVISIONS REQUIRED AND RESUBMIT AS REQUIRED FOR INITIAL SUBMITTAL.

10. WARRANTIES.

    GUARANTEE ALL WORKMANSHIP, MATERIAL AND EQUIPMENT AND REPLACE ANY FOUND DEFECTIVE WORK WITHOUT COST TO THE OWNER, FOR A PERIOD OF ONE YEAR AFTER FINAL ACCEPTANCE.

11. OPERATION AND MAINTENANCE MANUALS.

    SUBMIT 3 COPIES BOUND IN 8–1/2" X 11" THREE RING, LOOSE LEAF BINDERS.

12. MATERIALS.

    ALL MATERIALS AND EQUIPMENT SHALL BE NEW UNLESS OTHERWISE SPECIFIED.

13. INSTALLATION OF EQUIPMENT.

    A. GENERAL.

       INSTALL ALL WORK IN ACCORDANCE WITH MANUFACTURERS RECOMMENDATIONS. ARRANGE ALL EQUIPMENT TO PERMIT EASY REMOVAL OF COILS, MOTORS, FILTERS, AND ALL OTHER PARTS WHICH MIGHT REQUIRE PERIODIC REPLACEMENT OR MAINTENANCE.

    B. SPACE PREFERENCE.

       WHERE CONFLICTS OCCUR THE FOLLOWING PREFERENCE SCHEDULE SHALL BE USED:

       1.) RECESSED ELECTRICAL LIGHT FIXTURES.
       2.) DUCTWORK.
       3.) SPRINKLER PIPING.
       4.) SOIL, WASTE, VENT AND STORM PIPING.
       5.) LIQUID HEAT TRANSFER AND REFRIGERANT PIPING.
       6.) DOMESTIC WATER PIPING.
       7.) ELECTRICAL CONDUITS.

       ITEMS #2 SHALL NOT HAVE PREFERENCE OVER ITEM #4 BELOW PLUMBING FIXTURES, OR OVER ITEM #7 ABOVE OR BELOW ELECTRIC SWITCH GEAR AND PANELS. NO PIPING CONVEYING FLUIDS SHALL BE INSTALLED DIRECTLY OVER ELECTRICAL EQUIPMENT.

14. DUCTWORK.

    A. GENERAL.

       PROVIDE DUCTWORK IN ACCORDANCE WITH LATEST EDITION OF THE SMACNA METAL DUCT STANDARD.

    B. INSULATION.

       REFER TO DUCT INSULATION SCHEDULE.

    C. SEALING.

       SEAL ALL SEAMS (LONGITUDINAL AND TRANSVERSE) ON EXTERIOR DUCTWORK.

15. TESTING AND BALANCING.

    A. GENERAL.

       PROVIDE A BALANCE REPORT PERFORMED BY AN INDEPENDENT FIRM CERTIFIED BY NEBB, AABC OR TABB.

    B. TOLERANCE.

       1.) BALANCE AIR FLOWS TO +/– 10% OF THE VALUES SHOWN ON THE DRAWINGS.
       2.) BALANCE HYDRONIC FLOWS TO W/IN +10% OF THE VALUES SHOWN ON THE DWGS.

UNITS LEGEND

LF	– LINEAR FEET
SF	– SQUARE FEET
CF	– CUBIC FEET
CFM	– CUBIC FEET PER MINUTE
GPM	– GALLONS PER MINUTE
GPH	– GALLONS PER HOUR
GAL	– GALLONS
FPM	– FEET PER MINUTE
BTU/HR	– BRITISH THERMAL UNITS PER HOUR
MBH	– BTU/HR X 1000
IN WG	– INCHES OF WATER GAUGE PRESSURE
FT WG	– FEET OF WATER GAUGE PRESSURE
PSI	– POUNDS PER SQUARE INCH
LB	– POUNDS
V	– VOLTS
A	– AMPS
W	– WATTS
KW	– KILOWATTS
HP	– HORSE POWER
HZ	– HERTZ
RPM	– REVOLUTIONS PER MINUTE

DUCTWORK INSULATION SCHEDULE

TABLE NOTES:

1. INSULATION IS NOT REQUIRED (UNLESS OTHERWISE NOTED) ON THE FOLLOWING DUCTS IN RESIDENTIAL APPLICATIONS:

   A. EXHAUST DUCTS.
   B. DUCTS LOCATED IN THE CONDITIONED SPACE.
   C. RETURN DUCTS LOCATED IN RETURN PLENUMS.
   D. WHEN LOCATED WITHIN A BUILDING ENVELOPE ASSEMBLY AND SEPARATED FROM THE BUILDING EXTERIOR OR UNCONDITIONED SPACE BY A MINIMUM OF R–8 INSULATION.

2. INSULATION IS NOT REQUIRED (UNLESS OTHERWISE NOTED) ON THE FOLLOWING DUCTS IN COMMERCIAL APPLICATIONS:

   A. EXHAUST DUCTS.
   B. DUCTS LOCATED IN THE CONDITIONED SPACE.
   C. RETURN DUCTS LOCATED IN RETURN PLENUMS.
   D. SUPPLY DUCTS IF TEMPERATURE DIFFERENCE BETWEEN THE INSIDE AND OUTSIDE OF DUCT DOES NOT EXCEED 15°F.
   E. WHEN LOCATED WITHIN A BUILDING ENVELOPE ASSEMBLY AND SEPARATED FROM THE BUILDING EXTERIOR OR UNCONDITIONED SPACE BY A MINIMUM OF R–8 INSULATION.

3. IT IS BELFAY ENGINEERING'S INTERPRETATION THAT A SUPPLY DUCT IS CONSIDERED TO BE WITHIN A CONDITIONED SPACE WHEN LOCATED IN A RETURN AIR PLENUM IF THE PLENUM IS INSULATED FROM THE EXTERIOR &/OR UN–CONDITIONED SPACE(S) BY MIN. R–8 INSULATION. (2003 IECC, 803.2.6)

4. IF TABLE AND PLANS CONFLICT, THE MORE STRINGENT SHALL APPLY.

APPLICATION	DUCT LOCATION	DUCT SERVICE	INSULATION MIN. R–VALUE	NOM. INSULATION THICKNESS**
RESIDENTIAL	EXPOSED TO WEATHER ON THE EXTERIOR OF THE BUILDING OR LOCATED IN AN UNCONDITIONED ATTIC.	SUPPLY	8	WRAP: NOT ALLOWED
				LINER: 2"
		RETURN	4	WRAP: NOT ALLOWED
				LINER: 1"
	IN UNCONDITIONED BASEMENTS, CRAWL SPACES, GARAGES, & OTHER UNCONDITIONED SPACES.	SUPPLY	8	WRAP: 3"
				LINER: 2"
		RETURN *	2	WRAP: 1–1/2"
				LINER: 1/2"
COMMERCIAL	EXPOSED TO WEATHER ON THE EXTERIOR OF THE BUILDING.	SUPPLY & RETURN	8	WRAP: NOT ALLOWED
				LINER: 2"
	IN UNCONDITIONED ATTICS, BASEMENTS, CRAWL SPACES, GARAGES, & OTHER UNCONDITIONED SPACES.	SUPPLY & RETURN	5	WRAP: 2"
				LINER: 1–1/2"

* – INSULATING OF RETURN DUCTWORK IN RESIDENTIAL BASEMENTS NOT REQUIRED.
** – ACTUAL INSULATION THICKNESS MAY VARY BY MANUFACTURER. THICKNESSES LISTED IN TABLE & DESIGN BASED ON OWENS CORNING, AEROMAT DUCT LINER & OWENS CORNING, SOFTR ALL–SERVICE FIBER GLASS DUCT WRAP.

HVAC PLAN CODE/SYMBOL LEGEND

CD–1 12/12 800	GRILLE, REGISTER, AND/OR DIFFUSER IDENTIFICATION, PLAN CODE – CD–1, NECK SIZE – 12/12, CFM THRU DEVICE – 800.
EXIST 800	EXISTING AIR DEVICE TO BE REBALANCED TO 800 CFM.
RELOC 800	RELOCATED AIR DEVICE TO BE REBALANCED TO 800 CFM.
II 12/12 800	VVT BOX IDENTIFICATION, PLAN CODE – II, NECK SIZE – 12/12, DESIGN CFM – 800.
VAV–1	VAV BOX IDENTIFICATION, PLAN CODE – VAV–1.
BB–1 6'	ELECTRIC BASEBOARD HEATER IDENTIFICATION, PLAN CODE – BB–1, LENGTH – 6 FT.

ABBREVIATION LEGEND

AFC	– ABOVE FINISH CEILING
AFF	– ABOVE FINISH FLOOR
ARCH.	– ARCHITECT
BFC	– BELOW FINISH CEILING
BFF	– BELOW FINISH FLOOR
BOD	– BOTTOM OF DUCT
BOE	– BOTTOM OF EQUIPMENT
CA	– COMBUSTION AIR
CKT	– CIRCUIT
CLG	– COOLING OR CEILING, DEPENDING ON CONTEXT
DN	– DOWN
DV	– DRYER VENT
DX	– DIRECT EXPANSION (OF REFRIGERANT)
EA	– EXHAUST AIR
EA.	– EACH
E.C.	– ELECTRICAL CONTRACTOR
EER	– ENERGY EFFICIENCY RATIO
ESP	– EXTERNAL STATIC PRESSURE
G.C.	– GENERAL CONTRACTOR
H.C.	– HVAC CONTRACTOR
HTG	– HEATING
ID	– INSIDE DIMENSIONS
MA	– MAKE–UP AIR
MAX	– MAXIMUM
M.C.	– MECHANICAL CONTRACTOR
MIN	– MINIMUM
NO.	– NUMBER
OA	– OUTSIDE AIR (NOT CONDITIONED)
P.C.	– PLUMBING CONTRACTOR
PH	– PHASE
PRESS.	– PRESSURE
RA	– RETURN AIR
REQ'D	– REQUIRED
SA	– SUPPLY AIR
SEER	– SEASONAL ENERGY EFFICIENCY RATIO
SHC	– SENSIBLE HEAT CAPACITY
SP	– STATIC PRESSURE
TA	– TRANSFER AIR
TDH	– TOTAL DYNAMIC HEAD PRESSURE
THC	– TOTAL HEAT CAPACITY
TP	– TOTAL PRESSURE
TYP.	– TYPICAL
U.O.N.	– UNLESS OTHERWISE NOTED
VA	– VENTILATION AIR
WT	– WEIGHT

HVAC LEGEND

SYMBOL	DESCRIPTION
[28/14]	WRAPPED DUCTWORK, FIRST FIGURE IS SIDE SHOWN. DIMENSIONS IN BRACKETS ARE CLEAR INSIDE. SEE INSULATION SCH. FOR THICKNESS.
27/12 (26/11 ID)	LINED DUCTWORK, FIRST FIGURE IS SIDE SHOWN. DIMENSIONS IN PARENTHESES ARE CLEAR INSIDE. 27/12 ARE OUTSIDE DIMENSIONS.
	ROUND SPIRAL DUCT.
	EXISTING DUCTWORK TO REMAIN.
27/13	DUCT SECTION, POSITIVE PRESSURE FIRST FIGURE IS TOP.
27/13	DUCT SECTION NEGATIVE PRESSURE. FIRST FIGURE IS TOP.
27/13	DUCT SECTION NATURAL FLOW. FIRST FIGURE IS TOP.
	FLEXIBLE DUCTWORK
	EXISTING FLEXIBLE DUCTWORK.
	SPIN–IN FITTING WITH DAMPER.
	FIRE DAMPER IN HORIZONTAL DUCT, PROVIDE W/SLEEVE AND ACCESS DOOR.
	FIRE DAMPER IN VERTICAL DUCT.
RD	RADIATION DAMPER.
	COMBINATION FIRE/SMOKE DAMPER W/SLEEVE AND ACCESS DOOR.
S	SMOKE DAMPER
	1 HOUR RATED WALL.
T RTU–1	THERMOSTAT, RTU–1 CONTROLLED EQUIPMENT. LOCATE 60" AFF UNLESS OTHERWISE NOTED.
RS	REMOTE SENSOR.
1	CONNECTION TO EXISTING DUCTWORK OR PIPING SEE CONNECTION LEGEND FOR DESCRIPTION.
1D	DUCT MOUNTED SMOKE DETECTOR. 1 – FIRE ALARM SYSTEM ZONE 1. SEE NOTES FOR MECH/ELEC RESPONSIBILITIES.
AD	DUCT MOUNTED ACCESS DOOR.
	24"X12" LAY–IN PERFORATED RETURN PANEL.
	24"X24" LAY–IN PERFORATED RETURN PANEL.
	24"X24" LAY–IN PERFORATED RETURN PANEL. W/INSULATED BOOT.
	NEW CEILING MOUNTED SUPPLY DIFFUSER.
RD	NEW CEILING MOUNTED FIRE RATED DIFFUSER ASSEMBLY CONSISTING OF DIFFUSER, RADIATION DAMPER AND RADIATION BLANKET.
	EXISTING CEILING MOUNTED SUPPLY TO REMAIN.
	RELOCATED CEILING MOUNTED SUPPLY.
	NEW LINEAR SLOT CEILING DIFFUSER.
U	DOOR UNDERCUT TO BE USED FOR AIR TRANSFER. UNDERCUT TO BE 1" U.O.N.
	BASEBOARD HEATER.

STRUCTURAL GENERAL NOTES

1. LIVE LOADS USED IN DESIGN:
   - A. SEISMIC ..... ZONE 1
   - B. WIND ..... 1997 UBC 70 MPH EXPOSURE C
   - C. ROOF ..... 23 PSF
   - D. CORRIDORS AND EXIT STAIRS ..... 100 PSF
   - E. PARTITIONS ..... 5 PSF
   - F. FLOORS ..... 40 PSF
2. BUILDING EARTHWORK:
   - A. BUILDING POST TENSIONED FOUNDATION SYSTEM SHALL BE DESIGNED, DETAILED, STAMPED, AND CONSTRUCTED UNDER A SEPARATE PERMIT. REFER TO SHEET S-1 FOR REQUIREMENTS.
   - B. SOIL DATA FOR MISCELLANEOUS FOOTINGS ONLY WAS TAKEN FROM RECOMMENDATIONS CONTAINED IN REPORT #2103 BY GEOTECHNICAL ENGINEERING GROUP, INC., DATED NOVEMBER 3, 2005.
   - C. FOOTING DESIGN:
     1. ALLOWABLE SOIL BEARING PRESSURE - (TOTAL LOAD) ..... 1500 PSF
     2. FOOTINGS SHALL BEAR ON AT LEAST 3 FT. OF WELL COMPACTED STRUCTURAL FILL MATERIAL AS SPECIFIED BELOW FROST DEPTH OF 26 INCHES. EXTEND FILL MATERIAL AT LEAST 3 FT. BEYOND EDGE OF FOOTINGS.
     3. PROTECT BOTTOMS OF EXCAVATION AGAINST FROST AND KEEP FREE OF WATER, DEBRIS AND LOOSE MATERIAL. SOIL BECOMING UNSUITABLE FOR BEARING MUST BE REMOVED.
     4. NO EXCAVATION FOR PIPES, CONDUITS, ETC. ADJACENT AND BELOW BOTTOM OF FOUNDATIONS SHALL BE ALLOWED UNLESS THE SLOPE BETWEEN EDGES OF FOUNDATIONS AND EXCAVATION DOES NOT EXCEED 1:1.
   - D. A QUALIFIED SOILS ENGINEER SHALL INSPECT THE EXCAVATIONS TO VERIFY THE BEARING MATERIAL.
   - E. PROVIDE ALL BRACING NECESSARY TO SUPPORT ALL WALLS AND PREVENT THEIR BUCKLING DURING FILLING AND COMPACTING OPERATION.
   - F. COMPACTION TO BE AS RECOMMENDED IN THE SOIL REPORT UNLESS OTHERWISE SPECIFIED.
3. CAST-IN-PLACE CONCRETE:
   - A. ALLOWABLE STRESSES USED IN DESIGN:
     1. ALL CONCRETE IN CONTACT WITH SOILS SHALL BE MADE WITH STONE AGGREGATE AND TYPE V CEMENT AND SHALL DEVELOP THE FOLLOWING COMPRESSIVE STRENGTHS IN 28 DAYS:
        - A) FOOTINGS, FOUNDATION WALLS ..... 3000 PSI
        - B) EXTERIOR FLATWORK ..... 4000 PSI

        ADDITION OF ANY ADMIXTURES SHALL BE APPROVED BY THE STRUCTURAL ENGINEER. ALL CONCRETE IN CONTACT WITH SOILS OR EXPOSED TO DE-ICING SALTS SHALL BE MADE USING TYPE V CEMENT. USE NO CALCIUM CHLORIDE.
     2. REINFORCING BARS SHALL CONFORM TO ASTM A615 GRADE 60, EXCEPT TIES, STIRRUPS AND EMBEDDED PLATE ANCHORS WHICH SHALL CONFORM TO ASTM A615 GRADE 40. BARS TO BE WELDED SHALL CONFORM TO ASTM A706. DO NOT REBEND ANY BARS WITH A YIELD POINT GREATER THAN 40,000 PSI.
   - B. REINFORCEMENT PROTECTION:
     1. CONCRETE POURED AGAINST EARTH ..... 3"
     2. CONCRETE POURED IN FORMS BUT EXPOSED TO WEATHER OR EARTH ..... 2"
   - C. DETAIL BARS IN ACCORDANCE WITH ACI DETAILING MANUAL AND ACI CODE, LATEST EDITION.
   - D. PROVIDE ALL ACCESSORIES NECESSARY TO SUPPORT REINFORCING AT POSITIONS SHOWN ON THE PLANS IN ACCORDANCE WITH ACI DETAILING MANUAL.
   - E. CONTRACTOR SHALL REQUEST ARCHITECT/ENGINEER TO INSPECT REINFORCING AND OBTAIN HIS AUTHORIZATION TO PROCEED WITH CONCRETE POUR.
4. STEEL:
   - A. STRUCTURAL STEEL SHALL CONFORM TO ASTM A992 GRADE 50, EXCEPT PIPE COLUMNS SHALL BE ASTM A53 GRADE B AND TUBE COLUMNS SHALL BE ASTM A500 GRADE B.
   - B. STEEL BOLTS SHALL CONFORM TO ASTM A307.
   - C. THREADED ANCHOR RODS SHALL CONFORM TO ASTM F1554 WITH EMBEDDED NUTS.
   - D. STRUCTURAL STEEL TO BE DETAILED AND FABRICATED IN ACCORDANCE WITH AISC SPECIFICATIONS, LATEST EDITION, AND WITH AISC CODE OF STANDARD PRACTICE, LATEST EDITION.
   - E. CONNECTIONS NOT SPECIFIED ON DRAWINGS SHALL BE DETAILED TO HAVE CAPACITY NOT LESS THAN 1/2 TOTAL UNIFORM LOAD CAPACITY TABULATED IN AISC MANUAL FOR "ALLOW. LOADS ON BEAMS" FOR GIVEN SHAPE, SPAN AND STEEL SPEC. OF BEAM IN QUESTION. DO NOT USE ONE-SIDED WEB CONNECTIONS UNLESS DOUBLE SIDED CONNECTIONS CANNOT BE MADE.
   - F. ALL WELDING OR GAS CUTTING SHALL BE IN ACCORDANCE WITH THE CURRENT STANDARDS OF THE AMERICAN WELDING SOCIETY. ALL WELDING SHALL BE PERFORMED BY WELDERS QUALIFIED BY A.W.S. STANDARD QUALIFICATION PROCEDURE, CURRENTLY CERTIFIED.
   - G. SINGLE-PASS FILLET FIELD WELDS ARE DESIGNED TO BE STRESSED TO LESS THAN 50% OF ALLOWABLE STRESSES.
   - H. GROUT ALL BASE PLATES WITH NON-SHRINK GROUT.
   - I. ATTACH NON-COMPOSITE FORM DECK WITH 3 PUDDLE WELDS PER SHEET AT END LAPS AND WELD EACH EDGE AT INTERMEDIATE SUPPORTS. USE 16 GAGE MINIMUM WELDING WASHER WITH 3/8" DIA. HOLES.
   - J. ERECTION SEQUENCE MUST ACCOMMODATE THERMAL EXPANSION/CONTRACTION FORCES UNTIL BUILDING IS ENCLOSED AND HEATED. DO NOT MAKE WELDED OR FIXED CONNECTIONS OF BEAMS INTO CONCRETE OR MASONRY AT TEMPERATURES WHICH WILL LATER CHANGE SIGNIFICANTLY.
5. WOOD:
   - A. FRAMING LUMBER SHALL BE STRESS GRADED DOUGLAS FIR-LARCH AS FOLLOWS:
     1. JOISTS, BEAMS AND COLUMNS ..... "NO. 2"
     2. EXTERIOR BEARING WALL STUDS ..... "NO. 2"
     3. INTERIOR BEARING WALL STUDS ..... "NO. 2"
     4. BLOCKING AND BRIDGING ..... "NO. 2 OR NO. 3"
   - B. PROVIDE 1" X 4" OR EQUIVALENT CROSS BRIDGING NOT OVER 8' O.C. FOR ALL WOOD JOISTS. NOT BCI'S
   - C. PROVIDE 2X SOLID BLOCKING BETWEEN JOISTS AT ALL SUPPORTS. PER REV FULCRUM SITE VISIT
   - D. SET ALL JOISTS WITH CROWN UP.
   - E. LAMINATED MEMBERS TO BE DETAILED IN ACCORDANCE WITH "STANDARD SPECIFICATIONS FOR THE DESIGN AND FABRICATION OF STRUCTURAL GLUED LAMINATED LUMBER", WESTERN WOOD PRODUCTS ASSOCIATION AND AMERICAN INSTITUTE OF TIMBER CONSTRUCTION STANDARDS.
   - F. LAMINATED VENEER LUMBER (LVL) SHALL BE "MICRO-LAM" AS MANUFACTURED BY THE TRUS-JOIST CORP. OR "VERSA-LAM" AS MANUFACTURED BY BOISE CASCADE CORP.. MINIMUM MODULUS OF ELASTICITY SHALL BE 1.9 X 106 PSI.
   - G. ALLOWABLE UNIT STRESSES FOR LAMINATED MEMBERS:
     1. BENDING ..... 2200 PSI
     2. TENSION PARALLEL TO GRAIN ..... 1000 PSI
     3. COMPRESSION PARALLEL TO GRAIN ..... 1500 PSI
     4. HORIZONTAL SHEAR ..... 165 PSI
     5. COMPRESSION PERPENDICULAR TO GRAIN (TENSION FACE) ..... 450 PSI
     6. COMPRESSION PERPENDICULAR TO GRAIN (COMPRESSION FACE) ..... 385 PSI
   - H. LAMINATED BEAMS ARE TO BE BUILT UP OF 2X NOMINAL MATERIAL.
   - I. LAMINATED MEMBER SIZES ARE NET; OTHER MEMBER SIZES ARE NOMINAL.
   - J. ALLOWABLE UNIT STRESSES MUST BE SHOWN ON FABRICATOR'S SHOP DRAWINGS.
   - K. TIMBER CONNECTORS CALLED FOR ON THE DRAWINGS ARE AS MANUFACTURED BY SIMPSON COMPANY. CONNECTORS BY OTHER MANUFACTURERS MAY BE USED IF THE LOAD CAPACITY IS EQUAL TO OR GREATER THAN THE CONNECTOR SPECIFIED. USE MANUFACTURER'S FURNISHED NAILS AND BOLTS.
   - L. ALL COLUMNS SHOWN ON THE STRUCTURAL DRAWINGS SHALL BE CONTINUOUS UNLESS OTHERWISE SHOWN. BUILT-UP COLUMNS USING 2 OR MORE 2X MEMBERS SHALL BE NAILED TOGETHER WITH 16d NAILS AT 9" ON CENTER MAXIMUM. PLACE 1/2 OF NAILS FROM EACH SIDE.
   - M. FASTEN ALL WOOD MEMBERS WITH COMMON NAILS ACCORDING TO THE 1997 UBC FASTENING SCHEDULE UNLESS OTHERWISE NOTED.
   - N. FOUNDATION SILL PLATES SHALL BE ANCHORED WITH ANCHOR ROD SIZE AND SPACING AS NOTED ON THE DRAWINGS.
   - O. PLYWOOD FOR ROOF, WALL AND FLOOR SHEATHING SHALL BE APA GRADE TRADEMARKED "STANDARD C-D" AND SHALL CONFORM TO STANDARD PS 1 OF THE AMERICAN PLYWOOD ASSOCIATION (USE EXTERIOR GLUE AT ROOF AND BALCONIES). RESIN COATED OR CEMENT COATED NAILS SHALL BE USED ON FLOOR SHEATHING.
   - P. PLYWOOD THICKNESS SHALL BE AS NOTED ON THE DRAWINGS; IDENTIFICATION INDEX NUMBERS SHALL BE AS REQUIRED FOR SUPPORT SPACING AND USE.
   - Q. MANUFACTURED JOISTS SHALL BE "TRUS-JOISTS" BY TRUS JOIST MacMILLAN, "WSI" JOISTS OR "WBS" JOISTS BY WEYERHAEUSER COMPANY, OR "BCI" JOISTS BY BOISE CASCADE CORPORATION AND SHALL BE ERECTED IN ACCORDANCE WITH THE MANUFACTURER'S RECOMMENDATIONS. ALL PLATES, BLOCKING, BRIDGING AND OTHER RELATED ITEMS SHALL BE FURNISHED BY THE MANUFACTURER.
   - R. PREFABRICATED WOOD TRUSSES USING METAL PLATE CONNECTORS SHALL BE DESIGNED AND MANUFACTURED IN ACCORDANCE WITH THE I.C.B.O. APPROVAL RECOMMENDATIONS, INCLUDING QUALITY CONTROL INSPECTIONS BY INDEPENDENT TESTING AGENCY. METAL PLATES SHALL BE SIZED TO NEGLECT 1/4" MIN. AREA FROM THE FACE OF THE MEMBER EXCEPT 1/2" MIN. AREA SHALL BE NEGLECTED ALONG THE TENSION INTERFACE. SUBMIT SHOP DRAWINGS, I.C.B.O. RESEARCH REPORT, AND DESIGN CALCULATIONS BEARING THE STAMP AND ORIGINAL SIGNATURE OF A PROFESSIONAL ENGINEER REGISTERED IN THE STATE OF COLORADO.
   - S. ROOF TRUSSES:
     1. PROVIDE HANGERS OR CONNECTORS AS REQUIRED TO SUPPORT THE LOADS OF ALL MEMBERS FRAMING INTO ANY TRUSS OR GIRDER TRUSS. SIZE BOTTOM CHORD OR OTHER SUPPORTING MEMBER TO FULLY DEVELOP THE REQUIRED HANGER CAPACITY.
6. ALL DIMENSIONS ON STRUCTURAL DRAWINGS TO BE CHECKED AGAINST ARCHITECTURAL.
7. ARCHITECT'S APPROVAL MUST BE SECURED FOR ALL SUBSTITUTIONS.
8. VERIFY ALL OPENINGS THROUGH FLOOR, ROOF, AND WALLS WITH MECHANICAL AND ELECTRICAL DRAWINGS. COORDINATE FLOOR JOIST SPACING TO MISS WASTE, DRAIN, AND VENT PENETRATIONS.
9. THE CONTRACTOR MUST SUBMIT IN WRITING ANY REQUESTS FOR MODIFICATIONS TO THE PLANS AND SPECIFICATIONS. SHOP DRAWINGS SUBMITTED TO THE ENGINEER FOR HIS REVIEW DO NOT CONSTITUTE "IN WRITING" UNLESS IT IS NOTED THAT SPECIFIC CHANGES ARE BEING REQUESTED. CHANGES BY MEANS OF SHOP DRAWINGS BECOME THE SOLE RESPONSIBILITY OF THE CONTRACTOR.

Subcontractor RFI Number:	n/a	**Drawing Number:**	M1, M2
Specification Section:	15000		

Subject: Ron,

The State electrical inspector disapproved the location of the EF-1 exhaust fans in the 1 and 2 bedroom units. The fans are located above the tubs which does not meet electrical code. We will have to move the location of the exhaust fans in buildings A, B, E, F, G, and the Community Building. The fans are already installed in all of the building except the Community Building. Buildings G and F are already drywalled. Please specify where you would like each of the exhaust fans to be relocated.

Thank you.

Re: RFI 34 & 35

Dear Mike,

The following information is additional information and clarification to the drawings dated May 05, 2006:

Regarding RFI #34 from Schauer Construction.

1 – The EF-1 fans can be located as relocated in the field and approved by the state inspector.

Regarding RFI #35 from Schauer Construction.

1 – Specifications indicate a knock down finish on the walls, and an orange peel finish of the ceilings. The contractor may provide a light orange peel finish of the walls in lieu of the knock down finish.

Sincerely,

Ron Faleide

Subject: Todd,

See attached Sketch. In location A the 4" exhaust is within 5 foot of the party wall. It is also too close to the operable window L. This exhaust needs to be relocated. Please advise . In location B the SD-1 diffuser is located in the header of the pocket door. If we move it to the left of pocket door we would be hitting the electrical panel.

The only solution I can see for both of these problems would be create a soffit to reroute all of these lines.

Mike Mitzner

Re: RFI 37, 38, 39, & 40

Dear Mike,

The following information is additional information and clarification to the drawings dated May 05, 2006:

Regarding RFI #37 from Schauer Construction.

1 – The HVAC diffuser locations dated 03.29.07 are acceptable to us. The condensing unit locations as described are acceptable to us. Please note the comments by Belfay Engineers regarding the type of diffuser used.

Regarding RFI #38 from Schauer Construction.

1 – The dropped ceiling in the manager's unit bathroom may be eliminated.

Regarding RFI #39 from Schauer Construction.

1 – Please provide half round gutters and round downspouts at all locations.

Regarding RFI #40 from Schauer Construction.

1 – The connection as described is acceptable. Please see the attached email from Ron Fakidis.

Sincerely,

Ron Fakidis

GENERAL PLUMBING PROVISIONS

1. WORK INCLUDED.

   PROVIDE COMPLETE AND OPERATING PLUMBING SYSTEMS. THE WORK ALSO INCLUDES THE COMPLETION OF DETAILS NOT MENTIONED OR SHOWN WHICH ARE NECESSARY FOR THE SUCCESSFUL OPERATION OF ALL SYSTEMS. SEE "HVAC, PLUMBING, ELECTRICAL AND GENERAL CONTRACTOR COORDINATION SCHEDULE" FOR DIVISION OF WORK.

2. PLUMBING DRAWINGS.

   PLUMBING DRAWINGS ARE DIAGRAMMATIC AND ARE NOT TO BE SCALED FOR DIMENSIONS. TAKE ALL DIMENSIONS FROM ARCHITECTURAL DRAWINGS, CERTIFIED EQUIPMENT DRAWINGS AND FROM THE STRUCTURE ITSELF BEFORE FABRICATING ANY WORK. VERIFY SPACE REQUIREMENTS, COORDINATING WITH OTHER TRADES, AND INSTALL THE SYSTEMS IN THE SPACE PROVIDED WITHOUT VIOLATION OF APPLICABLE CODES, STANDARDS, SPECIFICATION REQUIREMENTS, OR EXTRA CHARGES TO THE OWNER.

3. VERIFICATION OF FIELD CONDITIONS.

   BEFORE UNDERTAKING EACH PART OF THE WORK, CAREFULLY STUDY AND COMPARE THE CONTRACT DOCUMENTS WITH FIELD MEASUREMENTS. PROMPTLY REPORT IN WRITING TO THE MECHANICAL ENGINEER ANY CONFLICT, ERROR OR DISCREPANCY.

4. EQUIPMENT AND FIXTURES FURNISHED BY OTHERS.

   COORDINATE EXACT REQUIREMENTS OF EQUIPMENT AND FIXTURES FURNISHED BY OTHERS BEFORE PERFORMING ANY WORK.

5. PERMITS.

   APPLY FOR AND PAY FOR ALL PERMITS, FEES, LICENSES AND INSPECTIONS FOR THIS DIVISION OF WORK.

6. CODES.

   COMPLY WITH ALL APPLICABLE CODES AND UTILITY COMPANY REGULATIONS. IN CASE OF CONFLICT WITH THE CONTRACT DOCUMENTS THE MOST STRINGENT SHALL GOVERN.

7. ACCESS DOORS.

   FURNISH ACCESS DOORS TO PROVIDE ACCESS TO ALL FIRE DAMPERS, VALVES, BALANCING DAMPERS, AND OTHER EQUIPMENT REQUIRING ACCESS. ACCESS DOORS FOR INSTALLATION IN FIRE RATED CONSTRUCTION SHALL HAVE APPROPRIATE FIRE RATING.

8. SPECIFIED MANUFACTURERS AND ALTERNATES.

   AN ACCEPTABLE MANUFACTURER'S NAME AND MODEL NUMBER OF A PRODUCT MAY BE GIVEN FOR AN EXAMPLE. THIS IS THE EQUIPMENT CONTEMPLATED DURING THE DESIGN PROCESS AND FORMS THE BASIS OF A STANDARD OF QUALITY. VERIFY THE MODEL NUMBER IS STILL ACCURATE AND MEETS ALL THE REQUIREMENTS AS SHOWN ON THE DRAWINGS. IF THERE IS A DISCREPANCY BETWEEN THE REQUIREMENTS OF THE DRAWINGS AND THE MODEL NUMBER, THE REQUIREMENTS OF THE DRAWINGS SHALL GOVERN. APPROVED EQUALS SHALL BE ALLOWED UNLESS OTHERWISE NOTED.

9. SUBMITTALS.

   A. REQUIRED SUBMITTALS.

      SUBMIT 5 COPIES OF THE FOLLOWING INFORMATION FOR APPROVAL. ORDER NO MATERIALS OR BEGIN NO WORK UNTIL ALL SUBMITTALS ARE RETURNED APPROVED.

      1.) ALL SCHEDULED FIXTURES AND EQUIPMENT.
      2.) CONTROLS AND CONTROL DIAGRAMS.
      3.) SHOP DRAWINGS REQUIRED TO BE SUBMITTED FOR APPROVAL.
      4.) OTHER INFORMATION SPECIFICALLY REQUIRED TO BE SUBMITTED FOR APPROVAL.

   B. REVIEW TIME.

      ALLOW 5 WORKING DAYS FOR REVIEW OF SUBMITTALS.

   C. RESUBMISSION.

      MAKE ALL REVISIONS REQUIRED AND RESUBMIT AS REQUIRED FOR INITIAL SUBMITTAL.

10. WARRANTIES.

    GUARANTEE ALL WORKMANSHIP, MATERIAL AND EQUIPMENT AND REPLACE ANY FOUND DEFECTIVE WORK WITHOUT COST TO THE OWNER, FOR A PERIOD OF ONE YEAR AFTER FINAL ACCEPTANCE.

11. OPERATION AND MAINTENANCE MANUALS.

    SUBMIT 3 COPIES BOUND IN 8-1/2" X 11" THREE RING, LOOSE LEAF BINDERS.

12. MATERIALS.

    ALL MATERIALS AND EQUIPMENT SHALL BE NEW UNLESS OTHERWISE SPECIFIED.

13. INSTALLATION OF EQUIPMENT.

    A. GENERAL.

       INSTALL ALL WORK IN ACCORDANCE WITH MANUFACTURERS RECOMMENDATIONS. ARRANGE ALL EQUIPMENT TO PERMIT EASY REMOVAL OF COILS, MOTORS, FILTERS, AND ALL OTHER PARTS WHICH MIGHT REQUIRE PERIODIC REPLACEMENT OR MAINTENANCE.

    B. SPACE PREFERENCE.

       WHERE CONFLICTS OCCUR THE FOLLOWING PREFERENCE SCHEDULE SHALL BE USED:

       1.) RECESSED ELECTRICAL LIGHT FIXTURES.
       2.) DUCTWORK.
       3.) SPRINKLER PIPING.
       4.) SOIL, WASTE, VENT AND STORM PIPING.
       5.) LIQUID HEAT TRANSFER AND REFRIGERANT PIPING.
       6.) DOMESTIC WATER PIPING.
       7.) ELECTRICAL CONDUITS.

       ITEMS #2 SHALL NOT HAVE PREFERENCE OVER ITEM #4 BELOW PLUMBING FIXTURES, OR OVER ITEM #7 ABOVE OR BELOW ELECTRIC SWITCH GEAR AND PANELS. NO PIPING CONVEYING FLUIDS SHALL BE INSTALLED DIRECTLY OVER ELECTRICAL EQUIPMENT.

14. PIPE INSULATION.

    NO INSULATION IS REQUIRED UNLESS SPECIFICALLY CALLED OUT ON THE PLANS.

Re: RFI 03 – drain for back flow preventor

Dear Mike,

The following information is additional information and clarification to the drawings dated May 05, 2006.

At the mechanical rooms labeled 'Fire' on the plans, provide an air gap drain for the backflow preventor to be piped out the exterior wall and drained to the adjacent landscaping. Provide a concrete splash block to catch the spill from the drain. Direct flow of water away from building.

Sincerely,

Todd Townsend

Subject: Todd,

Since the sanitary sewer run for the Community Building is greater than 80 feet we need to install a clean out. Chris Wilson has proposed to place this clean out in the new "linen closet" where the Fire room used to be. Is this acceptable?

Thank you.

Hello Mike,
Yes, we need a hose bib. I would suggest at the West Entry (the 'front'.) Perhaps in the wall between the two baths in the manager's unit?
Thanks,
Ron

Subject: Hose Bibs at Community Building

Good Morning All,
I was talking with Chris this morning on the telephone and he indicated that we do not have any hose bib's on the Community Building. Do you want to add hose bib's for cleaning of sidewalks, washing down building ect.? The cost would be approximately $250.00 each from the plumber plus mark ups. Please respond back with comments.

GENERAL ELECTRICAL PROVISIONS

1. ELECTRICAL DRAWINGS.

   ELECTRICAL DRAWINGS ARE DIAGRAMMATIC AND ARE NOT TO BE SCALED FOR DIMENSIONS. TAKE ALL DIMENSIONS FROM ARCHITECTURAL DRAWINGS, CERTIFIED EQUIPMENT DRAWINGS AND FROM THE STRUCTURE ITSELF BEFORE FABRICATING ANY WORK. VERIFY SPACE REQUIREMENTS, COORDINATING WITH OTHER TRADES, AND INSTALL THE SYSTEMS IN THE SPACE PROVIDED WITHOUT VIOLATION OF APPLICABLE CODES, STANDARDS, SPECIFICATION REQUIREMENTS, OR EXTRA CHARGES TO THE OWNER.

   BELFAY ENGINEERING WILL OCCASIONALLY PROVIDE PERFORMANCE SPECIFICATIONS FOR CERTAIN SUB-SYSTEMS OF THE DESIGN. ESPECIALLY SYSTEMS THAT RELY ON PROPRIETARY PARTS. IN SUCH CASES, IT IS TO BE UNDERSTOOD THAT BELFAY ENGINEERING IS RESPONSIBLE FOR A THOROUGH AND COHESIVE PERFORMANCE SPEC AND REVIEW OF SHOP DRAWINGS. THE CONTRACTOR IS RESPONSIBLE FOR FURNISHING SHOP DRAWINGS AND INSTALLING A WORKING SYSTEM CONSISTENT WITH THE PERFORMANCE SPEC.

2. VERIFICATION OF FIELD CONDITIONS.

   BEFORE UNDERTAKING EACH PART OF THE WORK, CAREFULLY STUDY AND COMPARE THE CONTRACT DOCUMENTS WITH FIELD MEASUREMENTS. PROMPTLY REPORT IN WRITING TO THE ELECTRICAL ENGINEER ANY CONFLICT, ERROR OR DISCREPANCY.

3. EQUIPMENT FURNISHED BY OTHERS.

   COORDINATE EXACT ELECTRICAL REQUIREMENTS (VOLTAGE, PHASE, AMPS, AND ETC.) OF EQUIPMENT FURNISHED BY OTHERS BEFORE PERFORMING WORK.

4. PERMITS.

   APPLY FOR AND PAY FOR ALL PERMITS, FEES, LICENSES AND INSPECTIONS FOR THIS DIVISION OF WORK.

5. CODES.

   COMPLY WITH ALL APPLICABLE CODES AND UTILITY COMPANY REGULATIONS. IN CASE OF CONFLICT WITH THE CONTRACT DOCUMENTS THE MOST STRINGENT SHALL GOVERN.

6. ACCESS DOORS.

   FURNISH ACCESS DOORS TO PROVIDE ACCESS TO ALL J-BOXES, PULL BOXES, AND OTHER EQUIPMENT AS REQUIRED. ACCESS DOORS FOR INSTALLATION IN FIRE RATED CONSTRUCTION SHALL HAVE APPROPRIATE FIRE RATING.

7. ADDING LOADS NOT SHOWN ON THE DRAWINGS.

   BEFORE ADDING ANY LOAD NOT SHOWN ON THE PLANS, TO THE ELECTRICAL SYSTEM, SUBMIT REQUEST IN WRITING TO THE ELECTRICAL ENGINEER FOR APPROVAL.

8. SPECIFIED MANUFACTURERS.

   AN ACCEPTABLE MANUFACTURER'S NAME AND MODEL NUMBER OF A PRODUCT MAY BE GIVEN FOR AN EXAMPLE. THIS IS THE EQUIPMENT CONTEMPLATED DURING THE DESIGN PROCESS AND FORMS THE BASIS OF A STANDARD OF QUALITY. VERIFY THE MODEL NUMBER IS STILL ACCURATE AND MEETS ALL THE REQUIREMENTS AS SHOWN ON THE DRAWINGS. IF THERE IS A DISCREPANCY BETWEEN THE REQUIREMENTS OF THE DRAWINGS AND THE MODEL NUMBER, THE REQUIREMENTS OF THE DRAWINGS SHALL GOVERN. APPROVED EQUALS SHALL BE ALLOWED UNLESS OTHERWISE NOTED.

9. SUBMITTALS.

   A. REQUIRED SUBMITTALS.

      SUBMIT 5 COPIES OF THE FOLLOWING INFORMATION FOR APPROVAL.

      1.) SERVICE EQUIPMENT, PANELBOARDS, LOAD CENTERS, SWITCHES, FUSES, AND CIRCUIT BREAKERS.

      2.) LIGHTING FIXTURES.

      3.) WIRING DEVICES AND DEVICE PLATES.

      4.) FIRE ALARM SHOP DRAWINGS INCLUDING CUT SHEETS ON FACP AND ALL DEVICES. PROVIDE BATTERY CALCULATIONS AND SEQUENCE OF OPERATION.

   B. REVIEW TIME.

      ALLOW 5 WORKING DAYS FOR REVIEW OF SUBMITTALS. ORDER NO MATERIALS OR BEGIN NO WORK UNTIL ALL SUBMITTALS ARE RETURNED APPROVED.

   C. RESUBMISSION.

      MAKE ALL REVISIONS REQUIRED AND RESUBMIT AS REQUIRED FOR INITIAL SUBMITTAL.

10. MISCELLANEOUS MATERIALS

    A. THE ELECTRICAL CONTRACTOR SHALL PROVIDE ALL MISCELLANEOUS HARDWARE AND MATERIAL NOT SPECIFIED BUT NECESSARY TO PROVIDE A COMPLETE AND WORKING ELECTRICAL SYSTEM. THIS HARDWARE SHALL INCLUDE, BUT NOT BE LIMITED TO, MISCELLANEOUS CONDUIT FITTINGS AND MOUNTING HARDWARE, LIGHT FIXTURE MOUNTING HARDWARE, BRACKETS, CONNECTORS, CORDS AND PLUGS.

11. WARRANTIES.

    GUARANTEE ALL WORKMANSHIP, MATERIAL AND EQUIPMENT AND REPLACE ANY FOUND DEFECTIVE WORK WITHOUT COST TO THE OWNER, FOR A PERIOD OF ONE YEAR AFTER FINAL ACCEPTANCE.

ELECTRICAL MATERIALS AND METHODS

PART 1 GENERAL

1.1 THIS SECTION DESCRIBES THE MATERIALS AND METHODS COMMON TO THE ELECTRICAL DIVISION OF WORK.

PART 2 PRODUCTS

2.1 RACEWAY SYSTEMS.

A. ABOVE GROUND INTERIOR.

HOT DIP GALVANIZED AS REQUIRED BY CODE OF EMT, IMC, OR RMC.

B. BURIED AND UNDER CONCRETE SLABS.

SCHEDULE 40 PVC W/ASPHAULT COATED RMC ELBOWS WHERE PENETRATING SURFACE.

2.2 CABLE SYSTEMS.

CONCEALED SPACES ONLY, TYPE AC OR MC CABLE AS ALLOWED BY CODE.

2.3 CONDUCTORS.

A. CONDUCTORS SHALL BE COPPER EXCEPT AS OTHERWISE NOTED.

B. INSULATION SHALL BE THWN-THHN EXCEPT AS OTHERWISE NOTED.

2.4 PANELBOARDS.

PROVIDE PANELBOARDS W/BOLT-ON CIRCUIT BREAKERS WHERE INDICATED ON DRAWINGS WITH A PLAN CODE BEGINNING WITH "PB". SEE PANEL SCHEDULE FOR CAPACITY, RATINGS, SPACES, VOLTAGE, PHASE, MOUNTING, AND OTHER OPTIONS TO BE PROVIDED.

2.5 LOAD CENTERS.

PROVIDE LOAD CENTERS W/PUSH-ON CIRCUIT BREAKERS WHERE INDICATED ON DRAWINGS WITH A PLAN CODE BEGINNING WITH "LC". SEE PANEL SCHEDULE FOR CAPACITY, RATINGS, SPACES, VOLTAGE, PHASE, MOUNTING, AND OTHER OPTIONS TO BE PROVIDED.

PART 3 EXECUTION.

3.1 RACEWAY SYSTEMS.

A. RUN CONDUIT PARALLEL WITH AND AT RIGHT ANGLES TO BUILDING LINES.

B. PROVIDE 1 EMPTY 3/4" CONDUIT FOR EVERY 3 UNUSED SPACES IN FLUSH MOUNTED PANELBOARDS OR LOAD CENTERS. TERMINATE EMPTY CONDUIT IN A JUNCTION BOX WHICH IS ACCESSIBLE.

C. PROVIDE FLEXIBLE CONDUIT ON CONNECTIONS TO VIBRATING EQUIPMENT. CONDUIT AND GROUNDING MEANS SHALL BE PER NEC.

3.2 IDENTIFICATION OF EQUIPMENT.

A. IDENTIFY EACH DISCONNECT SWITCH, XFMR, PANELBOARD, LOAD CENTER, AND ALL OTHER ELECTRICAL EQUIPMENT IDENTIFIED BY A PLAN CODE ON THE DRAWINGS.

B. NAMEPLATES SHALL BE ENGRAVED IN LAMINATED PLASTIC, 3/8" HIGH AND ATTACHED WITH SCREWS.

C. ALL PANELBOARDS AND LOAD CENTERS SHALL HAVE TYPEWRITTEN DIRECTORIES INSERTED ON THE INSIDE FACE OF THE DOOR IDENTIFYING EACH CIRCUIT.

D. ALL COMPONENTS OF EMERGENCY CIRCUITS SHALL BE PAINTED RED.

Colorado Springs, CO 80925

Re: RFI#4 Sunshine Peak Apartments – Montrose, CO

1. RFI #1 shows electrical service location not agreed to by DMEA and has been shifted to the opposite side of the Buildings D and E as allowed by drawings E2.E3, and E7. Subsequent sketches have now appeared which reflect these changes but, now show TV and phone service for Building F to be on the opposite side of this building from the Bonanza and Quest lines. Apartment home runs have been pulled to the left side of the building to facilitate construction inside; we request they remain as pulled to alleviate additional cost and time. This RFI was requested by your field staffing.
2. RFI #10 that outdoor receptacles are required at the front and back of grade level units, but don't show locations. The best location we have found the best location to be one stud bay over from the door, to help avoid a crowded look. The town homes required moving the light to hinged side due to close proximity of the bedroom window, ref. drawing A07. This will lessen sight line light in the bedrooms, as these lights are controlled by a photocell. The field office has agreed to this pending approval of the walk through by the architect/buildings D, E, F, and G have been wired this way, we request they remain as pulled to alleviate additional cost and time.
3. Drawing E4 for the town homes doesn't show a smoke detector in the stairway. Our fire alarm subcontractor, pointed out that one may be required within 3 ft of the vertical peak of this ceiling by fire code, although not required by the NEC. This concern has been brought to your attention at the last several sub meetings, and we haven't yet received an answer as to how you would like us to proceed with this. The town homes in buildings F and G have passed our inspection, and ready for insulation and sheet rock.

Thank you, for your prompt attention to these items.

RFI #30

Subcontractor RFI Number:	6	**Drawing Number:**	Sketches
Specification Section:	16000		

Subject: Ron,

The following is an RFI from Professional Electric.

Per the 1/8" scaled sketches you provided for the left side of Building A, the stacked meter assembly has taken up the space between the small window and posts for the stairway platform as shown. Although the house panel can be mounted to the left of these posts, it will be over a concrete slab poured completely under this stairway out 3'-6" from the building, prohibiting underground conduits stubbing up into the house panel for site lighting. This slab also presents a problem for TV, telephone and fire alarm underground feeds. Your recommendation in this matter would be greatly appreciated.

Specification Section:	16000		

Subject: Ron,

Professional Electric has brought this item to our attention and has written the following RFI. Please Advise.

Thank you.

1-E-1 Sheet note states:
1."All site lighting is to be controlled with time clocks and photo cells one per building."
The problem with this is that the panel schedules show 1 circuit for building lighting, and 2 circuits for site lighting. Photocells are single pole. We propose to install a 3 pole lighting contactor to correct the issue of trying to switch 3 poles with a single pole photocell. We also recommend against installing a time clock as it is one additional feature which will have no benefit in this application, and will be one additional item to cause future maintenance issues.

Subcontractor RFI Number:	8	**Drawing Number:**	E1
Specification Section:	16000		

Subject: Ron,

Professional Electric has brought this item to our attention and has written the following RFI. Please Advise.

Thank you.

1-E-1 Sheet note states:
1."All site lighting is to be controlled with time clocks and photo cells one per building."
The problem with this is that the panel schedules show 1 circuit for building lighting, and 2 circuits for site lighting. Photocells are single pole. We propose to install a 3 pole lighting contactor to correct the issue of trying to switch 3 poles with a single pole photocell. We also recommend against installing a time clock as it is one additional feature which will have no benefit in this application, and will be one additional item to cause future maintenance issues.

Dave Rose
SCHAUER CONSTRUCTION COMPANY, INC.
Dave Rose

REPLY:

Yes,
Lighting contactors are an acceptable solution.
John C. Kinsman

RFI #10

November 14, 2006

Dave Rose
Shauer Construction Company, Inc.
POB 25460
Colorado Springs, CO 08935

Re: Sunshine Peak Apartments – Montrose, CO

Dave – Please find the two items below in which we would appreciate further clarification.

1 – Note #5 on Drawing E4 requires receptacles to be mounted 18" AFF and switches 48" AFF regardless of being standard or ADA units. Please verify that this measurement from sub floor to the bottom of electrical boxes to be accurate. Should kitchen counter receptacles be 44" in a similar manner? What about receptacles at bathroom vanities? What is the mounting height of fire alarm horn/strobes?

2 – What is the mounting height of outdoor wall sconces? Outdoor receptacles are not shown, but required per NEC 210.52(E). Please provide locations, mounting height, and circuit numbers.

Thank you,

Steve Eberling

Schedule Impact:	possible	**Subcontractor RFI Date:**	11/21/2006
Subcontractor RFI Number:	2	**Drawing Number:**	multiple
Specification Section:	16000		

Subject: Todd and John,

I received the following RFI from Professional Electric. Please Advise.

1. Electrical drawings don't provide circuit number for range hoods as shown on Architectural drawings of a kitchen. Please specify circuit #.

2. Panel schedule TU on drawing E8 shows dining room receptacles on circuit #3 which is shown as 15A circuit. Per NEC 210.52 B (1) & (3) this must be a 20A circuit. Do you want the circuit changed to a 20A circuit, or do you want us to pull it off one of the small appliance circuits? May affect cost.

3. There is a gang electrical box shown on drawings E4 for the kitchen and dining lights, in the two bedroom units. May these switches be moved around the corner to facilitate the use of a standard nonmetallic three gang box? There isn't a nonmetallic three gang box which will fit the stud cavity as shown. May affect cost if we cannot move switches.

Thank you.

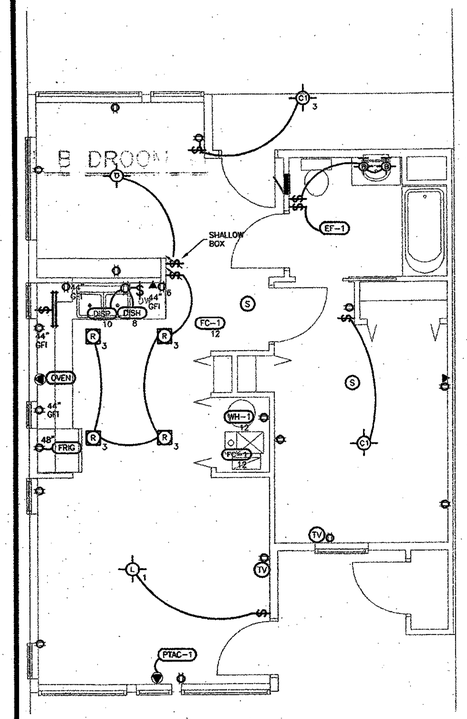
Re: RFI#3 Sunshine Peak Apartments – Montrose, CO

1. Please use our RFI # in your responses as well as Schauer's, as we don't know the number of Schauer's RFI. Also please answer each point of each question with nicety.
2. We need revised lighting plans which reflect the changes to lighting schedule. We also need a new complete lighting schedule.
3. Town house panel location as shown on E2 and E4 conflicts with plumbing. Are we to move our panel or floor their plumbing? If we are moving our panel, please have revised sheets with new location.
4. Town house plans as shown on E4, show a receptacle outlet to the right of the front door, this conflicts with the elevation of the windows going down to grade. It may be moved under PTHC-1 to meet NEC 210-52 (A)(1), however both sides of this opening are completely packed out with studs. This will make installation near impossible. May we move both receptacles shown the wall?
5. It has come to our attention that kitchen counter walls are to be modified. We plan on mounting our boxes horizontally to help alleviate dimensional framing issues. We will need a minimum of 2.75" from the top of back splash to the bottom of dual tap plates Framing that wall (or 3.75" to the top of the wall). Please insure that your wall detail accommodates our dimensional needs.
6. Drawing E4 shows an outside lighted switched from the interior of the one bedroom units. E2 shows all exterior lights being fed from the house panel and controlled by a photo-cell. Is this lighting to be deleted, or what is your exact intention as this is unique of the other units?

Thank you,

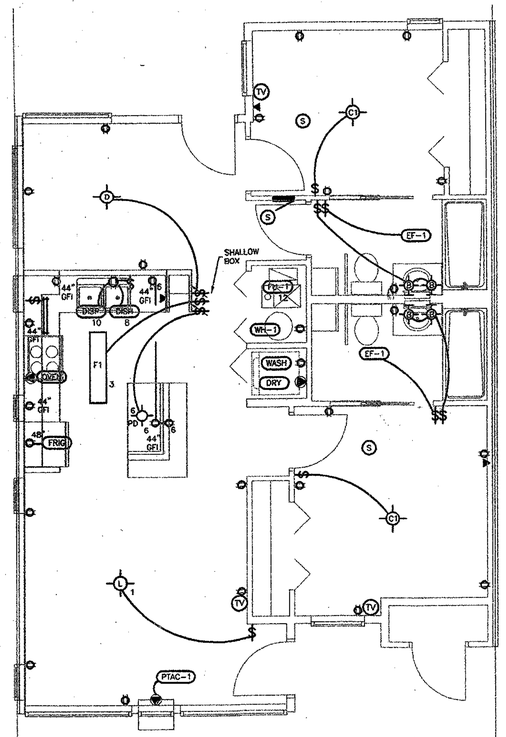
Doris J Bess, President
Professional Electric

RFI #13



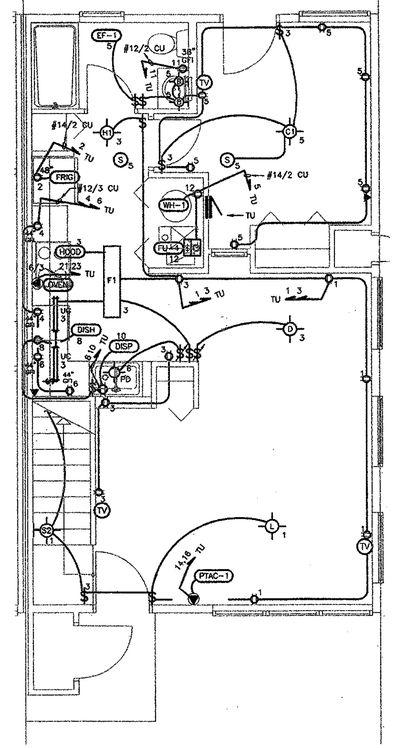
1 BEDROOM TYPICAL UNIT PLAN

SCALE 1/4" = 1'-0"



2 BEDROOM TYPICAL UNIT PLAN

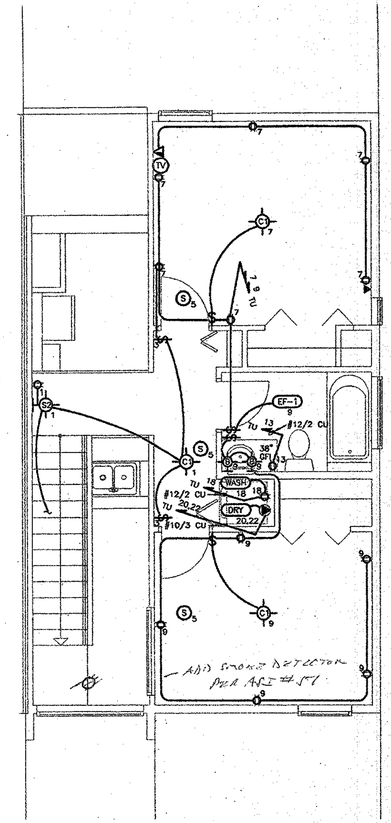
SCALE 1/4" = 1'-0"



TOWNHOME TYP. UNIT PLAN(1ST FLOOR)

SCALE 1/4" = 1'-0"

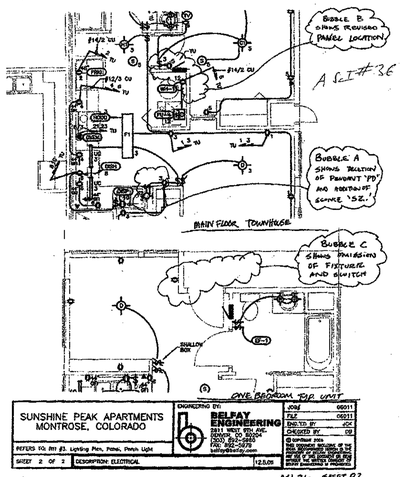
- SEE A-14 #36



TOWNHOME TYP. UNIT PLAN(2ND FLOOR)

SCALE 1/4" = 1'-0"

- SEE ASI #36



1. Range Hoods in each unit kitchen shall be on circuit #3.
2. NEC 210.52 B indicates a minimum of (2) 20 amp small appliance circuits shall be provided. Circuits #4 and #6 of the Panel 1U are 20 amp small appliance circuits.
3. Switch locations are to remain as shown on the drawings. Contractors choice to use one or multiple boxes.

ASI #32

1 – This ASI is a response Schauer Construction's RFI #13 which references Professional Light, Inc.'s RFI 03.

2 – See Sheet 02 for an updated lighting plan of the Townhouse First Floor plan showing the change of pendant fixture 'PD' to sconce fixture 'S2.' See Sheet 01, Bubble A, for a revised lighting Fixture Schedule.

ASI #36

3 – See Sheet 02, Bubble B, for a revised Townhouse panel location.

4 – Receptacles must be located underneath the FTHC-1. Architect will coordinate with GC for conduit path and location.

5 – Sit up bar counter top detail is located on Sheet A19 of 87 Detail 8. Ten inches are provided from the top of counter to top of bar top with a single top plate. The back splash is to be four inches. Coordinate with interior elevations for height of counter top of either 34 or 36 inches

6 – Sheet E4 – Exhibit '1 Bedroom Typical Unit Plan': Omit ceiling mounted fixture and switch at back porch. See Sheet 02, Bubble C.

GENERAL ELECTRICAL NOTES

1. THE TOWNHOME UNIT IS THE TYPICAL UNIT TO BE FOLLOWED FOR ALL UNITS.
2. E.C. TO USE #14/3 CU UNLESS OTHERWISE NOTED.
3. PROVIDE ARC–FAULT CURRENT INTERRUPTER PROTECTION FOR BEDROOM OUTLETS (RECEPTACLE, LIGHTING, SMOKE DETECTORS, ETC.) PER N.E.C. 210.12
4. ALL SMOKE DETECTORS TO BE INTERCONNECTED ON AFCI PROTECTED CIRCUIT #5.
5. UNITS C102, D102, AND G102 ARE ADA UNITS. STANDARD RECEPTACLES TO STILL BE MOUNTED AT 18" AFF. LIGHT SWITCHES TO BE MOUNTED AT 48" AFF. GARBAGE DISPOSAL SWITCH, HOOD LIGHT SWITCH, AND HOOD FAN SWITCH TO BE AT 44" AFF SINCE THE KITCHEN COUNTERS ARE NOT WIDER THAN 24". THESE UNITS WILL REQUIRE A HORN/STROBE IN EVERY ROOM.

Re: Sunshine Peak Apartments – Montrose, CO

Dave – Please find the two items below in which we would appreciate further clarification.

1 – Note #5 on Drawing E4 requires receptacles to be mounted 18" AFF and switches 48" AFF regardless of being standard or ADA units. Please verify that this measurement does not floor to the bottom of electrical boxes to be accurate. Should kitchen counter receptacles be 44" in a similar manner? What about receptacles at bedroom vanities? What is the mounting height of fire alarm horn/strobes?

ANSWER:
Receptacle mounting height of 18" is standard for all ADA and NON-ADA units.
Verify kitchen and bathroom accessory receptacle mounting heights with architect.
Mount horn/strobes at 72" AFF.

2 – What is the mounting height of outdoor wall sconces? Outdoor receptacles are not shown, but required per NEC 210.52(E). Please provide location, mounting height, and circuit number.

ANSWER:
Wall sconces to be mounted at 72" AFF.
Outdoor receptacles to be located next to the back and rear door of grade level units. Nearest circuit for the front door is #1 and for the rear door is #3.

Thank you,

Steve Eberling

ASI #31 SHEET 01

SWITCHES, OUTLETS, AND CONTROLS IN ACCESSIBLE LOCATIONS

For obstructions extending from 0 to 20 inches from the wall the maximum height for a control or outlet over the obstruction is 48 inches above the floor. Deeper shelves, extending 20 to 25 inches from the wall, reduce the maximum mounting height of controls and outlets to 44 inches. Controls and outlets mounted over obstructions extending further than 25 inches are outside the reach range of people using wheelchairs and are not considered to be in accessible locations. However, 36 FR allows an industry tolerance of 1/2 inch to permit the installation of standard countertops that may project from the back wall for a maximum dimension of 25-1/2 inches.

ACCESSIBLE VANITY

ACCESSIBLE KITCHEN
